

# **NATIONAL BOARD FOR TECHNICAL EDUCATION**

## **CURRICULUM AND COURSE SPECIFICATIONS**

### **FOR**

## **NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY**

**APRIL, 2018**

## **GENERAL INFORMATION**

### **1.0 CERTIFICATION AND TITLE OF THE PROGRAMME:**

The certificate to be awarded and the programme title shall read: “**NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY**”

### **2.0 GOAL AND OBJECTIVES:**

The National Diploma Programme in **Cement Engineering Technology** is designed to produce diplomates with skills and knowledge to be able to function as technicians in the Cement industry.

On completion of this programme, the diplomate should be able to:

- i. Identify the basic raw materials for cement manufacturing.
- ii. Assist in carrying out basic operations and processes in cement manufacturing.
- iii. Monitor basic processes in cement manufacturing production.
- iv. Assist in carrying out routine maintenance and repair of cement production lines.
- v. Apply general safety rules, health and environmental management in cement production.
- vi. Assist in carrying out basic quality control measures in cement production.
- vii. Work not only in cement, but also in ceramic, construction and related industries.
- viii. Set up and manage an enterprise

### **3.0 ENTRY REQUIREMENTS:**

The general entry requirement for the National Diploma Cement Engineering Technology programme is satisfactory performance in the UTME, five credit passes at not more than two sittings in Senior Secondary School Certificate (SSCE), NTC/NBC and General Certificate of Education (GCE) Ordinary level. The relevant subjects are: English Language, Mathematics, Physics, Chemistry and one other subject from Metal Work, Wood Work, Technical Drawing, Basic Electronics/Basic Electricity, Economics/Commerce, Statistics, Further Mathematics, Computer Studies/ICT, Geography, Biology/Agricultural Science.

## **4.0 CURRICULUM**

4.1 The curricula of all ND programmes consist of four main components. These are:

- i. General Studies/Education courses
- ii. Foundation courses
- iii. Professional courses
- iv. Supervised Industrial Work Experience Scheme (SIWES)

**4.2 The General Education Component shall include courses in:**

- Art and Humanities – English Language, Communication, History; and Social Studies – Citizenship Education (the Nigerian Constitution) Political Science, Sociology, Philosophy, Geography and Entrepreneurship Studies
- The General Education component shall account for not more than 15% of total contact hours for the programme

**4.3 Foundation Courses** include courses in Mathematics, Pure Science, Technical Drawing, Descriptive Geometry, etc. The number of hours will be between 10-15% of the total contact hours.

**4.4 Professional Courses** are courses which give the student the theory and practical skills he needs to practice his field of calling at the technician level. These may account for between 60-70% of the contact hours

**4.5 Student Industrial Work Experience Scheme (SIWES)** shall be taken during the long vacation following the end of the second semester of the first year. See details of SIWES in paragraph 10.0

## **5.0 Curriculum Structure:**

The structure of the ND Programme consists of four semesters of classroom, laboratory and workshop activities in the institution and a semester (3-4 months) of students' industrial work experience scheme (SIWES). Each semester shall be of 17 weeks duration made up as follows:

- 15 contact weeks of teaching, i.e. recitation, practical exercises, quizzes, tests, etc; and
- 2 weeks for examinations and registration

SIWES shall take place at the end of the second semester of the first year.

## **6.0 PROJECT**

Project shall be submitted at the end of the second semester of the final year.

## 7.0 ACCREDITIATION

The programme shall be by the accredited NBTE before the diplomats can be awarded the diploma certificate. Details about the process of accrediting a programme are available from the Executive Secretary, National Board for Technical Education, Plot B Bida Kaduna, Nigeria.

## 8.0 Conditions for the Award of the ND:

Institutions offering accredited programmes will award the National Diploma to candidates who successfully completed the programme after passing prescribed course-work, examinations, diploma project and the supervised industrial work experience. Such candidates should have completed a minimum of between 90 and 100 semester credit units. National Diploma Certificates shall be awarded based on the following:-

**i. Grading of Courses:** Courses shall be graded as follows:

MARKED RANGE	LETTER GRADE	WEIGHTING
75% and above	A	4.00
70% – 74%	AB	3.50
65% – 69%	B	3.25
60% – 64%	BC	3.00
55% – 59%	C	2.75
50% – 54%	CD	2.50
45% – 49%	D	2.25
40% – 44%	E	2.00
Below 40%	F	0.0

**ii. Classification of Diplomas:** Diploma Certificate shall be awarded based on the following classifications:

Distinction - CGPA 3.50-4.00  
Upper Credit - CGPA 3.00-3.49  
Lower Credit - CGPA 2.50-3.00  
Pass - CGPA 2.00-2.49

## 9.0 GUIDANCE NOTES FOR TEACHERS OF THE PROGRAMME:

9.1 The curriculum is drawn in unit course. This is in keeping with the provisions of the National Policy on Education which stress the need to introduce the semester credit units which will enable a student who so wish to transfer the units already

completed to an institution of same standard.

9.2 In designing the units, the principle of the modular system by product has been adopted, thus making each of the professional modules, when completed provides the student with technician operative skills, which can be used for employment purposes.

9.3 As the success of the credit unit system depends on the articulation of programmes between the institution and industry, the Curriculum content has been written in behavioral objectives, so that it is clear to all the expected performance of the student who successfully completed some of the courses or the diplomates of the programme. There is a slight departure in the Presentation of the performance based curriculum which requires the conditions under which the performances are expected to be carried out and the criteria for the acceptable levels of performance. It is a deliberate attempt to further involve the staff of the department teaching the programme to write their own curriculum stating the conditions existing in their institution under which the performance can take place and follow that with the criteria for determining an acceptable level of performance. Departmental submission on the final curriculum should be vetted by the Academic Board of the institution. Our aim is to continue to see to it that a solid internal evaluation system exists in each institution for ensuring minimum standard and quality of education in the programmes offered throughout the polytechnic system.

9.4 The teaching of the theory and practical work should, as much as possible, be integrated. Practical exercises, especially those in professional courses and laboratory work should not be taught in isolation from the theory. For each course, there should be a balance of theory to practice in the ratio of 50:50 or 60:40 or the reverse

## **10.0 GUIDELINES ON SIWES PROGRAMME:**

For the smooth operation of the SIWES the following guidelines shall apply

### **10.1 Responsibility for placement of students**

- a) Institutions offering the ND programme shall arrange to place the students in industry by April 30 of each year. Six copies of the list showing where each student has been placed shall be submitted to the Executive Secretary, NBTE who shall in turn, authenticate the list and forward it to the Industrial Training Fund, Jos.
- b) The placement Officer should discuss and agree with industry on the following:
  - i. A task inventory of what the students should be expected to experience during the period of attachment. It may be wise to adopt the one already approved for each field
  - ii. The industry-based supervisor of the students during the period, likewise the institution based supervisor.
  - iii. The evaluation of the student during the period. It should be noted that the final grading of the student during the period of the attachment should be weighted more on the evaluation by his industry-based supervisor.

### **10.2 Evaluation of students during the SIWES**

In the evaluation of the student, cognizance should be taken of the following items:

- a) Punctuality
- b) Attendance
- c) General Attitude to Work

- d) Respect for Authority
- e) Interest in the Field/Technical area
- f) Technical competence as a potential technician in his field

**10.3 Grading of SIWES**

To ensure uniformity of grading scales, the institution should ensure that the uniform grading of student’s work which has been agreed to by polytechnics is adopted.

**10.4 The Institution Based Supervisor**

The Institution-based supervisor should initiate the log book during each visit. This will enable him to check and determine to what extent the objectives of the scheme are being met and to assist students having any challenge regarding the specific assignments given to them by their industry-based supervisor (s)

**10.5 Frequency of Visit**

Institutions should ensure that students placed on attachment are visited within one month of their placement. Other visits shall be arranged so that:

- 1) There is another visit six weeks after the first; and
- 2) A final visit in the last month of the attachment

**10.6 Stipends for Students on SIWES**

The rate of stipend payable shall be determined from time to time by the Federal Government after due consultation with the Federal Ministry of Education, the Industrial Training Fund and the NBTE

**10.7 SIWES as a Component of the Curriculum**

The completion of SIWES is important in the final determination of whether the student is successful in the programme or not.

Failure in the SIWES is an indication that the student has not shown sufficient interest in the field or has no potential to become a skilled technician in his field. The SIWES should be graded on a fail or pass basis. Where a student has satisfied all other requirements but failed SIWES, he may only be allowed to repeat another four months SIWES at his own expense

**TABLE OF CONTENTS**

**GENERAL INFORMATION**

**NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY**

**SEMESTER 1**.....

USE OF ENGLISH I -----

CITIZENSHIP EDUCATION I.....

LOGIC AND LINEAR ALGEBRA.....

TECHNICAL DRAWING .....

BASICWORKSHOP TECHNOLOGY AND PRACTICE.....

MECHANICS AND PROPERTIES OF MATTER AND HEAT ENERGY.....

GENERAL PRINCIPLE OF CHEMISTRY .....

INTRODUCTION TO COMPUTING-----

INTRODUCTION TO MINING-----

INTRODUCTION TO CEMENT AND CEMENT RAW MATERIALS-----

**NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY**

**SEMESTER 2**.....

COMMUNICATION IN ENGLISH I-----

INTRODUCTION TO STATISTICS-----

INTRODUCTION TO COMPUTER AIDED DESIGN AND DRAFTING-----

INTRODUCTION TO ENTREPRENEURSHIP-----

ALGEBRA AND ELEMENTARY TRIGONOMETRY-----

ELECTRICAL ENGINEERING SCINECE I.....

SCIENCE AND PROPERTIES OF MATERIALS.....  
SAFETY AND ENVIRONMENTAL CONTROL IN CEMENT INDUSTRY .....  
FUNDAMENTALS OF THERMODYNAMICS -----  
INTRODUCTION TO KILN OPERATIONS AND CONTROL -----

**NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY**

**SEMESTER 3.....**  
USE OF ENGLISH II-----  
RESEARCH METHODS-----  
PRACTICE OF ENTREPRENEURSHIP-----  
CALCULUS-----  
ELECTRONICS AND INSTRUMENTATION.....  
FLUID MECHANICS-----  
PRINCIPLES OF UNIT OPERATIONS I .....  
CEMENT PLANT SERVICES AND MAINTENANCE .....  
GEOLOGY AND MINING OF CEMENT RAW MATERIALS.....  
RAW MIX DESIGN AND CHEMISTRY OF CEMENT-----  
MATERIAL AND ENERGY BALANCE.....

**NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY**

**SEMESTER 4**.....  
COMMUNICATION IN ENGLISH II.....  
TRIGONOMETRY AND ANALYTICAL GEOMETRY.....  
INTRODUCTION TO ENGINEERING MANAGEMENT-----  
STRENGTH OF MATERIALS-----  
PRINCIPLES OF UNIT OPERATIONS II -----  
HEAT AND MASS TRANSFER-----  
ELECTRICAL MACHINES AND INDUSTRIAL DRIVES.....  
INTRODUCTION TO INDUSTRIAL AUTOMATION-----  
PYRO-PROCESSING AND CLINKER FORMATION .....  
QUALITY CONTROL IN CEMENT MANUFACTURE-----  
FINAL YEAR PROJECT-----

4-5	<p><b>Language</b></p> <p>2.1 Define the concept of language.</p> <p>2.2 List the characteristics of language.</p> <p>2.3 Explain the four language skills, viz., speaking, listening, writing, reading.</p> <p>2.4 State the functions of language.</p> <p>2.5 List the uses of English Language in Nigeria, e.g. as the language of research, government, commerce etc.</p>	<p>Explain the concept of language.</p> <p>List and explain the characteristics of language.</p> <p>Explain the four language skills in their appropriate order.</p> <p>Explain the functions of language.</p> <p>Explain uses of English Language in Nigeria.</p>	<p>Textbooks Overhead Projector Tape recorder CD etc</p>	<p>Explain the concept of Language.</p> <p>State the characteristics of language.</p> <p>Apply the four language skills in their order.</p> <p>State the functions of Language.</p> <p>State the uses of English Language in Nigeria.</p>	<p>Guide, supervise and correct students' activities.</p>	<p>Class work, assignment, test.</p>
<b>GENERAL OBJECTIVE 3.0</b> Understand the basic rules of grammar						
	<p><b>Grammatical Conventions</b></p> <p>3.1 Define grammar</p> <p>3.2 List parts of speech.</p> <p>3.3 Explain the use of parts of speech in sentences.</p> <p>3.4 List punctuation marks.</p>	<p>Explain grammar.</p> <p>Explain parts of speech.</p> <p>Analyse the use of parts of speech in sentences.</p> <p>Explain punctuation marks.</p>	<p>Textbooks Overhead Projector Tape recorder CD etc.</p>	<p>Define grammar.</p> <p>Enumerate parts of speech.</p> <p>Identify parts of speech in sentences. Use parts of speech appropriately in sentences.</p> <p>List punctuation marks.</p>	<p>Guide, supervise and correct students' activities.</p>	<p>Class work, assignment, test.</p>

	<p>3.5 Enumerate the uses of punctuation marks.</p> <p>3.8 Explain affixation.</p>	<p>Explain the uses of punctuation marks.</p> <p>Define Affixation.</p>		<ul style="list-style-type: none"> <li>➤ Enumerate the uses of punctuation marks.</li> <li>➤ Punctuate given sentences paragraphs and passages.</li> <li>➤ Identify prefixes and suffixes.</li> <li>➤ Form words with suffixes and affixes.</li> </ul>		<p>“</p>
<p><b>GENERAL OBJECTIVE 4.0</b> Know the essential qualities of paragraphs.</p>						
	<p><b>Paragraphing</b></p> <p>4.1 Define a paragraph.</p> <p>4.2 Name the parts of a paragraph, viz., topic sentence, development, and conclusion/ transition.</p> <p>4.3 List the thematic qualities of a paragraph, viz unity, coherence and emphasis.</p> <p>4.4 Enumerate methods of</p>	<p>Explain paragraphing.</p> <p>Explain the parts of a paragraph.</p> <p>Explain the thematic qualities of paragraph.</p>	<p>Textbooks Overhead Projector Tape recorder CD/DVD etc.</p>	<ul style="list-style-type: none"> <li>➤ Define paragraph.</li> <li>➤ Identify the number of paragraphs in a given passage.</li> </ul> <p>Identify the parts of a paragraph in a passage.</p> <p>Identify the thematic qualities of a paragraph.</p> <p>List methods of paragraph development.</p>	<p>Guide, supervise and correct students' activities.</p>	<p>Class work, Assignment, Test</p>

	paragraph development viz: Example, definition, comparison, contrast etc.	Explain methods of paragraph development.		Write specific paragraphs to illustrate 4.2 and 4.4.		
<b>GENERAL OBJECTIVE 5.0</b> Appreciate literary works in English.						
	<b>Literature in English</b> 5.1 Define Literature.  5.2 Trace the development of literature. 5.3 List the functions of Literature. 5.4 Differentiate between the literary genres.  5.5 Enumerate the terminology of prose fiction, e.g., plot setting, characterization etc.  5.6 Explicate a novel.	Explain the concept of Literature.  Explain the development of Literature.  Explain the functions of Literature.  Explain the genres of Literature.  ➤ Explain the terminology of prose.  Present questions in a given novel and assign characters to the students.	Textbooks Projector Marker Board Marker Internet Tape recorder CD/DVD etc.	Define Literature.  Trace the development of Literature.  List some functions of Literature.  Differentiate between the literary genres.  ➤ List the terminology of prose.  ➤ Answer questions on a given novel. ➤ Role play the characters in the novel.	Guide, supervise and correct students' activities.	Class work, Assignments, Test

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
--------------------	----------------------------------	---------------

Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

<b>Programme: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>	<b>Course Code: GNS 111</b>	<b>Credit Hours: 2</b>
<b>Course: Citizenship Education I</b>	<b>Pre-Requisite: -</b>	<b>Theoretical: 2 Hours/Week</b>
<b>Year: 1                    Semester: 1</b>		<b>Practical: 0 Hours/Week</b>
<b>Goal:</b> The Course is designed to enable Student to acquire knowledge of Government, Governance, constitution, fundamental human rights, and the Rule of Law in order to enable them appreciate their roles as citizens as well as the role of government in ensuring good governance.		
<b>GENERAL OBJECTIVES</b>		
On completion of this course, the Student should be:		
<ol style="list-style-type: none"> <li><b>1.0.</b> To understand Citizenship Education as a course of study.</li> <li><b>2.0.</b> To understand the rights of citizens.</li> <li><b>3.0.</b> Understanding the constitution.</li> <li><b>4.0.</b> Understanding the major organs of government.</li> <li><b>5.0.</b> Understand national identity</li> <li><b>6.0.</b> Understand the concept of power and authority</li> </ol>		

<b>Programme: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>Course: Citizenship Education I</b>				Course Code: GNS111		CH/CU Hours: 2
<b>Goal:</b> The Course is designed to enable Student to acquire knowledge of Government, Governance, constitution, fundamental human rights, and the Rule of Law in order to enable them appreciate their roles as citizens as well as the role of government in ensuring good governance.						
<b>General Objective 1.0:</b> Understanding Citizenship Education						
<b>Course Specification: THEORETICAL CONTENT</b>						
THEORETICAL CONTENTS			PRACTICAL CONTENTS			
WEEK/S	SPECIFIC LEARNING OBJECTIVES	TEACHER'S ACTIVITIES	RESOURCES	SPECIFIC LEARNING OBJECTIVES	TEACHER'S ACTIVITIES	RESOURCES
1	1.1. Explain Citizenship Education.	Discuss citizenship Education.	Marker board, marker, textbook	Know what Citizenship Education is all about.	Define Citizenship Education.	Internet, Newspapers, section of library, magazine, selected novels.
2-4	1.2. Who is a Citizen? Define.  1.3. Explain the difference between a citizen and a Non-citizen.	Define who a Citizen is.  Differentiate a Citizen of Nigeria and a non-citizen.	Marker board, marker, same textbook.	Explain Citizenship of a county  Differentiate between a Citizen and non-citizen.	Define who a citizen is.  Go round to monitor the students.	Text book library, internet CD-Rom
	1.4. Identify the qualities of a good Citizen	Discuss the qualities of a good Citizen	Makerboard, maker, same textbooks	State the good quality of a citizen	Mention the quality of a good citizen	Text book library, internet CD-Rom

	1.5. Explain the duties and obligations of a citizen	Mention the duties and obligations of a citizen	Maker board, maker, same textbooks	Know duties and obligations of a citizen to the country	Make necessary correction to students s response while asking them questions	Text book library, internet CD-Rom
	1.6.Mention the benefits of being a Citizen	State the benefits of being a citizen	Maker board, maker, same textbooks.	Mention the benefits of being a citizen	Make the students know their benefits and their rights as a citizen	Text book library, internet CD-Rom
	1.7. Identify the types of Citizenship and Evaluate the merits and de-merits of each.	Explain the types of Citizenship  State the merits and de-merits of each type of Citizenship.	Maker board, maker, same textbooks.	Explain the types of Citizenship  State the merits and de-merits of each type of Citizenship.	Make the students identify the type of citizenship and know the merits and de-merits of each type.	Text book library, internet CD-Rom
	1.8. Explain the methods of acquiring citizenship.	Explain the ways of acquiring citizenship of a country.	Maker board, maker, same textbooks.	Mention the ways of acquiring citizenship of a country	Make necessary corrections to students response while asking them to explain the genuine methods of acquiring citizenship of a country	Text book library, internet CD-Rom
<b>GENERAL OBJECTIVE: 2.0: Understanding The Rights Of Citizens</b>						
4-7	2.1. Explain the Fundamental Human Rights of a Citizen.  2.2.Explain the Responsibilities and Duties of Government to the Citizens  2.3.Explain the methods used by the Government in protecting the Fundamental Human Rights as contained in the Constitution.	Explain the Fundamental Human Rights.  Explain the responsibilities and duties of government to them as a citizen.  Explain the method in which the Government used in protecting Fundamental Human rights as it is in the constitution.  Explain the limitations to the Fundamental Human Rights they know.	Maker board, maker, text book Board, marker, same textbooks.  Board, marker, same textbooks.	Know the rights of Citizen  Demonstrate with examples in the institution and outside the institution.  Know the rights of the citizen being protected by the Government  Know the limitations to the Fundamental Human Rights.	Monitor the students' activities while asking them questions.  Go around to monitor the student's activities. Asking them questions and correcting them where necessary.	Text book library, internet CD-Rom

	2.4. Explain the limitations of Fundamental Human Rights.  2.5 Explain the benefits Citizens derive by being responsible and law abiding.	Discuss the benefit of being a responsible and law abiding citizen of a country.		Know the benefit for being a responsible and law abiding citizens		
<b>GENERAL OBJECTIVE: 3.0: UNDERSTANDING THE CONSTITUTION</b>						
7-9	3.1 Define Constitution.	Explain the advantages of Constitution.	Board, Marker, the 1999 Constitution of the Federal Republic of Nigeria.	Point out the relevance of the Constitution.	Explain Constitution.	Text book library, internet CD-Rom
	3.2 List the types of Constitution.	Explain the different types of Constitution.	Board, Marker, the 1999 constitution.	Give examples of how the Constitution was cited in cases.	Explain the different types of Constitution.	Text book library, internet CD-Rom
	3.3 Highlight the history of the Nigerian Constitution.	Explain how the Constitution came to be.	Board, Marker, text book.	Point out and explain the different Constitutions Nigeria had before the 1999 Constitution.	Explain the different types of Constitution.	Text book library, internet CD-Rom
	3.4 Define Supremacy.	Explain the Supremacy of the Constitution above other laws.	Board, Marker, The Constitution.	Explain the supremacy of the Constitution.	Explain the supremacy of the Constitution.	Text book library, internet CD-Rom
	3.5 Define the Rule of Law.	Explain the Rule of Law.	Board, Marker, text book	Give examples and cite cases where the Rule of Law was used to determine cases.	Explain the Rule of Law.	Text book library, internet CD-Rom
<b>General Objective: 4.0. :Understanding The Major Organs of Government</b>						
10	4.1 Describe the three organs of government	Describe the major organs of government.	Marker Board, marker, textbooks	Explain The Major Organs Of	State the role of each arm of	Text book library,

				Government	government	internet CD-Rom
	4.2 Analyse the functions of the executive, legislature and judiciary.	Explain the duties of each arm of government	Publication	Outline the duties of each organ of government	Mention the three Arms of Government	Text book library, internet CD-Rom
	4.3 Explain the process of selecting and appointing members of the executive, legislature and judiciary.	Discuss the processes of election.	Books	Analyse the process of election and selection	Understand election process in Nigeria.	Text book library, internet CD-Rom
	4.4 Examine the relationship among the three organs of government.	Explain inter- governmental relations.	Publications	Explain the relationship among the three arms of government	Explain IGR in Nigeria	Text book library, internet CD-Rom
	4.5 Outline the principles of separation of powers and checks and balances in government.	Discuss checks and balances in government.	Marker Board and marker	State how the principles are applied in government.	Analyze these principles.	Text book library, internet CD-Rom
	4.6 Explain how checks and balances are applicable in government	Give examples of how checks and balances are applied in government.	Text book library, internet CD-Rom	Explain separation of powers & checks and balances.	State how checks and balances are applied.	Text book library, internet CD-Rom
<b>GENERAL OBJECTIVES: 5.0: Understand National Identity</b>						
	5.1 Introduction Explain the need for national identity.	Text books, marker.	Books	State the importance of national identity.	Write a test on national identity.	Text book library, internet CD-Rom
	5.2 The meaning of national identity.	Explain National identity	Handouts	Discuss national identity	State the importance of national identity	Text book library, internet CD-Rom
	5.3 Explain the need for national identity	Discuss national identity	Handout, books	Explain national identity	Outline the need for national identity	Text book library, internet CD-

						Rom
	5.4 Analyse the ways of preserving Nigerian national identity	State why we should identify with the nation	Handouts and materials	List why we should identify with the nation.	Outline the need for national identity.	Text book library, internet CD-Rom
	5.5 Outline the reasons why we should identify with the nation.	State the reasons for identifying with national identity	Textbooks	Outline the reasons for identifying with national identity	Name the reasons for identifying with national identity	Text book library, internet CD-Rom
	5.6 Examine the role and significance of national symbols such as the national anthem, national flag, coat of arms.	Explain importance of national symbols.	Slides ICT	Listen to students explain role of national symbols.	Explain each of the national symbols.	Text book library, internet CD-Rom
	5.7 Highlight cultural diversity and national Integration in Nigeria.	Discuss link between cultural diversity and national identity.	Handouts	Explain cultural diversity and national identity.	Define cultural diversity and national identity.	Text book library, internet CD-Rom
<b>GENERAL OBJECTIVE: 6.0 Understand The Concept of Power And Authority</b>						
11-12	6.1 Explain the concept of power and Authority	Explain the concept of power and Authority	Publications, Marker Board	Discuss power and Authority	Individual student should define power and authority	Text book library, internet CD-Rom
	6.2 Distinguish between power and Authority	Differentiate between the two concepts	Books	Define the two concepts	Explain power and authority	Text book library, internet CD-Rom
	6.3 Explain Abuse of Power	Discus Abuse of Power and their remedies	Handouts	Demonstrate Abuse of Power	Explain how power can be misused or abused	Text book library, internet CD-Rom
	6.4 Prescribe Remedies Against Abuse of Power	Enumerate and explain them	Books	Discuss the use and abuse of power	Explain how power can be abused	Text book library, internet CD-Rom
	6.5 Distinguish between	Emphasis on the Role of	Handouts	Define leadership	Differentiate	Text book

	leadership and Followership	leaders and followers		and Followership	between leadership and Followership	library, internet CD-Rom
	6.6 Evaluate the Role of leaders and Followers in Nation-Building	Explain the duties of leaders and followers	Books/manuals	Define the role of leaders and followers	Outline the role of leader and followers	Text book library, internet CD-Rom
	6.7 Explain the influence of Leadership in Nation-Building	Discuss influence of leadership in nation building	Marker Board /marker	Explain the Role and influence of leadership	Discuss influence of leadership	Text book library, internet CD-Rom

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE TITLE: LOGIC AND LINEAR ALGEBRA</b>	<b>COURSE CODE: MTH 111</b>	<b>UNIT: 2</b>	<b>CONTACT HOURS: THEORETICAL: 2HOURS/WEEK</b>
<b>SEMESTER: 1</b>	<b>PRE-REQUISITE: -</b>		<b>PRACTICAL: 0 2HOURS/WEEK</b>

**Goal:** To enable students develop precise, logical and abstract thinking and the ability to recognize, formulate, and evaluate problems in their areas of specialization

**General Objectives**

On completion of this course the students will be able to:

1. Understand basic rules of mathematical logic and their application in mathematical proofs.
2. Know the concept of Permutation and Combination.
3. Compute the Binomial expansion of algebraic expressions.
4. Understand Algebraic operations on matrices and determinant.

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE: LOGIC AND LINEAR ALGEBRA</b>	<b>CODE: MTH 111</b>	<b>UNIT: 2</b>	<b>CONTACT HOURS/CU: 2</b>
			<b>THEORETICAL: 2 Hours/Week</b>
<b>Year: 1</b>	<b>Semester: 1</b>	<b>PRE-REQUISITE: -</b>	<b>PRACTICAL: 0 Hours/Week</b>
<b>GOAL: To enable students develop precise, logical and abstract thinking and the ability to recognize, formulate, and evaluate problems in their areas of specialization</b>			
<b>GENERAL OBJECTIVE 1.0: UNDERSTAND BASIC RULES OF MATHEMATICAL LOGIC AND THEIR APPLICATION IN MATHEMATICAL PROOFS</b>			
<b>THEORETICAL CONTENTS</b>		<b>PRACTICAL CONTENTS</b>	

WEEK/S	SPECIFIC LEARNING OUTCOMES FOR STUDENTS	TEACHER'S ACTIVITY	RESOURCES	SPECIFIC LEARNING OUTCOME	TEACHER'S ACTIVITY	RESOURCES
1-4	1.1 Define the essential connectives such as conjunction, disjunction, negation, implication and bi- implication.	Explain the concepts of the essential connectives such as conjunction, disjunction, negation,	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.	Define the concepts; essential connectives, negation, conjunction, disjunction, implication and bi-implication.	Correct any error in the students' definitions and concepts.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.
	1.2 Illustrate the essential connectives defined in 1.1 above 1.3 Describe grouping and parenthesis in logic 1.4 Explain Truth tables. 1.5 Define tautology. 1.6 Illustrate types of tautology. 1.7 Define universal quantifier and existential quantifier 1.8 Translate sentences into symbolic form using quantifiers. 1.9 Define the scope of a quantifier. 1.10 Define "bound" and "free" variables.	Illustrate the essential connectives define in 1.1 above;  Describe grouping and parenthesis in logic;  Explain and draws Truth tables for different combinations of propositions.  Define and identify tautology.  Illustrate types of tautology  Use of quantifier in translating sentences into symbolic form;  Explain the concept of bound and free variables.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.	Describe grouping and parenthesis in logic.  Draw truth tables Truth tables.  Define and identify tautology.  Illustrate types of tautology.  Define universal quantifier and existential quantifier Translates some given sentences into symbolic form.	Illustrate with examples.  Observe, instruct and guide the students in the exercises.  Supervise the students' work.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.

<b>GENERAL OBJECTIVE 2.0: KNOW THE CONCEPT OF PERMUTATION AND COMBINATION</b>						

5	<p>2.1 Define permutation.</p> <p>2.2 Give illustrative examples on permutation.</p> <p>2.3 State and prove the fundamental principles of permutation and give examples.</p> <p>2.4 Derive the formula <math>{}^n P_r = \frac{n!}{(n-r)!}</math></p>	<p>Define and explains permutation.</p> <p>Give illustrative examples on permutation.</p> <p>State and prove the fundamental principles of permutation and give examples.</p> <p>Explain the derivation of the formula;  <math display="block">{}^n P_r = \frac{n!}{(n-r)!}</math></p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>	<p>Define permutation.</p> <p>Solve some examples on permutation.</p> <p>State and prove the fundamental principles of permutation and solve further examples.</p> <p>Derive the formula <math display="block">{}^n P_r = \frac{n!}{(n-r)!}</math></p>	<p>Correct any error in the students' definitions and concepts.</p> <p>Illustrate with examples.</p> <p>Observe, instruct and guide the students in the exercises.</p> <p>Supervise the students' work.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>
7	<p>2.1 Define combination and give illustrative examples.</p> <p>2.2 Derive the formula <math>{}^n C_r = \frac{n!}{(n-r)!r!}</math>.</p> <p>2.3 Solve problems of combination with restrictions on some of the objects.</p> <p>2.4 Solve problems of combination of "n" different objects taken any number of it at a time.</p>	<p>Define combination and gives illustrative examples.</p> <p>Demonstrate the derivation of the formula <math display="block">{}^n C_r = \frac{n!}{(n-r)!r!}</math></p> <p>Solve problems of combination with restrictions on some of the objects.</p> <p>Explain solution of problems of combination of "n" different objects taken any number of it at a time.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>	<p>Define combination and give examples.</p> <p>Derive the formula <math display="block">{}^n C_r = \frac{n!}{(n-r)!r!}</math>.</p> <p>Solve problems of combination with restrictions on some of the objects.</p> <p>Solve problems of combination of "n" different objects taken any number of it at a time.</p>		<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>
<p><b>GENERAL OBJECTIVE 3.0: COMPUTE THE BINOMIAL EXPANSION OF ALGEBRAIC EXPRESSIONS</b></p>						

8	3.1 Explain with illustrative examples, the method of Mathematical Induction. 3.2 State and prove binomial theorem for positive integer index.	Give detailed explanation with illustrative examples, the method of mathematical Induction.  State binomial theorem and show the proof for positive integer index.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.	State the method of Mathematical Induction.  State and prove binomial theorem for positive integer index.	Correct any error in the students' definitions and concepts.  Illustrate with examples.  Observe, instruct and guide the students in the exercises.  Supervise the students' work.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.
9	3.1 Describe with examples, the properties of binomial expansion.	State and explain with examples, the properties of binomial expansion.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.	State the properties of binomial expansion.		Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.
10	3.2 State the binomial theorem for a rational number. 3.3 State the properties of binomial coefficients.	State the binomial theorem for a rational number.  State the properties of binomial coefficients.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.	State the binomial theorem for a rational number.  State the properties of binomial coefficients.		Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.
11	3.5 Apply binomial expansion in approximations (simple examples only).	Demonstrate the application of binomial expansion in approximations (simple examples only).	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.	Apply binomial expansion in approximations (simple examples only).		Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.
<b>GENERAL OBJECTIVE 4.0: UNDERSTAND ALGEBRAIC OPERATIONS ON MATRICES AND DETERMINANT.</b>						

12	<p>4.1 Define Matrix.</p> <p>4.2 Define the special matrices; zero matrix, identity matrix, square matrix, triangular matrix, symmetric matrix, skew-symmetric matrix, diagonal matrix, etc.</p>	<p>Define Matrix and explains the special matrices; zero matrix, identity matrix, square matrix, triangular matrix, symmetric matrix, skew-symmetric matrix, diagonal matrix, etc.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>	<p>Define Matrix.</p> <p>Define the special matrices; zero matrix, identity matrix, square matrix, triangular matrix, symmetric matrix, skew-symmetric matrix, diagonal matrix, etc.</p> <p>State examples of each of the</p>	<p>Correct any error in the students' definitions and concepts.</p> <p>Illustrate with examples.</p> <p>Observe, instruct and guide the students in the exercises.</p> <p>Supervise the students' work.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>
13	<p>4.3 State examples of each of the matrices in 4.2 above.</p> <p>4.4 State the laws of addition and multiplication of matrices.</p> <p>4.5 Illustrate the commutative, associative and distributive nature of the law stated in 4.4 above.</p> <p>4.6 Define the transpose of a matrix.</p> <p>4.7 Define the determinant, minors and cofactors of a matrix.</p> <p>4.8 Determine the determinant, the minors and cofactors of 2x2 and 3x3 matrices.</p>	<p>Give examples of each of the matrices in 4.2 above.</p> <p>State the laws of addition and multiplication of matrices.</p> <p>Illustrate the commutative, associative and distributive nature of the law stated in 4.4 above.</p> <p>Define the transpose, the determinant, minors and cofactors of a matrix.</p> <p>Determine determinant, the minors and cofactors of 2x2 and 3x3 matrices.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>	<p>State the laws of addition and multiplication of matrices.</p> <p>Illustrate the commutative, associative and distributive nature of the law stated in 4.4 above.</p> <p>Define the transpose of a matrix.</p> <p>Define the determinant, minors and cofactors of a matrix.</p> <p>Determine the determinant, the minors and cofactors of 2x2 and 3x3 matrices.</p>		

14-15	<p>4.3 State and prove the theorem “that if two rows or two columns of a matrix are identical, then the value of its determinant is zero”.</p> <p>4.4 State and prove the theorem “that if two row or two columns of a matrix are interchanged, the sign of the value of its determinant is changed”.</p> <p>4.5 State and prove the theorem “if any one row or one column of a matrix is multiplied by a constant, the determinant itself is multiplied by the constant”.</p> <p>4.6 State and prove the theorem “if a constant times the element of a row or a column are added to the corresponding element of any other row or column, the value of the determinant itself is multiplied by the constant”.</p> <p>4.7 State five examples of each of the theorems in 4.9-4.12 above.</p> <p>4.8 Obtain the adjoint of a matrix.</p> <p>4.9 Obtain the inverse of a matrix.</p> <p>4.10 State the linear transformation on the rows and columns of a matrix.</p> <p>4.11 Apply Crammer's rule in solving simultaneous linear equation.</p> <p>4.12 Apply linear transformation in solving simultaneous linear equation.</p>	<p>Demonstrate the proof of the theorems given in 4.9-4.12.</p> <p>Use examples and verify each of the theorems referred to above.</p> <p>Guide the students in obtaining the adjoint of a matrix.</p> <p>Guide the students on obtaining the inverse of a matrix.</p> <p>Present the linear transformation on the rows and columns of a matrix.</p> <p>Demonstrate the application of Crammer's rule in solving simultaneous linear equation.</p> <p>Demonstrate the application of linear transformation in solving simultaneous linear equations.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>	<p>Prove the theorems given in 4.9, 4.10, 4.11 and 4.12.</p> <p>Verify the theorems referred to in 4.9-4.12 above.</p> <p>Obtain the adjoint of a matrix.</p> <p>Obtain the inverse of a matrix.</p> <p>State the linear transformation on the rows and columns of a matrix.</p> <p>Apply Crammer's rule in solving simultaneous linear equation.</p> <p>Apply linear transformation in solving simultaneous linear equation.</p>

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>	<b>Course Code: MEC 102</b>	<b>Contact Hours: 1-0-2</b>
<b>Subject/Course: Technical Drawing</b>		<b>Theoretical: 1 hours/week</b>
<b>Year: 1                      Semester: 1</b>	<b>Pre-requisite: -</b>	<b>Practical: 2 hours /week</b>

**Goal:** To enable students to acquire knowledge of Technical Drawing and apply same in solving problems in their areas of specialization.

**General Objectives**

1. Know different drawing instruments, equipment and materials used in technical drawing.
2. Know Graphical Communication.
3. Know the construction of simple geometrical figures and shapes.
4. Know Isometric and Oblique Projections.
5. Know single orthographic projections.
6. Understand the intersections of regular solids.

Year: One Semester: One		Pre-requisite: -		<b>Practical: 2 hours /week</b>		
Theoretical Content		Practical Content				
Goal: To enable students to acquire knowledge of Technical Drawing and apply same in solving problems in their areas of specialization						
<b>General Objective 1: Know different drawing instruments, equipment and materials used in technical drawing.</b>						
<i>Week/s</i>	<b>Specific Learning Outcomes</b>	<b>Teacher's activities</b>	<b>Resources</b>	<b>Specific Learning Outcomes</b>	<b>Teacher's activities</b>	<b>Resources</b>
1 – 2	<p>1.1 Identify the different types of drawing instruments, equipment and materials.</p> <p>1.2 State the uses of the various instruments, equipment and materials.</p> <p>1.3 State the precautions necessary</p> <p>1.4 Use each of the items in 1.1 above.</p> <p>1.5 Maintain the various instruments and equipment.</p>	<ul style="list-style-type: none"> <li>Show the students all drawing instruments: Drawing set; T-Square; Drawing board; Set squares; Types of pencils (H to B).</li> <li>Explain the uses of drawing instruments.</li> </ul>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	<p>Use each of the items in 1.1. Maintain the various instruments and equipment</p>	<p>Carryout the use of the items in 1.1.</p> <p>Carryout the maintenance of the various instruments and equipment.</p>	<p>Black board ruler (1m)</p> <p>Black board Tee-Square</p> <p>Black board compass</p> <p>Blackboard protector</p> <p>Adjustable set-square</p> <p>60 set square</p> <p>45 set square</p> <p>French curve set</p> <p>Templates</p> <p>Complete drawing table.</p>
<b>General Objective 2: Know Graphical Communication</b>						

<p>2.1 Explain graphics and different types of graphic presentation.</p> <p>2.2 Illustrate the various convention present in graphical productions of construction lines, finished lines, hidden and overhead details projections, centre lines, break lines, dimensioning of plane, elevation and sections of objects.</p> <p>2.3 State the various standards of drawing sheets.</p> <p>2.4 Print letters and figures of various forms and characters.</p> <p>2.5 Illustrate conventional signs, symbols and appropriate lettering characters.</p>	<ul style="list-style-type: none"> <li>▪ Explain technical lettering in capital and small letters, using, free hand and using letter stencils.</li> <li>▪ Identify the various standard sheets A0 –A4</li> </ul>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic board, flip charts, etc.</p>	<p>Layout of drawing sheets with the following</p> <p>(a) Margins</p> <p>(b) Title block etc</p> <p>Illustrate in drawing the various types of lines based on BS 308 1972 Part 2.</p> <p>Set drawing area on A1 paper with a title block and the boarder lines.</p> <p>Draw conventional signs and symbols</p>	<p>Carryout layout of drawing sheets</p> <p>Carryout drawing of various types of lines based on BS 308 1972</p> <p>Demonstrate drawing area on A1 paper with a title block and the boarder lines.</p> <p>Carryout drawing of conventional signs and</p>	<p>Black board ruler (1m)</p> <p>Black board Tee-Square</p> <p>Black board compass</p> <p>Blackboard protector</p> <p>Adjustable set-square</p> <p>60 set square</p> <p>45 set square</p> <p>French curve set</p> <p>Templates</p> <p>Complete drawing table</p>
---	--	--	--	---	--

					symbols.	
<b>General Objective 3: Know the construction of simple geometrical figures and shapes.</b>						
3 – 6	3.1 Explain the purpose of geometrical construction in wing.	<ul style="list-style-type: none"> <li>▪ Discuss the various types of information required for writing technical report.</li> <li>▪ Use questions and answer technique</li> <li>▪ Give examples</li> <li>▪ Give assignments</li> </ul>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	▪	▪	▪
<b>General Objective 4: Know Isometric and Oblique Projections.</b>						
7 - 10	<p>4.1 Mention main sources of data.</p> <p>4.2 Discuss techniques of data collection:</p> <ul style="list-style-type: none"> <li>• Laboratory.</li> <li>• Field survey/measurement.</li> <li>• Questionnaire.</li> <li>• Oral interviews.</li> </ul>	<ul style="list-style-type: none"> <li>▪ Guide student on techniques involved in sourcing data</li> <li>▪ Use questions and answer technique</li> <li>▪ Give examples</li> <li>▪ Give assignments</li> </ul>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic</p>	▪	▪	▪

			board, flip charts, etc.			
<b>General Objective 5: Know single orthographic projections.</b>						
11 - 12	<p>5.1 Explain how to present data in a manner suitable for writing technical report in the following form: Tables, Graphs, Charts, bars.</p> <p>5.2 Input information into computer.</p> <p>5.3 Print out results.</p>	<ul style="list-style-type: none"> <li>▪ Guide student on techniques involved in presenting information/ data</li> <li>▪ Use questions and answer technique</li> <li>▪ Give examples</li> <li>▪ Give assignments</li> </ul>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	▪	▪	▪
<b>General Objective 6: Understand the intersections of regular solids.</b>						
13 - 15	<p>6.1 Explain interpretation or intersections of solids.</p> <p>6.2 Draw the lines of intersections of the following regular solids and planes in both first and third angles.</p> <p>a. Two square-prisms meeting at right angles.</p> <p>b. Two dissimilar square prisms meeting at an angle.</p>	<p>Ask students to give examples of intersection of solids</p> <p>Ask students to construct:</p> <p>a. Two square-prisms meeting at right angles</p> <p>b. Two dissimilar square prisms merely</p>	<p>Recommended textbooks.</p> <p>Marker Board, dust, Marker, lecture notes, drawing sets</p>	▪	▪	▪

	<p>c. Two dissimilar square prisms meeting to an angle</p> <p>d. A hexagonal prism meeting a square prism at right angles.</p> <p>e. Two dissimilar cylinders meeting at an angle.</p> <p>f. Two dissimilar cylinders meeting at right angle, their centres not being in the same vertical plane.</p>	<p>at “</p> <p>c. Two dissimilar square prisms meeting 60</p> <p>d. An hexagonal prism meeting a square prism</p> <p>e. Two dissimilar cylinders meeting at an angle. Two dissimilar cylinders meeting at right angle, then centres at long in the same vertical place.</p> <p>g. As in 6.2</p>

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING</b>			
<b>COURSE TITLE: BASIC WORKSHOP TECHNOLOGY &amp; PRACTICE I</b>	<b>COURSE CODE: MEC 113</b>	<b>UNIT: 3</b>	<b>CONTACT HOURS: 3HOURS/WEEK</b>
			<b>THEORETICAL: 1HOUR/WEEK</b>
<b>SEMESTER: 1</b>	<b>PRE-REQUISITE : NONE</b>		<b>PRACTICAL:2HOURS/WEEK</b>

**Goal:** The course is designed to enable the student to understand the use of basic workshop tools and machines, and the hazards in a marine workshop environment.

**General Objectives:**

On completion of this module, the student/cadets should be able to:

1. Know safety precautions.
2. Understand to use and maintain various bench tools.
3. Understand the Use of simple measuring and testing equipment.
4. Understand drilling Operations
5. Understand reaming operations.
6. Understand Tapping Operations
7. Know various metals joining operation.
8. Know how to Cut and joint metal by gas welding.
9. Know various gas welding operations.
10. Know various metal arc welding operations

<b>COURSE TITLE: BASIC WORKSHOP TECHNOLOGY &amp; PRACTICE I</b>		<b>COURSE CODE: MEC 113</b>		<b>UNIT: 3</b>	<b>CONTACT HOURS: 3HRS/WEEKS</b>	
				<b>THEORETICAL: 1HOURS/ WEEK</b>		
<b>SEMESTER 1</b>		<b>PRE-REQUISITE : None</b>		<b>PRACTICAL: 2HOUR/ WEEK</b>		
<b>Goals:</b> The course is designed to enable the student to understand the use of basic workshop tools and machines, and the hazards in a marine workshop environment.						
<b>GENERAL OBJECTIVE 1.0: Know Safety precautions.</b>						
<b>THEORETICAL CONTENT</b>				<b>PRACTICAL CONTENT</b>		
<b>WEEK/S</b>	<b>SPECIFIC LEARNING OUTCOME</b>	<b>TEACHERS ACTIVITY</b>	<b>RESOURCE</b>	<b>SPECIFIC LEARNING OUTCOME</b>	<b>TEACHERS ACTIVITY</b>	<b>RESOURCE</b>
<b>1-3</b>	1.1 State safety precautions 1.2 Explain protective wears 1.3 List all safety rules and regulation.	Discuss safety precautions observed in the workshop.  List the protective wears in the workshop.  Discuss safety rules in the workshop	Recommended textbooks, Dusters, White and magnetic board, Projectors.	Demonstrate the safety precautions.  Operate safety equipment e.g. fire extinguishers,  Use of protective wears  Observe all safety rules and regulations	Discuss some unsafe acts and condition in the workshop  Demonstrate the safety protective wears and equipment.	Boiler suits, overalls, aprons safety goggles, safety boots/shoes, safety hand gloves, fire extinguishers, nose masks, ear muffs, hard hats, non-slip mats, safety posters, Water hose and Sand buckets
<b>General Objective 2.0: Understand to use and maintain various bench tools.</b>						
<b>4-5</b>	2.1 Explain bench work and fittings. 2.2 Describe the classification of fitting tools 2.3 Define Marking out 2.4 Explain the tools use for marking out 2.5 Differentiate between Hand and power tools	Explain bench work and fittings as used in the workshop.	Recommended textbook, Markers, White and magnetic board, Projectors Dusters,	Use marking-out tools on the bench correctly  Produce simple objects using bench/hand tools such as files, chisels, scrapers, saws etc.  Maintain files, dividers, saws, gauges try squares, bevel edge square etc.	Demonstrate the differences between Hand tools and power tools  List out marking out tools used on the bench typical workshop practical exercises.  Explain the use of this tools and their care	Work bench, Bench vice, Hammers, Set of drills, Steel rule, Scribers Scribing blocks, callipers, gauges, Surface plate Dividers, punches, Files, Chisels, Scrapers, Hack saw,
<b>General Objective 3.0: Understand the use of simple measuring and testing equipment.</b>						

6-7	<p>3.1 Explain the classification of measurement.</p> <p>3.2 Describe the tools used in 3.1</p> <p>3.3 Highlight the differences between measurement and dimensions.</p> <p>3.4 Know how to read the Vernier caliper and micrometer screw gauge.</p>	Describe the measuring equipment used in the workshop.	Recommended textbooks, Markers, Dusters, White and magnetic board, Projectors, videos, diagram pictures,	<p>Perform simple measuring exercises using steel rules, Vernier callipers and micrometers.</p> <p>Carry out exercises involving flatness squareness, straightness and surface finish test.</p> <p>Perform taper measurement on jobs using Vernier protractor and sine bars.</p> <p>Inspect jobs using simple comparators</p>	<p>Differentiate the differing between measuring and testing in the workshop.</p> <p>Demonstrate on the use of measuring instruments</p>	Micrometers - Vernier callipers, screw gauge, Steel rule
<b>General Objective: 4.0: Understand Drilling Operation.</b>						

8-9	<p>4.1 Describe drilling operations</p> <p>4.2 Discuss the nomenclature of a twist drill</p> <p>4.3 Explain the types of drilling machine.</p> <p>4.5 Mention all actives to be carried out using drilling machine.</p>	<p>Calculate the speeds of various sizes of drills using appropriate formulae <math>n = v \times 1000 / [p \times d]</math> <math>v =</math> cutting speed <math>d =</math> dia of drill in (mm) <math>n =</math> no. of revs/min.</p> <p>Explain indication of the nomenclature of a twist drill. clearance angle, rake angle, point angle etc.</p>	<p>Multimedia, White and magnetic board, Projectors, videos, diagram pictures, markers, recommended textbooks.</p>	<p>Demonstrate the Operation different types of drilling machine</p>	<p>Differentiate between drilling and boring operations</p> <p>Demonstrate indication of the nomenclature of a twist drill.</p> <p>a. clearance angle b. rake angle c. point angle etc.</p> <p>Calculate the speeds of various sizes of drills using appropriate formulae <math>n = v \times 1000 / [p \times d]</math> <math>v =</math> cutting speed <math>d =</math> dia of drill in (mm) <math>n =</math> no. of revs/min.</p>	<p>Radial drilling machine Bench drilling machine Pillar drilling machine</p>
<b>General Objective: 5.0: Understand Reaming Operations.</b>						
10	<p>5.1 Describe reaming operations</p> <p>5.2 Explain the steps necessary for reaming operations</p>	<p>Differentiate between drilling and reaming in the workshop.</p>	<p>Recommended textbook, White and magnetic board, Projectors, videos, diagram pictures, Chalkboard, recommended textbooks.</p>	<p>Carry out reaming operations:-</p> <p>i. on the bench ii. On drilling/lathe</p> <p>Select correct speeds for reaming small and large holes.</p>	<p>Demonstrate to the cadets/students to do reaming operation on a practical workshop exercise as figure</p> <p>Drill ream small; and large holes using correct speeds and feed and appropriate lubricants.</p>	<p>Hand reamers Machine reamers Tap wrench, Jacobs chuck and key Medium size Lathe</p>
<b>General Objective: 6.0: Understand Tapping Operation.</b>						

11	<p>6.1 Define tapping operations</p> <p>6.2 Describe the types and forms of tapping operations.</p>	<p>Differentiate between tapping, drilling and reaming in the workshop</p>	<p>White and magnetic board, Projectors, videos, diagram pictures, Chalkboard, recommended textbooks.</p>	<p>Select correct tapping drill size</p> <p>Select correct taps</p> <p>Carry out tapping operation (i) on the work bench (ii) on drilling (iii) on lathe machine</p>	<p>Demonstrate the purpose of tapping operation</p> <p>Calculate tapping drill size using appropriate formulae</p> <p>Demonstrate how taps are characterized a. pitch of the thread b. number of starts c. profile of the thread d. direction of the thread</p>	<p>Taps and wrenches _ Drill chuck and key _ Lathe machine - medium size _ Bench drilling machine _ Pillar drilling machine _ Cutting fluid or lubricants</p>
<b>General Objective: 7.0: Know Various Metals Joining Operation.</b>						
12-13	<p>7.1 Define metal joining</p> <p>7.2 Describe the types of metal joining</p> <p>7.3 State all the conditions necessary for metal joining.</p> <p>7.4 Explain how to correct taps</p> <p>7.5 Explain out soft soldering.</p>	<p>Discuss the various metal joining methods</p> <p>Distinguish between soldering and brazing</p> <p>Discuss the importance of using flux.</p> <p>Explain the various forms of metal joining</p> <p>Bolts and nuts, spanner, bending machine, hammer, cutting snips or hand shears.</p>	<p>Recommended textbooks, White and magnetic board,.</p>	<p>Fabricate metal container by Knock-up joining</p> <p>Join metals by the grooving technique</p> <p>Carry out soft soldering</p>	<p>Demonstrate to the students the various metal joining operations</p> <p>Fabricate metal container by Knock-up joining</p> <p>Join metals by grooving technique.</p> <p>Show the correct tapping drill size</p>	<p>Projectors, videos, diagram Pictures, Markers.</p>
<b>General Objective 8.0 Know Various gas Welding Operations.</b>						

14	8.1 Describe GAS welding operations 9.2 Explain the components of oxy-acetylene gas welding	List out all the component parts of an OXY-acetylene welding plant and identify them.	White and magnetic board, Projectors, videos, diagram pictures, Chalkboard, recommended textbooks.	Fabricate metal container by Knock-up joining  Join metals by the grooving technique  Carry out soft soldering	Demonstrate the various metal joining operations  Fabricate metal container by Knock-up joining  Join metals by grooving technique.	Blow lamps Soldering iron Soldering flux Safety welding goggles Oxygen gas cylinder Acetylene gas cylinder Regulators, clips, nozzles Hoses, flash gas lighter Welding nozzles Gas welding set Chipping hammer Wire brush Flame cutting blow pipe (nozzle) Gas welding set.
<b>General Objective: 9.0: Know Various Arc Welding Operations.</b>						
15	9.1 Describe arc welding 9.2 List the types welded joint 9.3 State the polarity of arc welding. 9.4 list metal arc welding equipment. 9.5 Explain the following: (i) metallic inert-gas arc-welding (ii) Carbon Arc- Welding (iii) Submerged Arc-Welding	Explain various welding techniques	Recommended textbooks, White and magnetic board, Chalkboard, recommended textbooks.	Regulate current and determine polarity for metal arc welding  Determine polarity and select current  Perform various arc-welding joints by down and up operation.  Select and prepare metal edges for various thickness and technique welding	Distinguish between down welding and up welding operation  Demonstrate the Performance of down and up welding operation  Prepare appropriate metal edges for various metal thickness	Electric arc welding Machine, Face shield, Welding table, Welding chipping, hammer, Wire brush, Hand gloves, Leather apron's, Hand grinder, Pedestal grinding machine

### Assessment:

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20

Total		100
-------	--	-----

<b>PROGRAMME: ND CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: BPH 111</b>	<b>UNIT: 2</b>	<b>TOTAL CONTACT HOURS: 5</b>
<b>COURSE TITLE: Mechanics and Properties of Matter and Heat Energy</b>			<b>THEORETICAL:2 Hours/Week</b>
<b>SEMESTER: 1</b>	<b>Pre-requisite: -</b>		<b>PRACTICAL:3 Hours/Week</b>
<b>GOAL:</b> This course is designed to develop the student's understanding and application of basic concepts in mechanics and properties of matter and heat energy.			
<b>GENERAL OBJECTIVES:</b> On completion of this course, the student should be able to:			
1.0 Understand the various fundamental and derived units. 2.0 Understand vectors and scalars and their applications. 3.0 Understand the basic concept of motion. 4.0 Understand the laws of motion 5.0 Understand the concept of work, energy and power. 6.0 Understand frictional forces and their effects. 7.0 Know the conditions for equilibrium of a stationary body under the action of coplanar forces. 8.0 Understand the principles of simple machines and their uses. 9.0 Understand circular motion. 10.0 Understand the behaviour of fluids at rest. 11.0 Understand the phenomenon of surface tension in liquids. 12.0 Understand the concept of elasticity 13.0 Understand the concept of viscosity 14.0 Understand the concept of temperature and its measurement 15.0 Understand the phenomenon of expansion and its effects. 16.0 Understand the concept of heat as a form of energy 17.0 Understand the three states of matter and change of state.			

- 18.0 Understand the behaviour of gases in terms of atomic or molecular motions.
- 19.0 Understand the modes of heat transfer

<b>PROGRAMME: ND CEMENT ENGINEERING TECHNOLOGY</b>		<b>COURSE CODE: BPH 111</b>		<b>UNIT: 5</b>		<b>TOTAL CONTACT HOURS: 5 HRS/WEEK</b>	
<b>COURSE TITLE: Mechanics and Properties of Matter and Heat Energy</b>						<b>THEORETICAL: 2 HOURS/WEEK 2HRS</b>	
<b>SEMESTER 1</b>				<b>PRE-REQUISITE:-</b>		<b>PRACTICAL: 3HOURS/WEEK</b>	
<b>GOAL:</b> This course is designed to develop the student's understanding and application of basic concepts in mechanics and properties of matter and heat energy.							
<b>GENERAL OBJECTIVE 1.0:</b> Understand the various fundamental and derived units							
<b>THEORETICAL CONTENTS</b>				<b>PRACTICAL CONTENTS</b>			
<b>WEEK/S</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	
	1.1 Identify the fundamental quantities e.g. mass, time, temperature and charge	Explain to the students activities 1.1-1.9	Instructional materials Flip charts Projectors Video Internet				
	1.2 List the S.I. units in which the fundamental quantities are measured	Prepare detailed lecture notes and relevant diagrams with video clips					
	1.3 State the dimensions of fundamental units.						
	1.4 Express derived quantities in terms of fundamental quantities.						
	1.5 Check physical laws e.g. $V = U + at$ ,						
	1.6 Identify dimensionless quantities.						
	1.7 Measure small distance using micrometer gauge and vernier calipers.						
	1.8 Measure volumes of liquids and irregular solids by displacement method using measuring cylinder.						
	1.9 Measure masses using beam and lever balances.						

1.0 GENERAL OBJECTIVE 2.0: Understand vectors and scalars and their application						
	2.1 Define vector and scalar quantities 2.2 List vector and scalar quantities. 2.3 Illustrate vector and scalar graphically including addition and subtraction. 2.4 Define unit vectors $i, j$ and $k$ 2.5 Represent vectors in terms of unit vectors $A = ix + jy$ 2.6 Define dot product of two vectors $A$ and $B$ 2.7 Define cross product of two vectors $A$ and $B$ 2.8 Express 2.6 and 2.7 above in terms of unit vectors. 2.9 Resolve a vector into rectangular components. 2.10 Define resultant force 2.11 State the law of parallelogram of forces.	Explain to the students activities 2.1-2.11  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
GENERAL OBJECTIVE 3.0: Understand the basic concept of motion						
	3.1 List various types of motion 3.2 Define speed, velocity and acceleration (instantaneous uniform average). 3.3 Distinguish between:- i. Distance and displacement	Explain to the students activities 3.1-3.3  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet	-	-	-

	ii. Speed velocity					
<b>4.0 GENERAL OBJECTIVE 4.0:</b> Understand the laws of motion						
	<p>4.1 State Newton's third law.</p> <p>4.2 State the law of conservation of linear momentum.</p> <p>4.3 Deduce the law of conservation of linear momentum the Newton's third law</p> <p>4.4 Distinguish between elastic and inelastic collision.</p> <p>4.5 Define coefficient of restitution</p> <p>4.6 Demonstrate the laws of motion using trolleys.</p> <p>4.7 Demonstrate the conservation of linear momentum the collision of two trolleys.</p> <p>4.8 Calculate the final momentum and velocities of in Elastic and Inelastic collisions.</p>	<p>Explain to the students activities 4.1-4.8</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>			
<b>GENERAL OBJECTIVE 5.0:</b> Understand the concept of work, energy and power						
	<p>5.1 Define work, (F.S), energy and power (F.V).</p> <p>5.2 State the units in which 5.1 above are measured</p> <p>5.3 Define the units in 5.2 above</p> <p>5.4 Relate work done to changes in kinetic Energy and potential Energy</p> <p>5.5 Calculate work done as area under force display graph</p> <p>5.6 Identify other forms of energy.</p> <p>5.7 State the law of conservation</p>	<p>Explain to the students activities 5.1-5.12</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>			

	<p>of energy.</p> <p>5.8 Explain conversion and conservation of all forms of energy</p> <p>5.9 Apply the law of conservation of energy of freely bodies and perfectly elastic collisions.</p> <p>5.10 List the power of machines and appliances.</p> <p>5.11 Derive an expression for the Kinetic energy of a body</p> <p>5.12 Explain what is meant by conservation of energy system of particles not acted upon by an external force</p>					
<b>GENERAL OBJECTIVE 6.0: Understand frictional forces and their effects</b>						
	<p>6.1 Explain the phenomenon of friction</p> <p>6.2 State the advantages and disadvantages of friction</p> <p>6.3 State the laws of friction.</p> <p>6.4 Distinguish between static and dynamic friction</p> <p>6.5 Define coefficient of static and dynamic friction bet two solid surfaces.</p> <p>6.6 Determine experimentally the coefficient of friction inclined plane and a scale pan</p> <p>6.7 State ways of reducing friction between solid surface relative motion</p> <p>6.8 List the applications in practical situations.</p> <p>6.9 Calculate the velocities of solid bodies moving in</p>	<p>Explain to the students activities 6.1-6.9</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>			

	horizontal and inclined planes where friction is not negligible.					
<b>GENERAL OBJECTIVE 7.0: Know the conditions for equilibrium of a stationary body under the action coplanar forces</b>						
	<p>7.1 Define moment of a force (tongue) about a point <math>r \times f</math>, and couple.</p> <p>7.2 Define center of gravity of a body.</p> <p>7.3 Explain the terms stable, unstable and neutral equilibrium.</p> <p>7.4 Calculate the center of gravity of composite bodies.</p> <p>7.5 Distinguish between stable, unstable and neutral equilibrium (with examples)</p> <p>7.6 State the conditions of static equilibrium</p> <p>7.7 State the principles of triangle of forces and Lami's theorem.</p> <p>7.8 Calculate the equilibrium position of that plate cut in the shape of square, circle, rectangle, etc. When the dimensions are given.</p> <p>7.9 Calculate the equilibrium position of compound bodies.</p> <p>7.10 State the conditions which are satisfied when a body remains in equilibrium under the action of three non parallel forces.</p> <p>7.11 Apply principles of equilibrium to a beam balance.</p> <p>7.12 Define sensitivity of a beam balance.</p> <p>7.13 Determine an unknown mass using pivoted meter rule.</p> <p>7.14 Determine the center of gravity of an irregular plate.</p>	<p>Explain to the students activities 7.1-7.15</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>			

	7.15 Verify experimentally the triangle law of forces					
<b>GENERAL OBJECTIVE 8.0: Understand the principles of simple machines and their uses</b>						
	8.1 Explain the concept of simple machines 8.2 List examples of simple machines. 8.3 Define effort, load, mechanical advantages, velocity ratio and the efficiency of a machine. 8.4 Relate the terms in 8.3 above to various types of machines. 8.5 Determine the force ratio, velocity ratio and efficiency of simple machines (by demonstration). 8.6 Calculate the mechanical advantage, velocity ratio and efficiency of machines.	Explain to the students activities 8.1-8.6  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 9.0: Understand circular motion</b>						
	9.1 Define the terms angular displacement angular acceleration, tangential velocity and radian. 9.2 Derive expressions for angular velocity and its acceleration 9.3 Differentiate between:- Linear displacement and angular displacement Linear velocity and angular velocity Linear acceleration and angular acceleration Radial acceleration and tangential acceleration 9.4 Define centripetal and centrifugal forces. 9.5 Explain how centrifuge works.	Explain to the students activities 9.1-9.11  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			

	<p>9.6 List examples of bodies performing circular motion.</p> <p>9.7 Calculate the distance travelled and velocities on horizontal and circular motion.</p> <p>9.8 Explain the reason for banking of roads.</p> <p>9.9 Solve numerical problems involving banked track</p> <p>9.10 Demonstrate circular motion in both horizontal and vertical circles using a stone tied to a string.</p> <p>9.11 Measure relative density using hydrometers.</p>					
<b>GENERAL OBJECTIVE 10.0: Understand the behaviour of fluids at rest</b>						
	<p>10.1 Define density and relative density of fluids.</p> <p>10.2 Derive an expression for the pressure exerted by a fluid</p> <p>10.3 Describe manometers and barometers (simple and U-tube barometers.)</p> <p>10.4 Measuring pressure using manometers and barometer</p> <p>10.5 State Pascal's law of transmission of pressure in fluids</p> <p>10.6 Describe the principle of hydraulic press.</p> <p>10.7 State Archimedes' principles.</p> <p>10.8 Verify experimentally the principle in 10.7 above</p> <p>10.9 State the law of floatation.</p> <p>10.10 Measure relative density of a liquid by applying principles mentioned in 10.7 above.</p> <p>10.11 Measure relative density using hydrometers.</p> <p>10.12 Calculate separately the</p>	<p>Explain to the students activities 10.1-10.14</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>			

	<p>following parameters for partially or wholly immersed bodies in a liquid by applying the law of floatation and Archimedes principles. The tension of the string Volume of body immersed Specific gravity of the body Relative density of the liquid 10.13 Measures the relative density of a liquid using a U-tube. 10.14 Construct and calibrate a simple hydrometer</p>					
<b>GENERAL OBJECTIVE 11.0: Understand the phenomenon of surface tension in liquids</b>						
	<p>11.1 Explain the phenomenon of surface tension. 11.2 Define and state unit of surface tension. 11.3 Explain surface tension in terms of molecular interactions. 11.4 Define angle of contact. 11.5 Explain capillarity qualitatively. 11.6 List various applications of surface tension and capillarity.  11.7 Explain the effect of temperature on surface tension</p>	<p>Explain to the students activities 11.1-11.7  Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials Flip charts Projectors Video Internet</p>			
<b>GENERAL OBJECTIVE 12.0: Understand the concept of elasticity</b>						
	<p>12.1 Explain elasticity 12.2 Define stress and strain 12.3 State Hooke's law 12.4 Verify Hooke's law experimentally. 12.5 Determine the elastic constant of a spring 12.6 Draw the load extension curve and indicate elastic limit. 12.7 Define Young's modules. 12.8 Derive the expression for</p>	<p>Explain to the students activities 12.1-12.8  Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials Flip charts Projectors Video Internet</p>			

	the energy stored in an elastic spring or string.					
<b>GENERAL OBJECTIVE 13.0: Understand the concept of viscosity</b>						
	13.1 Explain viscosity 13.2 Compare viscosity with solid friction. 13.3 Define the coefficient of viscosity. 13.4 Explain the motion of a ball bearing falling through a viscous fluid. 13.5 Define terminal velocity. 13.6 List applications of viscosity.	Explain to the students activities 13.1-13.6  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 14.0: Understand the concept of temperature and its measurement</b>						
	14.1 Define temperature using concept of thermal equilibrium 14.2 Define temperature in terms of thermometric p length of liquid column, pressure of a gas under pressure, resistance of a wire, e.m.f. of thermocouple from a hot body. 14.3 Define temperature scale (Celsius scale, Kelvin ideal gas scale). 14.4 Convert Celsius to Kelvin scale. 14.5 compare the ideal gas scales and other scales. 14.6 List the basic seven fixed points on the intermediate temperature scale 14.7 Identify the different types of thermometers:- Liquid in glass thermometers (choice of liquid) Resistance thermometer. Thermocouple. Pyrometers	Explain to the students activities 14.1-14.11  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			

	<p>Gas thermometer. Clinical thermometers. Minimum and maximum thermometers. 14.8 Describe the appropriate uses of thermometers. In above. 14.9 List the limitations of various types of thermometer 14.10 Construct and calibrate a liquid in glass thermometer resistance thermometer. 14.11 Convert temperature from Fahrenheit scale to Celsius thermodynamic scales and vice visa using the appropriate formulae.</p>					
<b>GENERAL OBJECTIVE 15.0: Understand the phenomenon of expansion and its effects</b>						
	<p>15.1 Explain the effect of heat on solids, liquids and gases 15.2 Define linear, superficial and cubical expansivities. 15.3 State the relationship between the expansivities. 15.4 Distinguish between real and apparent expansions. 15.5 Determine experimentally linear expansivity of a solid in the form of a rod. 15.6 Determine experimentally the cubical expansivity of liquid using a specific gravity bottle 15.7 Calculate the increase in volume, length and area expansion of solids using the formulae:- <math>L_1 = L_0 (1 + \alpha t)</math> <math>A_1 = A_0 (1 + \alpha t)</math> <math>V_1 = V_0 (1 + \alpha t)</math> where <math>L_1</math> <math>A_1</math> <math>V_1</math> are new length, area</p>	<p>Explain to the students activities 15.1-15.7  Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials Flip charts Projectors Video Internet</p>			

	and volume respectively $L_o$ , $A_o$ , $V_o$ are original length, Area and Volume respectively: $\alpha$ = linear of expansivity $\beta$ = cubical expansivity = superficial expansivity $t$ = temperature change.					
<b>GENERAL OBJECTIVE 16.0:</b> Understand the concept of heat as a form of energy						
	16.1 Define heat energy 16.2 Distinguish between heat energy and temperature 16.3 Define heat capacity and specific heat capacity. 16.4 Determine specific heat capacity of solids and liquids experimentally. 16.5 State Newton's laws of cooling. $\frac{dQ}{dt} = Ks (Q - \theta_r)$ where $S$ is the area of body's surface. $\theta_r$ is temperature of its surrounding. $Q$ denotes heat lost from the body. 16.6 Verify Newton's law of cooling experimentally 16.7 Explain cooling corrections in measurements of quantify of heat. 16.8 Apply these corrections (16.7 above) in heat experiments. 16.9 Determine the specific heat capacity of liquids using Newton's law of cooling. 16.10 Calculate the heat capacity of different solids and liquids from experimental results.	Explain to the students activities 16.1-16.10  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 17.0:</b> Understand the three states of matter and change of state.						
	17.1 Define melting point and boiling point	Explain to the students activities 17.1-17.10	Instructional materials Flip charts			

	<p>17.2 Determine experimentally melting point boiling points of various substances e.g. naphthalene.</p> <p>17.3 Explain the effect of: Pressure on boiling and freezing points. Impurities on boiling point and freezing point</p> <p>17.4 Explain latent heat of fusion and vaporization.</p> <p>17.5 Define specific latent heat of fusion of ice.</p> <p>17.6 Determine specific latent heat of fusion of ice.</p> <p>17.7 Determine specific latent heat of vaporization other liquids.</p> <p>17.8 Calculate the heat capacity, specific heat capacity, specific latent heat of fusion of solids given necessary</p> <p>17.9 Calculate the specific latent heat of vaporization given necessary parameters.</p> <p>17.10 Compare results from 17.7 and 17.9 above.</p>	<p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Projectors Video Internet</p>			
<b>GENERAL OBJECTIVE 18.0: Understand the behaviour of gases in terms of atomic or molecular motion</b>						
	<p>18.1 Define atom, molecule, Avogadro constant, relative molar mass, mole, molar mass, molar volume and</p> <p>18.2 Differentiate between:- Number of moles; number of molecules, Avogadro's constant. Number of moles; mass of the gas and molar mass</p> <p>18.3 State the assumptions of the kinetic theory of gas.</p> <p>18.4 Explain Brownian motion.</p> <p>18.5 Explain Maxwell distribution of velocity</p>	<p>Explain to the students activities 18.1-18.14</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials Flip charts Projectors Video Internet</p>			

	<p>18.6 Explain the most probable speed, the mean speed mean square speed.</p> <p>18.7 Derive the expression for the pressure exerted by gas. As <math>P = \frac{1}{3} \rho c^2</math> where <math>\rho</math> = density <math>c</math> = mean square velocity.</p> <p>18.8 Relate the kinetic energy of a gas to its temperature</p> <p>18.9 Derive the equation of state of an ideal gas using the kinetic theory.</p> <p>18.10 Deduce other gas laws from the equation of Boyle's law and Charles's law.</p> <p>18.11 Verify the gas laws experimentally.</p> <p>18.12 Distinguish between real and ideal gas.</p> <p>18.13 Deduce Van der Waal's equation of state of real gas</p> <p>18.14 Calculate the volume of gases.</p>					
<b>GENERAL OBJECTIVE 19.0: 0 Understand the modes of heat transfer</b>						
	<p>19.1 Explain the terms: Conduction, convection and radiation of heat energy</p> <p>19.2 Explain 19.1 above in terms of molecular theory.</p> <p>19.3 Define and give examples of good and bad conductors of heat energy.</p> <p>19.4 Demonstrate convection current in water.</p> <p>19.5 Demonstrate that black bodies are better</p>	<p>Explain to the students activities 19.1-19.6</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>			

	<p>absorbers of radiation energy than polished or shiny surfaces.</p> <p>19.6 List some applications of heat transfer e.g. thermos flaks green house land and sea breezes etc.</p>

<b>THEORETICAL CONTENTS</b>				<b>PRACTICAL CONTENTS</b>			
<b>WEEK/ S</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	
	<p>1.1 Explain the experimental basis of atomic theory using Bohr's theory of hydrogen atom and many electrons atoms.</p> <p>1.2 Describe atomic spectra particularly the H atom emission spectrum.</p> <p>1.3 Describe atomic spectra particularly the H atom hydrogen atom in the Bohr model.</p> <p>1.4 Relate these Energy States to the observed emission spectra.</p> <p>1.5 Explain the limitations of the Bohr model.</p> <p>1.6 Describe the wave-particle duality of electrons energy.</p> <p>1.7 State the different main energy levels of an atom, namely K, L, M...</p> <p>1.8 Correlate the energies of the electron in the K,L,M,N,...shells with the values of the principal quantum no n= 1,2,3,4,.....</p> <p>1.9 Relate the lines of the hydrogen emission</p>	<p>Explain to the students activities 1.1-1.21</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>	<p>View the visible emission spectra of several metals and some of their compounds</p> <p>Interpret the mass spectrum of representative elements such as Oxygen, Carbon, Chlorine etc.</p>	<p>Guide and supervise laboratory technicians and students</p>	<p>Direct vision spectroscope</p> <p>Bunsen burner, Nichrome</p> <p>Wire fixed to a cook handle,</p> <p>concHCl, solid chlorides of : barium, calcium, potassium, sodium and strontium beakers and watch glasses</p>	

	covalent bonds, bond length and bond energy, electronegativity and bond polarity. 1.21 Explain Van der Waal's forces					
<b>2.0 GENERAL OBJECTIVE 2.0</b> Understand the arrangement of elements in the periodic table						
	<p>2.1 Discuss the development of the periodic table.</p> <p>2.2 Describe building up periods I and II</p> <p>2.3 Describe building up period III</p> <p>2.4 Describe electron configurations within groups</p> <p>2.5 Describe the first d-orbital transition series; building up to period IV</p> <p>2.6 Discuss the non-metallic elements</p> <p>2.7 Discuss the Noble Gases</p> <p>2.8 Write down electronic configuration for the first twenty elements of the periodic table</p> <p>2.9 Relate electron configuration to the position in the periodic table</p> <p>2.10 Describe trends in the Periodic Table such as atomic size, ionisation energy, electron affinity, reactivity.</p>	<p>Explain to the students activities 2.1-2.11</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>	<p>Investigate the reactivity of group 2 metals (i) Mg, Ca, Sr and Ba with water. (ii) Mg and Ca with dilute HCl reactivity of transition metals- the copper envelope</p>	<p>Guide the students</p>	<p>Mg, Ca, Sr Ba, water, dilute hydrochloric acid test tubes etc</p> <p>Copper foil, tongs, Bunsen burner.</p>

	2.11 Describe diagonal relationships					
<b>GENERAL OBJECTIVE 3.0: Understand chemical thermodynamics</b>						
	3.1 Describe thermodynamic systems e.g. open system closed system, isolated system 3.2 Explain thermodynamic functions enthalpy entropy, free energy. 3.3 Explain the first and second laws of thermodynamics and their significance. 3.4 Explain thermo chemistry as heat effects that accompany chemical reactions	Explain to the students activities 3.1-3.4  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet	Measure heat of reaction by simple experiments e.g. heat of neutralization NaOH, HCl of a acid and strong base.	Guide students.	Chemicals calorimeter Glassware etc.
<b>GENERAL OBJECTIVE 4.0: Understand the properties and reactions of acids, bases and salts.</b>						
	4.1 Define an acid and a base according to Arrhenius, Bronsted - Lowry and Lewis concepts. 4.2 Identify acids and bases in chemistry equations. 4.3 Explain the meaning of the terms conjugates acid and conjugate base. 4.4 Distinguish between a strong and weak acid or base. 4.5 Write the expression for the dissociation constant for an acid HA (aq)	Explain to the students activities 4.1-4.24  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet	Carry out acid base titration by using conductance meter  Identify indicators and use indicators in acid base titration	Guide students.	Chemicals Conductance meters pH meters colour charts indicators burettes glassware

	<p>4.6 Give the equation for the degree of dissociation and concentration, <math>M</math>. (<math>\text{mole dm}^{-3}</math>) for a dilute solution of a weak acid.</p> <p>4.7 Explain Ostwald's Dilution law and dissociation constant, <math>K</math>.</p> <p>4.8 Calculate the degree of dissociation of a weak acid given the molarity and dissociation constant.</p> <p>4.9 State the value of the ionic product of water.</p> <p>4.10 Explain the concept of hydrogen ion concentration and pH.</p> <p>4.11 Calculate the pH value of an acid or base given the hydrogen ion concentration.</p> <p>4.12 Identify various .</p> <p>4.13 types of indicators and the use in the measurement of pH.</p> <p>4.14 Define the terms, <math>pK_a</math> and <math>pK_b</math></p> <p>4.15 State the Henderson Hasselbach equation .</p> <p>4.16 Use the Henderson Hasselback equation.</p>			<p>Measure the pH of solutions by using colour charts, indicators and pH meter</p> <p>Determine experimentally the strengths of acids and bases in relation to structure e.g. in the series <math>\text{CH}_3\text{COOH}</math>, <math>\text{HCl}</math>, <math>\text{NH}_4^+</math>, <math>\text{OH}^-</math>, <math>\text{NaOH}</math></p> <p>Measure <math>pK_a</math> of a weak acid via</p>	<p>Guide students</p>	<p>test tubes chemicals and burette for back titrations.</p>
--	---	--	--	--	-----------------------	--

	<p>4.17 Mention where the <math>pH =</math> of the acid, the acid is 50% that, for a weak acid in a solution ionised.</p> <p>4.18 Define the terms, buffer solution and buffer capacity.</p> <p>4.19 Explain the effectiveness of a buffer solution</p> <p>4.20 Describe buffers in Biochemistry and Medicine (e.g. blood, and biochemical experiments).</p> <p>4.21 Explain the hydrolysis of salts.</p> <p>4.22 Explain common ion effect.</p> <p>4.23 Explain the solubility product and its application in quantitative and volumetric analysis.</p> <p>4.24 Calculate the value of the solubility product given the solubility of sparingly soluble salt.</p>			<p>titration</p> <p>Titrate a weak acid by using a strong base. Plot the results and observe the region of buffering and the end point.</p> <p>Calculate the solubility product of silver acetate in water and solutions of varying concentrations of sodium nitrate</p>		
<b>GENERAL OBJECTIVE 5.0:</b> Understand the fundamental concept of oxidation and reduction reactions.						
	<p>5.1 Explain:</p> <ul style="list-style-type: none"> <li>- Oxidation reaction</li> <li>- Reduction reaction</li> </ul> <p>5.2 Explain the oxidation and reduction reactions in terms of electron transfer</p>	<p>Explain to the students activities 5.1-5.7</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>	<p>Carry out redox titration's by using potassium permanganate</p>	<p>Supervise students in the laboratory</p>	<p>Titration apparatus and chemicals</p>

	<p>5.3 List some oxidizing and reducing agents.</p> <p>5.4 State the periodicity of oxidation state of the elements</p> <p>5.5 State half ionic equation involving in oxidation reaction.</p> <p>5.6 State half ionic equation to illustrate reduction</p> <p>5.7 Balance simple redox equation's</p>					
<b>GENERAL OBJECTIVE 6.0: Understand surface phenomena and colloidal systems</b>						
	<p>6.1 Explain Surface Phenomena and Colloidal Systems.</p> <p>6.2 Explain the following surface phenomena (a) colloidal gels (b) surface tension © absorption, (d) emulsion (e) gels (f) flotation (g) chromatography</p> <p>6.3 Differentiate between adsorption and absorption</p> <p>6.4 Define Ion-Exchange</p> <p>6.5 Distinguish between cation and anion exchange processes.</p> <p>6.6 Describe the applications of ion-exchange</p>	<p>Explain to the students activities 6.1-6.6</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>	<p>Purify hard water using ion- exchange chromatography</p> <p>Chromatography of leaves</p>	<p>Guide students</p>	<p>Ion- exchange chromatography.</p> <p>finely cut leaves, chromatography paper, propanone, beaker, lid, glass rod or pencil</p>
<b>GENERAL OBJECTIVE 7.0: Understand chemical equilibrium</b>						
	<p>7.1 Explain chemical equilibrium</p> <p>7.2 State the factors affecting chemical equilibrium</p> <p>7.3 Explain reversible reaction in relation to chemical</p>	<p>Explain to the students activities 7.1-7.7</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips</p>	<p>Instructional materials</p> <p>Flip charts</p> <p>Projectors</p> <p>Video</p> <p>Internet</p>	<p>Investigation of the effect of concentration changes on chemical equilibria</p>	<p>Guide students</p>	<p>test tubes, gloves, potassium chromate, sulphuric acid,</p>

	7.4 Explain Le Chatelier's principle Define equilibrium constant 7.5 Define equilibrium constant 7.6 Explain the law of mass action 7.7 Calculate concentrations present in equilibrium mixture at given temperature starting from any given amounts of reactants and products.					NaOH, potassium or ammonium thiocyanate, iron III chloride ammonium chloride, glass rod, test pipettes
--	---	--	--	--	--	---

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: ND CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: ICT 101</b>	<b>UNIT: 3</b>	<b>TOTAL CONTACT HOURS: 3</b>
<b>COURSE TITLE: Introduction to Computing</b>			<b>THEORETICAL:1Hours/Week</b>
<b>SEMESTER: 1</b>	<b>Pre-requisite: -</b>		<b>PRACTICAL:2 Hours/Week</b>
<b>GOAL:</b> This course is designed to develop the student's understanding and application of general principle of Computing			
<p><b>GENERAL OBJECTIVES:</b> On completion of this course, the student should be able to:</p> <ol style="list-style-type: none"> <li>1.0 Understand the basic components of the computer and how it has evolved</li> <li>2.0 Know how data is stored and applications of various operating systems</li> <li>3.0 Understand the operation of Windows operating system and application packages</li> <li>4.0 Understand file Management and software package</li> </ol>			

<b>PROGRAMME: ND CEMENT ENGINEERING TECHNOLOGY</b>			<b>COURSE CODE:ICT 101</b>	<b>UNIT: 3</b>	<b>TOTAL CONTACT HOURS: 3 HRS/WEEK</b>	
<b>COURSE TITLE: Introduction to Computing</b>					<b>THEORETICAL:1 HOURS/WEEK</b>	
<b>SEMESTER 1</b>			<b>PRE-REQUISITE:-</b>		<b>PRACTICAL: 2HOURS/WEEK</b>	
<b>GOAL:</b> This course is designed to develop the student’s understanding and application of general principle of Computing						
<b>GENERAL OBJECTIVE 1.0:</b> Understand the basic components of the computer and how it has evolved						
<b>THEORETICAL CONTENTS</b>				<b>PRACTICAL CONTENTS</b>		
<b>WEEK/ S</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER’S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER’S ACTIVITIES</b>	<b>RESOURCES</b>
	1.1 Define what is meant by a computer 1.2 Explain briefly the history of computer development. 1.3 State the uses of computer and understand the impact of the PC on computer technology 1.4 Differentiate between hardware and software 1.5 Explain the input-processoutput algorithm with the following in mind: -Central processor -Input Mechanism -Output Mechanism	Relate the present idea of computer to other equipment and items that assess man to perform tasks faster  Trace the historical evolution of Computers  Assess the impact of computers to every day living  Conduct the students through the various parts of the computer and how data is managed by the various parts in the system	Maximum of 4 students to a Computer system Maximum of 4 computers to a printer except when a Network is in use Papers and computer accessories Magic Board Multimedia projector system			
<b>GENERAL OBJECTIVE 2.0</b> Know how data is stored and applications of various operating systems						
	2.1 Understand the application of the following: <ul style="list-style-type: none"> <li>• RAM</li> <li>• ROM</li> <li>• Fixed discs</li> <li>• Removable</li> <li>•</li> </ul> 2.2 Understand the concept of an operating system <ul style="list-style-type: none"> <li>i. PC-</li> </ul>	Explain the need for data storage  Dismantle a computer system and show the students the RAW card, the Hard disk and the processors Explain the concept of an operating system	Instructional materials Flip charts Projectors Video Internet			

	DOS/MS DOS ii. Windows iii. Linux iv. Unix					
<b>GENERAL OBJECTIVE 3.0: Understand the operation of Windows operating system and application packages</b>						
	3.1 Access computers correctly through Windows Operation system 3.2 Understand the steps for opening and closing windows 3.3 Understand the application of program Manager 4.4 know the uses and application of the various windows bars 3.5 Understand how to move from one window to another and how to operate them concurrently 3.5 Understand file management and how to manage files 3.6 Know the step in creating files and folders 3.7 Understand file manipulation(moving copying saving deleting etc) 3.8 Understand the use of Print Manager 3.9 Understand the concept of the following software package <ul style="list-style-type: none"> <li>• MS Office</li> <li>• Lotus Smart suite</li> <li>• MS Encarta</li> </ul>	Discuss the advantage of Windows Operating System  Explain the Windows Menu and tools. Each student must be given an opportunity to start a computer, open/close the window operating system, understand the program manager and move around in the windows environment  Explain the process of creating a file, manipulating the file and use of the print manager Assess the student  Load MS Office with the student and explain the various packages that make up MS office. Load MS Encarta and discuss its use with the student Assess the student	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 4.0: Understand file Management and software package</b>						
	4.1 Demonstrate ability in the use of a word processing packages such as MS Word or Word Perfect and covering the following:	Demonstrate the installation of MS Word	Instructional materials Flip charts Projectors Video Internet			

	<ul style="list-style-type: none"> <li>-Entering text</li> <li>-Formating text (emboldeni ng,, font size, italising, etc)</li> <li>- Creating and saving text files</li> <li>- Importing objects 9. Spelling and grammar checking</li> <li>- Creating and manipulating tables, text boxes equations</li> <li>- Printing and file export</li> </ul>	<p>Identify the different features of the software</p> <p>Ask students to type a short document and save it</p> <p>Ask students to edit a document and carry out a spell check</p> <p>Demonstrate the use of tables</p>				
--	--	---	--	--	--	--

Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

	<b>Programme: ND Cement Engineering Technology</b>	<b>Course Code: MPE 105</b>		<b>Contact Hours: 3</b>
	<b>Subject/Course: Introduction to Mining Technology</b>			<b>Theoretical: 1 hours/week</b>
	<b>Year: ND 1 Semester:1<sup>st</sup></b>	<b>Pre-requisite:</b>	<b>-</b>	<b>Practical: 2 hours/week</b>

## **General Objectives**

1. Understand technical terminology used in mining
2. Understand elementary principles of prospecting and exploration
3. Understand factors involved in exploitation *of* mineral deposits
4. Know the types of mining methods
5. Know basic principles *of* rock drilling in mining operations
6. Know rock drilling equipment and their application
7. Know the types of mining explosives and their accessories
8. Know methods *of* priming explosive cartridges
9. Understand the mining laws and regulations vis-a-vis handling explosives

	<b>Course: Introduction to Mining Technology</b>	<b>Course Code: MPE 105</b>		<b>Contact Hours: 3</b>		
				<b>Theoretical:1 hours/week</b>		
	<b>Year: ND 1 Semester: 1<sup>st</sup></b>	<b>Pre-requisite:</b>	-	<b>Practical:2 hours/week</b>		
	<b>Theoretical Content</b>			<b>Practical Content</b>		
<b>General Objective 1.0: Know technical terminology used in mining</b>						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
1	1.1 Define geological terminologies, such as ore, lode, ore-shoot, vein, Bedded deposits, massive deposits, placer, deposits, folds, faults, etc. 1.2 Define the following mining terminologies; mining, prospecting, exploration, development, exploitation prospecting lease, mining lease, hanging-and footwall, shaft, drift, level drift, winze, tunnel, stope back, adit, cross cut.	1. Develop instructional manual for teaching this course. 2. Explain geological and mining terminologies, 3. Sketch cross-sections and longitudinal sections of ore deposits and label them. 4. Illustrate diagrammatically a 3D view of a typical mine showing all the features therein	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.	Sketch cross-sections and longitudinal sections of ore deposits and label the relevant terms in 1.2 above	<ul style="list-style-type: none"> <li>Develop practical manual for laboratory/workshop exercises in this course.</li> <li>Prepare practical as indicated in the manual</li> </ul>	Practical Guide/Manual. Drawing paper, pencils, ink, eraser, drawing board
<b>General Objective 2.0: Know the elementary principles of prospecting and exploration</b>						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
2	2.1 Explain, (a) types of prospecting (b) methods of prospecting (c) types of sampling (d) methods of sampling	1. Describe prospecting and exploration methods 2. Identify the prospecting and exploration equipment	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.	<ul style="list-style-type: none"> <li>Using electronic media, appreciate the pre-mining, development and reclamation stages of mineral exploitation.</li> <li>Submit report on experiences above.</li> </ul>	Anchor the film/slide presentation of the development/exploitation stages in mine development	Practical Manual. Overhead Projector, Computer/Laptop System, Slide, Internet/YouTube, CD/DVD Documentaries.
<b>General Objective: 3.0 Know the factors involved in exploitation of mineral deposits</b>						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning</b>	<b>Teachers Activities</b>	<b>Resources</b>

				<b>Outcome:</b>		
3-4	<p>1.1 Explain the factors influencing the methods of development;</p> <p>(a) size (b) shape (c) dip and strike (d) grade of deposits determined by drilling (e) faults and folds (f) Water bearing strata, etc.</p> <p>1.2 Explain environmental and economic factors, e.g.</p> <p>(a) location of the deposit (b) infrastructural facilities (c) Politics (f) economics.</p>	<p>1. Enumerate the factors involved in exploitation of mineral deposits</p> <p>2. Discuss in details; technical, economic and other factors to be considered in the exploitation of mineral deposit.</p> <p>3. Evaluate the students</p>	<p>Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint, Projector, Screen, Magnetic Board, etc.</p>			
<b>General Objective:4.0 Know the types of mining methods</b>						
	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
5	<p>4.1 Classify mining methods in the following general terms</p> <p>(a) Surface mining (b) Underground mining (c) Open-cut (d) Opencast mining (e) Placer-mining</p> <p>4.2 Explain each method in 4.1 above</p> <p>4.3 State the mining methods applicable to:</p> <p>(a) Coal deposits in Enugu and Okaba (b) Tin deposits in Jos and Cornwall U.K. (c) Iron deposits in Itakpe and Kiruna Sweden (d) Pb/Zn in Obi and Alkali</p> <p>4.4 Differentiate between placer mining and other forms of surface mining.</p> <p>4.5 Differentiate between</p>	<p>1. Classify and explain mining methods</p> <p>2. Give an overview of all mining methods with emphasis to their selection in terms of technical as well as economic consideration, to be considered in applying a particular in favour of another, with examples from Nigerian mining industry</p> <p>3. Evaluate the students</p>	<p>Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.</p>	<p>Carryout field trip/excursion to quarries, mines, prospecting/exploration outfits etc.</p>	<p>Anchor field excursions.</p>	<p>Practical Manual. Journals. e-media, Internet etc.</p>

	underground methods of mining metalliferous and non-metalliferous deposits 4.6 List advantages and disadvantages of surface and underground workings in the following respects. (a) environmental (b) economic (c) safety, etc.					
<b>General Objective: 5.0 Know basic Rock drilling principles in mining operations</b>						
	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
6	5.1 Define drilling 5.2 Describe the mechanics of rock fragmentation 5.3 Explain the need for the removal of rock chippings by: (a) air flushing (b) water flushing.	1. Describe rock drilling principles in mining Evaluate the students	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			
<b>General Objective 6.0: Know Rock drilling equipment and their application</b>						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
7-8	6.1 Classify rock drilling equipment according to working principles (a) percussive (b) rotary (c) rotary-percussive drilling. 6.2 List different types of rock drilling equipment in use (a) open cast work, (b) underground coal mining, and (c) underground metalliferous mining.	1. List and explain rock drilling equipment and their application 2. Explain different types of drilling and where they are applied 3. Illustrate diagrammatically drilling equipment and 4. Evaluate the students	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.	Carry out practical on drilling operations.	<ul style="list-style-type: none"> <li>Explain safety precautions in drilling.</li> <li>Guide on the conduct of practicals.</li> </ul>	Variety of rock drilling machines.

	<p>6.3 State essential features of equipment listed in 6.2</p> <p>6.4 List and describe various types of drill-bits, ego chisel, cross and x-bits, button, retro and retrac, drag, rolling cutter, and cone bits.</p> <p>6.5 Demonstrate the use of drill-bits in 6.4 in rock drilling.</p>					
<b>General Objective 7.0: Know the types of mining explosives and their accessories</b>						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
9-10	<p>7.1 Explain the following properties of explosives; detonation velocity, detonation pressure, energy, strength, water resistance, sensitivity fume characteristics, flammability.</p> <p>7.2 Tabulate principal types of explosives in relation to their essential ingredients and application.</p> <p>(a) straight dynamite  (b) ammonia dynamite  (c) straight gelatin  (d) ammonia gelatin  (e) blasting gelatin  (f) granulated dynamite  (g) permissible explosive for coal mines  h) explosives not containing nitroglycerine  (i) Ammonium nitrate, nitro starch and chlorate classes.</p> <p>7.3 List and describe blasting accessories such as safety fuse, igniter <i>cord</i>, detonating cord, electric detonators, plain detonators, delay and relay.</p> <p>7.4 Identify the accessories in</p>	<ul style="list-style-type: none"> <li>• Explain the types of mining explosives and their accessories</li> <li>• Enumerate properties of explosives in tabular presentation</li> <li>• List types of explosives and their composition</li> <li>• Enumerate blasting accessories and their functions</li> <li>• Evaluate the students</li> </ul>	<p>Instructional Manual.  Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.</p>			

	7.3 above 7.5 State the uses of accessories in 7.3					
<b>General Objective 8.0 Know Methods of priming explosive cartridges</b>						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
11-12	8.1 Define the term priming 8.2 Explain safe method of priming with cap and fuse. 8.3 Explain with sketches, cap and fuse assembly 8.4 Identify the tools required for priming; (pricks, crimper). 8.5 Explain with sketches, the methods for priming explosive cartridge. 8.6 Demonstrate the methods with dummy caps and cartridges. 8.7 Explain recommended methods of firing explosives.	1. Define and explain methods of priming explosive cartridges 2. Demonstrate activities as in 8.2 to 8.4 3. Carry out as in 8.5 4. Asses the students	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			
<b>General Objective 9.0 :Understand mining laws and regulations as regard to handling of explosives</b>						
	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
13-14	9.1 Explain the mining laws regarding explosives handling, transportation and storage 9.2 State procedures of explosive transportation to the mine. 9.3 Explain the construction and features of explosive carriers. 9.4 Describe explosive handling care within the mine and quarry. 9.5 Explain the methods of disposal of damaged explo-	1. Cite relevant areas of Nigerian Mining and Minerals Act and regulations concerning explosives handling 2. Explain safety approaches to handling, care and application of explosives in mines and quarries 3. Assess the students	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			

	sives and blasting caps.

	<b>Programme: ND Cement Engineering Technology</b>	<b>Course Code: CET 111</b>		<b>Contact Hours: 2</b>
	<b>Subject/Course: Introduction to Cement Raw Materials and Processes.</b>			<b>Theoretical: 2hours/week</b>
	<b>Year: ND 1 Semester: 1<sup>st</sup></b>	<b>Pre-requisite:</b>	<b>-</b>	<b>Practical: 0hour/week</b>
<b>COURSE MAIN/GOAL:</b> The course is designed to enable students to acquire basic knowledge of cement and its raw materials, uses and effects on the environment.				

**General Objectives:** On completion of the course the student should:

- 1-0 Know the history and importance of cement
- 2-0 Know the types of cement, raw materials and its components
- 3-0 Understand the chemical composition and physical properties of portland cement
- 4-0 Know types of cement manufacturing processes.
- 5-0 Understand the manufacturing process of cement.
- 6-0 Understand the effects of cement production on the environment and pollution control.
- 7-0 Know diagrammatic flow of basic cement operations.

	<b>Course: Introduction to Cement Raw Materials and Processes.</b>		<b>Course Code: CET 111</b>		<b>Contact Hours: 3</b>		
	<b>Year: ND 1</b>	<b>Semester: 1<sup>st</sup></b>	<b>Pre-requisite:</b>	-	<b>Theoretical:1 hours/week</b>		
	<b>Theoretical Content</b>			<b>Practical Content</b>			
	<b>GOAL:</b> The course is designed to enable students to acquire basic knowledge of cement and its raw materials, uses and effects on the environment.						
	<b>General Objective 1.0:</b> Know the history and importance of cement						
<b>Week</b>	<b>Specific Learning Outcome:</b>		<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
1-2	1.1	Define cement	Explain to the students activities 1.1-1.6.	Instructional Manual, Video clips Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.	Demonstrate the mode of action of hydraulic and non-hydraulic cements.	Guide the students to carryout the practical exercise	Water, Sand , Cement, Coarse Aggregate and Cement.
	1.2	Differentiate between hydraulic and non-hydraulic cements.					
	1.3	Explain brief history of hydraulic and non-hydraulic cements.					
	1.4	Discuss ancient use of cements.					
	1.5	Discuss post-roman use of cements.					
	1.6	Explain the importance of cement in construction.					
	<b>General Objective 2.0:</b> Know the types of cement, raw materials and its components						
<b>Week</b>	<b>Specific Learning Outcome:</b>		<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>

3-5	<p>2.1 Explain types of cement using the standards available.</p> <p>2.2 Explain the following types of hydraulic binders;</p> <ul style="list-style-type: none"> <li>• Hydraulic lime</li> <li>• Natural cements</li> <li>• Portland cement</li> <li>• Portland-limestone cements</li> <li>• Blended cements</li> <li>• Pozzolan-lime cements</li> <li>• Masonry cements</li> <li>• Aluminous cements</li> <li>• Sulphate resistant cement</li> <li>• White Portland cement</li> <li>• Low heat cement.</li> <li>• Oil well cement etc.</li> </ul> <p>2.3 Explain the following typical cement raw materials:</p> <ul style="list-style-type: none"> <li>• Limestone, chalk, marble etc (CaCO<sub>3</sub>)</li> <li>• Sand, shale, clay etc (SiO<sub>2</sub>)</li> <li>• Clay, marl, shale etc (Al<sub>2</sub>O<sub>3</sub>)</li> <li>• Iron ore, mill scale, laterite etc (Fe<sub>2</sub>O<sub>3</sub>)</li> </ul> <p>2.4 Explain the following components of limestone:</p> <ul style="list-style-type: none"> <li>• Calcareous Component</li> <li>• Argillaceous Component.</li> </ul>	<p>Explain to the students activities 2.1-2.4.</p> <p>Explain to students using NIS 444-1:2018 types of cement.</p>	<p>Instructional Manual, Video clips Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, NIS 444-1:2018 ASTM-C150 etc.</p>	<ul style="list-style-type: none"> <li>• Identify the different types of hydraulic binders listed in 2.2</li> <li>• Identify the cement raw materials listed in 2.3</li> </ul>	<p>Guide the students to carry out the practical exercises.</p>	<p>Samples of various types of hydraulic binders</p> <p>Samples of Limestone, chalk, marble, Sand, shale, clay, marl, shale, Iron ore, mill scale, laterite etc.</p>
<b>General Objective: 3.0</b> Understand the Chemical Composition and Physical Properties of Portland Cement						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
6-8	3.1 Explain the physical properties of Cement:	Explain to the students activities 3.1-3.4	Instructional Manual, Video clips	Carry out simple tests to determine some of the physical properties of	Guide the students to carry out the practical exercise.	Samples of cement, water, Coarse

	<ul style="list-style-type: none"> <li>• Fineness</li> <li>• Soundness</li> <li>• Strength</li> <li>• Setting.</li> </ul> <p>3.2 State the chemical composition of cement: <math>(CaCO_3, SiO_2, Al_2O_3, CaSO_4 \cdot 2H_2O \text{ and } Fe_2O_3)</math></p> <p>3.3 Explain the chemical composition of clinker</p> <ul style="list-style-type: none"> <li>• Tricalcium silicate <math>(3CaO \cdot SiO_2)</math>, (50-70%) – Alite</li> <li>• Dicalcium silicate <math>(2CaO \cdot SiO_2)</math>, (15-30%) – Belite</li> <li>• Tricalcium aluminate <math>(3CaO \cdot Al_2O_3)</math>, (5-10%) - Aluminate</li> <li>• Tetra calcium aluminoferrite <math>(4CaO \cdot Al_2O_3 \cdot Fe_2O_3)</math>, (5-15%) – Ferrite.</li> </ul> <p>3.4 Explain the nomenclature for cement.</p>		Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.	cement.		Aggregate, vicat apparatus, glass wares, weighing balance, crushing machine,
<b>General Objective: 4.0</b> Know Types of cement production processes.						
	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
12	<p>4.1 Explain types of cement processes</p> <ul style="list-style-type: none"> <li>• Wet Process</li> <li>• Dry Process</li> <li>• Semi wet/dry process</li> </ul> <p>4.2 Differentiate among the three processes in 4.1</p> <p>4.3 State the merit and demerits of each in 4.1</p>	Explain to the students activities 4.1-4.3	Instructional Manual, Video clips Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.	<ul style="list-style-type: none"> <li>• Undertake a tour to the cement manufacturing plant</li> <li>• Write a report on the types of cement manufacturing processes</li> </ul>	<p>Organize an industrial visit to cement manufacturing visit</p> <p>Guide the students observe stages of cement manufacturing</p>	Cement manufacturing plant

<b>General Objective:5.0</b> Understand the manufacturing processes of cement.						
	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
9-11	5.1 List the four manufacturing processes of cement.  5.2 Explain cement manufacturing processes: <ul style="list-style-type: none"> <li>• Mixing of raw material               <ul style="list-style-type: none"> <li>i. Crushing</li> <li>ii. Stacking (Storage and homogenization)</li> <li>iii. Grinding and drying of raw materials</li> </ul> </li> <li>• Pyro- processing</li> <li>• Grinding of clinker</li> <li>• Storage and packaging</li> </ul> 5.3 Explain the use of the following equipment in cement manufacturing. <ul style="list-style-type: none"> <li>i. Crusher</li> <li>ii. Stackers</li> <li>iii. Grinding mills</li> <li>iv. Cyclone preheater</li> <li>v. Rotary Kilns</li> <li>vi. Coolers</li> <li>vii. Dedusting equipment</li> <li>viii. Conveyors</li> <li>ix. Packers etc.</li> </ul>	Explain activities 5.1-5.3 to the students.  Explain the following pyro processing stages; <ul style="list-style-type: none"> <li>• Pre heating</li> <li>• Decarbonisation,</li> <li>• Sintering,</li> <li>• Cooling</li> </ul>	Instructional Manual, Video clips Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.	<ul style="list-style-type: none"> <li>• Undertake a tour to the cement manufacturing plant with a view to identifying all the cement manufacturing processes.</li> <li>• Write a report on the stages of cement manufacturing</li> </ul>	Organize an industrial visit to cement manufacturing  Guide the students observe stages of cement manufacturing	Cement manufacturing plant
<b>General Objective 6.0:</b> Understand the effects of cement production to the environment and pollution control.						
Week	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
13-15	6.1 List environmental effects of cement	Explain to the students activities 6.1-6.4	Instructional Manual, Video clips	<ul style="list-style-type: none"> <li>• Carry out thermal decomposition of limestone</li> </ul>	Guide students to carry out the experiments	

	<p>manufacturing.</p> <p>6.2 Explain the following pollutants from cement factories:</p> <ul style="list-style-type: none"> <li>• Particulates (dust)</li> <li>• Gaseous pollutants <ul style="list-style-type: none"> <li>i. Carbon monoxide</li> <li>ii. Sulfur Oxide</li> <li>iii. Nitrogen Oxide</li> <li>iv. Dioxin.</li> <li>v. Carbon dioxide.</li> </ul> </li> </ul> <p>6.3 Explain the adverse effect of each of the pollutants in 6.2</p> <p>6.4 Explain the following pollution control measures in cement production :</p> <ul style="list-style-type: none"> <li>• Use of electrostatic precipitator (ESP).</li> <li>• Battery cyclone.</li> <li>• Use of bag filters (Bag house).</li> <li>• Operations control.</li> <li>• Gas analysers</li> </ul>		<p>Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.</p>	<ul style="list-style-type: none"> <li>• Carryout combustion of each of the following fuels, gas, coal and LPFO.</li> <li>• Observe the deposition of particulate of cement dust on the environment.</li> </ul>	<p>Organize an industrial visit to cement manufacturing environment.</p>	
<b>General Objective 7.0:</b> Know diagrammatic flow of basic cement operations.						
Week	Specific Learning Outcome:	Teachers Activities	Resources	Specific Learning Outcome:	Teachers Activities	Resources
	<p>2.1 Explain basic stages in cement operations.</p> <p>2.2 Describe basic symbols of equipment and operations in the cement industry.</p> <p>2.3 Explain open and close circuits.</p> <p>2.4 Illustrate diagrammatically the flow of basic cement operations in 7.1.</p>	<p>Explain activities 7.1 – 7.4 to the students.</p>	<p>Instructional Manual, Operation flow charts of a cement industry, Video clips Recommended textbooks, e-Books, lecture notes, Marker</p>			

			Board, PowerPoint Projector, Screen, etc.

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) practical to be assessed by the teacher	20
Total		100

# SEMESTER TWO ND 1

<b>PROGRAMME:</b> GENERAL STUDIES	<b>COURSE CODE:</b> GNS 102	<b>CREDIT HOURS:</b> 2
<b>COURSE:</b> Communication in English 1	<b>PRE-REQUISITE:</b> 101	<b>THEORETICAL: HOURS/WEEK</b> 30Hours
<b>ND I Semester 2</b>		

**COURSE MAIN AIM/GOAL:** This course is designed to enable students acquire the necessary communication skills, know the techniques of correspondence and comprehend written materials.

**GENERAL OBJECTIVES: On completion of this course, the student should:**

- 1.0 Understand the concept of communication.
- 2.0 Know how to make oral presentations.
- 3.0 Know the essential elements of correspondence.
- 4.0 Apply the rules of comprehension and interpretation

<b>COURSE:</b> Communication in English I				<b>CH/CU HOURS:</b> 2		
<b>GOAL:</b> This course is designed to enable students acquire the necessary communication skills, know the techniques of correspondence and comprehend written materials.						
<b>GENERAL OBJECTIVES:</b> 1.0: Understand the concept of communication						
<b>COURSE SPECIFICATION:</b> THEORETICAL CONTENT						
<b>THEORETICAL CONTENT</b>			<b>PRACTICAL CONTENT</b>			
<b>WEEK</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCE</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>EVALUATION</b>
	<p><b>Communication:</b></p> <p>1.1 Define communication.</p> <p>1.2 Analyse the process of communication.</p> <p>1.3 Enumerate the purposes of communication.</p> <p>1.4 Explain the relationship between communication and language.</p> <p>1.5 Explain the impact of interference on communication at various levels, e.g., phonological, syntactic etc.</p> <p>1.6 Define code-mixing, code-switching and dissonance in communication.</p>	<p>Explain Communication.</p> <p>Describe the process of communication.</p> <p>Enumerates the purposes of communication.</p> <p>Explain the relationship between communication of language.</p> <p>Discuss the impact of interference on communication at various levels e.g. phonological syntactic etc.</p> <p>Explain code mixing, code switching and dissonance in communication.</p>	<p>Textbooks Projects DVD/CD Players Marker Board &amp; Marker Internet</p>	<p>Define Communication</p> <p>Analyse the process of communication.</p> <p>Mention the purposes of communication.</p> <p>Identify the relationship between communication and language.</p> <p>Highlight the impact of interference on communication at various levels.</p> <p>Discuss with relevant examples code, mixing, code switching and dissonance in communication</p>	<p>Guide, supervise and correct students' activities.</p>	<p>Class work, Assignments and Test</p>
<b>GENERAL OBJECTIVES:</b> 2.0: Know how to make oral presentations.						
	<p><b>Oral Presentations:</b></p> <p>2.1 Label a diagram of the organs of speech.</p>	<p>Draw and label a diagram</p>	<p>Charts, pictures, DVD/CD</p>	<p>Draw and label the organs of</p>	<p>Guide, supervise and</p>	<p>Class work</p>

	<p>2.2 Describe the functions of the organs in 2.1 above in speech production.</p> <p>2.3 Identify the phonemes of English.</p> <p>2.4 Pronounce correctly by making distinctions between the different sound contrasts in the consonantal and vowel systems of English.</p> <p>2.5 Explain the principles of effective speaking, viz, correct use of stress, rhythm, and intonation patterns.</p>	<p>of the organs of speech.</p> <p>Explain the functions of the organs of speech in speech production.</p> <p>Explain the phonemes of English.</p> <p>Pronounce and differentiate between the different consonant and vowels sounds.</p> <p>Enumerate the principles of effective speaking by exposing students to the correct use of stress, rhythm and intonation patterns.</p>	<p>player textbooks, Marker Board marker, projector, CD/DVD Internet</p>	<p>speech .</p> <p>Explain the functions of the organs of speech.</p> <p>Pronounce correctly all the phonemes of English.</p> <p>Pronounce and make distinctions between the different consonant and vowels sounds of English.</p> <ul style="list-style-type: none"> <li>➤ State the principles of effective speaking.</li> <li>➤ Read fluently.</li> <li>➤ Make short speeches.</li> </ul>	<p>correct students' activities.</p>	<p>Assignments and Test.</p>
--	--	---	--	--	--------------------------------------	------------------------------

**GENERAL OBJECTIVES:** 3.0: Know the essential elements of correspondence

	<p><b>Correspondence:</b></p> <p>1.1 List the various types of correspondence e.g. letter (informal, semiformal &amp; formal) memo, circular etc</p> <p>1.2 Differentiate between informal, semi-formal, formal, semi-formal and</p>	<p>Explain the various types of correspondence, letters, memo, circular, notices.</p> <p>Explain informal, semi-</p>	<p>Textbooks Projects DVD/CD Players Marker Board&amp;Marker Internet Samples of letters, memo, circulars etc.</p>	<p>Write letters, memos, circulars, notices etc.</p>	<p>Guide, supervise and correct students' activities.</p>	<p>Class work Assignments and Test</p>
--	--	--	--	--	---	--

	formal letters.	formal and formal letter.		Write informal semi-formal and formal letters.		
1.3	Explain the various parts of a letter.	Explain the various parts of a letter: writer's address, date, recipient's address, salutation, subject, body, complimentary close, signature, full name of writer, designation (recently, phone number, email).		Write letters paying attention to the various parts of the formal letter.		
1.4	Explain the style suitable for formal and informal letters.	Discuss the style suitable for formal and informal letters.		Write formal and informal letters paying attention to style.		

**GENERAL OBJECTIVES:** 4.0: Apply the rules of comprehension and interpretation

4.1	Identify main ideas in a given passage.	Explain main ideas from given passages.	Textbooks, CD/DVD Players, Projectors, Marker Board, Internet.	<ul style="list-style-type: none"> <li>➤ Identify main ideas from given passages.</li> <li>➤ Differentiate the main idea from the details in a given passage.</li> <li>➤ Use main idea to anticipate specific details in a given passage.</li> <li>➤ Identify relationship patterns of ideas in a given passage.</li> </ul> <p>Draw conclusions from given passages.</p>	Guide, correct and assess students' work.	Class work Assignments and Test
-----	---	---	--	--	---	---------------------------------

	4.2 Draw conclusions from available information.	Explain how students can draw conclusions from available information.				
--	--	---	--	--	--	--

<b>Department/Programme: ND Cement Engineering Technology</b>	<b>Course Code: STA 111</b>	<b>Contact Hours: 2 – 0 - 0</b>
<b>Subject/Course: Introduction to Statistics</b>		<b>Theory: 2 hours/week</b>
<b>Year: ND I Semester: 2<sup>nd</sup></b>	<b>Pre-requisite: -</b>	<b>Practical: 0 hours/week</b>

**General Objectives:**

1. Understand statistics and all that it stands for.
2. Understand the different methods of data collection and their limitations.
3. Know the different forms of data presentation
4. Understand the use and the importance of some measures of central tendency in summarizing data.
5. Understand the use and importance of measures of dispersion in summarizing data
6. Know the different types of random variables
7. Understand the basic principles of probability
8. Understand some basic probability distributions and how to identify each distribution
9. Understand the principles of correlation of two variables and the regression of one variable on another.

**PROGRAMME: National Diploma In Cement Engineering Technology**

COURSE: Introduction to Statistics		COURSE CODE: STA 111		CONTACT HOURS: 2 – 0 - 0		
Course Specification: Theoretical Contents						
WEEK	Special Learning Outcomes	Teachers Activities	Resources	Special Learning Outcomes	Teachers Activities	Resources
<b>General objectives 1.0: Understand statistics and all that it stands for.</b>						
1	1.1 Define statistics 1.2 Explain with approximate illustrations, the use of statistics in Government, Biological Sciences, Physical Science. Business and Economics.	Lecture  Give students assignments	Instructional Manual.  Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.	▪	▪	▪
<b>General Objective 2.0: Understand the different methods of data collection and their limitations.</b>						
2-3	2.1 State the method of collecting data 2.2 Describe the two main methods of collecting primary data: a) Established published sources b) "Ad-hoc" basic or experimentation 2.3 State the merits and demerits of the methods of collecting primary data 2.4 Explain the concept of data "editing" and its application in editing primary and secondary data. 2.5 Describe the sources of error in data collection	Illustrate with good examples activities in 2.1 to 2.5.  <input type="checkbox"/> Assess the student	Instructional Manual.  Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.	▪	▪	▪

<b>General Objectives 3.0: Know the different forms of data presentation</b>						
4-5	<p>3.1 Explain the objectives of classification of a mass of raw data</p> <p>3.2 Prepare a frequency distribution from a given data</p> <p>3.3 Explain the usefulness of diagrams in presenting statistical data</p> <p>3.4 Construct bar chart, pie chart, histogram, frequency polygon and cumulative frequency polygon for a given set of data</p> <p>3.5 Outline the merits and demerits of each diagram in 3.4 above.</p>	<p>Lecture</p> <p>Give sample charts</p> <p>Give students assignments</p>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	▪	▪	▪
<b>General Objective 4.0 Understand the use and the importance of some measures of central tendency in summarizing data.</b>						
6-7	<p>4.1 Define Arithmetic mean, Geometric Mean, Median, Mode and harmonic Mode and harmonic mean</p> <p>4.2 Compute the measurer in 4.1 above given:</p> <p style="padding-left: 20px;">i. ungrouped</p> <p style="padding-left: 20px;">ii. grouped data</p> <p>4.3 Explain the uses of Geometric means</p> <p>4.4 Calculate:</p> <p>Quantiles</p> <p>Deciles</p> <p>Percentiles given a set of data</p>	<p>Illustrate with good examples activities in 4.1 to 4.4.</p> <p>□ Assess the student</p>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	▪	▪	▪

	List the merits and demerits of all the above measured of central tendency.					
<b>General Objective 5.0: Understand the use and importance of measures of dispersion in summarizing data</b>						
8	<p>5.1 State the importance of measures of dispersion</p> <p>5.2 Defined and calculate the: mean deviation, Semi interquartile range Variance and standard deviation</p> <p>5.3 Describe the application of the measures of dispersion defined in 5.2 above.</p> <p>5.4 Calculate these standard error of the sample mean for given data</p>	<p>Illustrate with good examples activities in 5.1 to 5.4.</p> <p><input type="checkbox"/> Assess the student</p>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	▪	▪	▪
<b>General Objective: 6.0 Know the different types of random variables</b>						
9	<p>6.1 Define a random variable</p> <p>6.2 Explain the concept of randomness</p> <p>6.3 Define discrete and continuous variables</p> <p>6.4 State examples of discrete and continuous variables</p>	<p>Illustrate with good examples activities in 6.1 to 6.4.</p> <p><input type="checkbox"/> Assess the student</p>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	▪	▪	▪
<b>General Objective 7.0: Understand the basic principles of probability</b>						

10	<p>7.1 Define probability</p> <p>7.2 Explain probability using the relative frequency approach</p> <p>7.3 State the laws of probability</p> <p>7.4 Solve simple problems by applying the laws of probability</p> <p>7.5 Define conditional probability for two events.</p>	<p>Illustrate with good examples activities in 7.1 to 7.5.</p> <p><input type="checkbox"/> Assess the student</p>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	▪	▪	▪
<b>General Objectives 8.0: Understand some basic probability distributions and be label to identify each distribution</b>						
11-13	<p>8.1 State the probability distribution of a random variable</p> <p>8.2 Define mathematical expectation of discrete and continuous random variable</p> <p>8.3 Define expectations of functions of discrete random variable</p> <p>8.4 Define the binomial distribution</p> <p>8.5 Define conditional probability for two events</p> <p>8.6 Calculate the means and variance under the Binomial and the poison distributions</p> <p>8.7 Define Normal distribution</p> <p>8.8 Approximate probabilities for given continuous random variables using normal distribution</p> <p>8.9 Explain the characteristics of Binomial</p>	<p>Illustrate with good examples activities in 8.1 to 8.16.</p> <p><input type="checkbox"/> Assess the student</p>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	▪	▪	▪

	<p>distribution</p> <p>8.10 Apply Binomial distribution of samples with replacement</p> <p>8.11 Solve given problems applying binomial distribution</p> <p>8.12 Describe normal distribution curve and the empirical distribution rule</p> <p>8.13 Explain the characteristics of Normal distribution. Calculate the probability given the deviation from the mean</p> <p>8.14 Calculate the deviation given the means, standard deviation and a particular observation</p> <p>8.15 Calculate the area under the curve at different point from either side of the mean.</p> <p>8.16 Apply Normal distribution curve to simple problems</p>					
<b>General Objectives 9.0: Understand the principles of correlation of two variables and the regression of one variable on another.</b>						
14 - 15	<p>9.1 Define correlation</p> <p>9.2 State the types of correlation</p> <p>9.3 Describe the methods of studying correlation</p> <p>i. Scatter diagram (graphic method)</p> <p>ii. Karl Pearson's coefficient of correlation</p> <p>iii. Spearman's rank correlation</p>	<p>Lecture</p> <p>Give sample Charts</p> <p>Give students assignments</p>	<p>Instructional Manual.</p> <p>Recommended textbooks, e-books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, flip charts, etc.</p>	▪	▪	▪

	9.4 Calculate Pearson's and Spearman's correlation coefficients					
	9.5 Define regression equation of the form $Y=a+bx$ using free-hand method and method of least squares.					

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

	<b>Programme: ND Cement Engineering Technology</b>	<b>Course Code: ICT 201</b>		<b>Contact Hours: 3</b>
	<b>Subject/Course: Computer Aided Design and Drafting</b>			<b>Theoretical: 1 hours/week</b>
	<b>Year: ND I Semester: 2<sup>nd</sup></b>	<b>Pre-requisite:-</b>	<b>-</b>	<b>Practical:2 hours/week</b>

### **General Objectives**

- 1.0: Understand the use of Computer in the Design and Drafting Process
- 2.0: Understand how to construct simple geometric shapes
- 3.0: Understand the different edit boxes
- 4.0: Understand how to use edit commands
- 5.0: Understand how to create layers
- 6.0; Understand how to create linear and aligned dimensions

	<b>Course: Computer Aided Design and Drafting</b>	<b>Course Code: ICT 201</b>		<b>Contact Hours :3HRS/WEEK</b>
				<b>Theoretical: 1 hr/wk</b>
	<b>Year: ND 1</b>	<b>Semester:2<sup>nd</sup></b>	<b>Pre-requisite:-</b>	<b>Practical:2hrs/wk</b>
	<b>THEORITICAL CONTENT</b>		<b>PRACTICAL CONTENT</b>	
<b>Week</b>	<b>General Objective 1.0: Understand the use of Computer in the Design and Drafting Process</b>			
	<b>Specific Learning Outcome:</b>	<b>Teacher Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>
1-4	<p>1.1 Know the advantages and disadvantages of computer in the design process</p> <p>1.2 Explain the links between CAD and CAM</p> <p>1.3 Understand the Principles of Operation capabilities and system requirements of Auto CADD</p> <p>1.4 Install the Auto CADD software correctly.</p> <p>1.5 Identify the main parts of the screen of Auto CAD 14 or Later versions</p> <p>1.6 Explain the functions of the above</p> <p>1.7 Explain the different input methods: Keyboards, mouse, digitizers, and scanners.</p> <p>1.8 Discuss the different coordinate systems</p> <p>1.9 Demonstrate the use of the HELP Menu in solving problems when using the Package</p>	<p>Explain advantages and disadvantages of computer in the design process.</p> <p>Explain the links between CAD and CAM</p> <p>Identify the main parts of the screen of Auto CAD 14</p> <p>Explain the function of the above.</p> <p>Explain and use the different input methods</p> <p>Explain differences between Cartesian and polar coordinates systems</p> <p>Demonstrate the above options on the computer screen</p> <p>Construct lines at set lengths and angles using above coordinate systems.</p> <p>Use snap points to construct lines.</p> <p>Explain the use of snap points and ortho - commands</p>	<p>Complete computer sets</p> <p>1 Computerto 2 Students</p> <p>1 Large Format Printer or</p> <p>Plotters in a Network</p> <p>1 Digitizer to 2 Students</p>	

	<p>1.10 Use the OSNAP facility to select options</p> <p>1.11 Use layer control to change the layers in a drawing</p> <p>1.12 Use Cartesian and Polar coordinates to draw lines</p> <p>1.13 Prepare and change the size of the drawing field</p> <p>1.14 Know how to save drawings on demand and also how to set up the auto-save feature</p>					
<b>General Objective 2.0:</b> Understand how to construct simple geometric shapes						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
5-7	<p>2.1 Know how to hatch the shapes drawn and change the hatch pattern and scale</p> <p>2.2 Explain how to draw circles, ellipses and arcs to given dimensions</p> <p>2.3 Explain how to construct polygons and squares to given dimensions</p> <p>2.4 Produce a simple drawing - Drawing 1</p>	<p>Hatch the shapes drawn</p> <p>Change the hatch pattern and scale.</p> <p>Draw circles, ellipses and arcs to given dimensions.</p> <p>Construct polygons and squares to given dimensions.</p>	<p>Complete computer sets</p> <p>1 Computer to 2 Students</p> <p>1 Large Format Printer or</p> <p>Plotters in a Network</p> <p>1 Digitizer to 2 Students</p>			
<b>General Objective 3.0:</b> Understand the different edit boxes						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
8-9	3.1 Explain the different edit boxes,	Explain the different edit boxes. Ask students to use them.	Sets of personal computers, Recommended			

	<p>how to use them and their attributes</p> <p>3.2 Explain how to select the shapes using edit boxes.</p> <p>3.3 Use array command to draw both polar and rectangular arrays</p> <p>3.4 Explain how to use the offset command</p>	<p>Explain their attributes.</p> <p>Draw both polar and rectangular arrays using array command</p> <p>Draw using the offset command.</p>	<p>textbooks, Manuals, etc.</p>			
<b>General Objective 4.0:</b> Understand how to use edit commands						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
10-11	<p>4.1 Explain how to use edit commands</p> <p>4.2 Demonstrate how to move objects accurately using both snap commands and coordinates</p> <p>4.3 Demonstrate how to copy objects from one position to another accurately using snap and coordinate entry.</p> <p>4.4 Demonstrate how to erase objects</p> <p>4.5 Demonstrate how to trim objects</p> <p>4.6 Demonstrate how to fillet and chamfer angles</p>	<p>Copy objects from one position to another accurately using snap and coordinate entry.</p> <p>Erase objects.</p> <p>Trim objects</p> <p>Fillet and chamfer angles</p>	<p>Sets of personal computers, Recommended textbooks, Manuals, etc.</p>			
<b>General Objective 5.0:</b> Understand how to create layers						
12	<p>5.1 Demonstrate how to create layers.</p> <p>5.2 Demonstrate how to change colour of layers</p>	<p>Create layers • Ask students to change colour of layers</p> <p>Change the line type of a layer</p>	<p>Sets of personal computers, Recommended textbooks, Manuals, etc.</p>			

	<p>5.3 Demonstrate how to change the line types of a layer.</p> <p>5.4 Demonstrate how to move objects from one layer to another</p> <p>5.5 Demonstrate how to switch layers on and off</p> <p>5.6 Understand the use of layers and how they help in the construction and understanding of a draw</p>	<p>Move objects from one layer to another</p> <p>Switch layers on and off</p> <p>Use layers to construct drawings.</p>				
<b>General Objective 60:</b> Understand how to create linear and aligned dimensions						
12	<p>6.1 Explain how to create linear and aligned dimensions</p> <p>6.2 Understand how to create angular dimensions</p> <p>6.3 Demonstrate how to add to tolerances to dimensions</p> <p>6.4 Demonstrate how to create leader lines.</p> <p>6.5 Demonstrate how to add single line and multiple line texts to drawings</p> <p>6.6 Demonstrate how to edit dimensions and text</p>	<p>Create linear and aligned dimensions.</p> <p>Create angular dimensions</p> <p>Add tolerances to dimensions</p> <p>Create leader lines.</p> <p>Add single line and multiple line text to drawings.</p> <p>Edit dimensions and text.</p>	<p>Sets of personal computers, Recommended textbooks, Manuals, etc.</p>	<p>Create the title block for a drawing Write letters and numbers on drawings</p> <p>Draw circles be able to erase parts of lines or circles</p> <p>Produce a simple drawing with correct details in terms of title block etc</p> <p>Select parts of a drawing in order to do further work. Move, Copy and Rotate drawing parts.</p> <p>Produce a full drawing with title blocks from a real engineered object. Show all the views.</p> <p>Produce a fully dimensioned drawing of a component appropriate to the engineering</p>	<p>Ask each student to carry out his/her own drawing</p> <p>Let each student carry out his/her own drawings.</p> <p>Ask each student to carry out his/her own drawing</p> <p>Ask each student to carry out a drawing that is specific to his/her department.</p>	<p>Sets of personal computers,</p>

				Specification of the department.

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: ND CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: EEd 126</b>	<b>UNIT: 3</b>	<b>TOTAL CONTACT HOURS: 3</b>
<b>COURSE TITLE: Introduction to Entrepreneurship</b>			<b>THEORETICAL:1Hours/Week</b>
<b>SEMESTER: 2</b>	<b>Pre-requisite: -</b>		<b>PRACTICAL:2Hours/Week</b>
<b>GOAL:</b> This course is designed to develop the student's understanding and application of general principle of Entrepreneurship Development			
<p><b>GENERAL OBJECTIVES:</b> On completion of this course, the student should be able to:</p> <ol style="list-style-type: none"> <li>1.0 Understand the basic concept of entrepreneurship</li> <li>2.0 Understand the historical perspective of entrepreneurship development</li> <li>3.0 Know how to plan a business enterprise/project</li> <li>4.0 Know how to operate simple stock keeping records</li> <li>5.0 Know how to prepare and operate cash flow on spreadsheets</li> <li>6.0 Understand employment issues</li> <li>7.0 Understand the Nigerian Legal System</li> <li>8.0 Comprehend the nature of contract and tort</li> <li>9.0 Understand Agency and Partnership</li> </ol>			

<b>PROGRAMME: ND CEMENT ENGINEERING TECHNOLOGY</b>			<b>COURSE CODE: EEd 126</b>	<b>UNIT: 3</b>	<b>TOTAL CONTACT HOURS: 3 HRS/WEEK</b>	
<b>COURSE TITLE Introduction to Entrepreneurship</b>					<b>THEORETICAL:1 HOURS/WEEK 2HRS</b>	
<b>SEMESTER 2</b>			<b>PRE-REQUISITE:-</b>		<b>PRACTICAL: 2HOURS/WEEK</b>	
<b>GOAL:</b> This course is designed to develop the student's understanding and application of general principle of Entrepreneurship Development						
<b>GENERAL OBJECTIVE 1.0: Understand the basic concept of entrepreneurship</b>						
<b>THEORETICAL CONTENTS</b>				<b>PRACTICAL CONTENTS</b>		
<b>WEEK/ S</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>
1	1.1 Define entrepreneurship, entrepreneur, small business and self-employment. 1.2 State the entrepreneurship philosophy identify entrepreneurial characteristics. 1.3 Identify entrepreneurial characteristics. 1.4 Define development enterprise.	Explain to the students activities 1.1-1.4  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 2.0 Understand the historical perspective of entrepreneurship development</b>						
2	2.1 Historical perspective. 2.2 Trace the origin of entrepreneurship. 2.3 Explain organizational structure. 2.4 Explain the role of an entrepreneur. 2.5 Explain the reasons for business failure.	Explain to the students activities 2.1-2.5  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 3.0: Know how to plan a business enterprise/project</b>						
3-5	3.1 Define the concepts: planning, business enterprise and project. 3.2 Explain the importance of planning to a business enterprise. 3.3 Analyse the skills and Techniques of starting and	Explain to the students activities 3.1-3.5  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			

	managing small business successfully. 3.4 Prepare and present project proposal. 3.5 Manage a small business profitably					
<b>GENERAL OBJECTIVE 4.0: Know how to operate simple stock keeping records</b>						
6	4.1 Ordering spare parts/materials 4.2 Receipt of parts/materials 4.3 Storage of parts/materials 4.4 Issue of parts/materials	Explain to the students activities 4.1-4.4  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 5.0: Know how to prepare and operate cash flow on spreadsheets</b>						
7-8	1.1 Need for different records (capital, revenue, credit transaction, tax) 1.2 Formatting spreadsheet 1.3 Operating spreadsheet	Explain to the students activities 5.1-5.3  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 6.0: Understand employment issues</b>						
9	6.1 Define the terms: education, training and development. 6.2 Retate education, training and development to employment. 6.3 Distinguish between skills and employment. 6.4 Explain the role of the private sector in employment generation. 6.4 Identify the forms and informal sectors 6.5 Explain the issues of: (i) Rural youth and employment (ii) Urgan youth and	Explain to the students activities 6.1-6.5  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			

	employment					
<b>GENERAL OBJECTIVE 7.0: Understand the Nigerian Legal System</b>						
10	7.1 Explain the nature of law. 7.2 Analyse the sources of Nigerian laws. 7.3 Evaluate the characteristics of Nigerian Legal System.	Explain to the students activities 7.1-7.3  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 8.0: Comprehend the nature of contract and tort</b>						
11-12	8.1 Define contract. 8.2 Explain types of contracts 8.3 State the basic requirements for a valid contract. 8.4 Analyse contractual terms. 8.5 Examine vitiating terms. 8.6 Explain breach of contract and remedies. 8.7 Define Tort. 8.8 Explain types of Tort. 8.9 Discuss tortuous liabilities and remedies	Explain to the students activities 8.1-8.9  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			
<b>GENERAL OBJECTIVE 9.0: Understand Agency and Partnership</b>						
13	9.1 Define agency 9.2 Explain creation of Agency 9.3 Explain authority of the agent. 9.4 Analyse the rights and duties of principal agent and third parties. 9.5 Explain termination of agency and remedies 9.6 Define partnership. 9.7 Examine creation of partnership. 9.8 Explain relations of partners to one another and to persons dealing with them	Explain to the students activities 9.1-9.9  Prepare detailed lecture notes and relevant diagrams with video clips	Instructional materials Flip charts Projectors Video Internet			

	9,9Analyse dissolution of partnership and remedies.

Total		100

<b>PROGRAMME: ND CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: MTH 113</b>	<b>UNIT:</b>	<b>TOTAL CONTACT HOURS: 2</b>
<b>COURSE TITLE: ALGEBRA &amp; ELEMENTARY TRIGONOMETRY</b>			<b>THEORETICAL: 2 Hours/week</b>
<b>YEAR/SEMESTER: ND I/2</b>	<b>Pre-requisite: -</b>		<b>PRACTICAL: 0 Hours/week</b>

**GOAL:** To enable the students acquire basic knowledge of algebra and trigonometry and apply same in solving problems in their areas of specialization

**GENERAL OBJECTIVES:** On completion of this course, the student will be able to:

- 1.0 Understand the laws of indices and their application in simplifying Algebraic expressions.
- 2.0 Understand the theory of logarithms and surds and their applications in manipulating expressions.
- 3.0 Understand principles underlying the construction of charts and graphs.
- 4.0 Know the different methods of solving quadratic equations.
- 5.0 Understand Permutation and Combination.
- 6.0 Understand the set theory.
- 7.0 Understand the properties of arithmetic and geometric progressions.
- 8.0 Understand the binomial and its application in the expansion of expressions
- 9.0 Understand the basic concepts and manipulation of vectors and complex number and their applications to the solution of engineering problems.
- 10.0 Understand the definition, manipulation and application of trigonometric function.
- 11.0 Understand the concept of equations and methods solving different types of equations and apply same to engineering problem.

<b>PROGRAMME: ND BOAT/SHIPBUILDING TECHNOLOGY</b>						
<b>COURSE: ALGEBRA AND ELEMENTARY TRIGONOMETRY</b>				<b>CODE: MTH 113</b>	<b>CH/CU: 2</b>	
<b>GOAL:</b> To enable the students acquire basic knowledge of algebra and trigonometry and apply same in solving problems in their areas of specialization.						
<b>COURSE SPECIFICATION: THEORY/PRACTICAL CONTENT</b>						
<b>GENERAL OBJECTIVE 1.0:</b> Understand The Laws of Indices And Their Applications In Simplifying Algebraic Expressions.						
	<b>THEORETICAL CONTENTS</b>			<b>PRACTICAL CONTENTS</b>		
<b>WEEK/S</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>
1	1.1 Define indices. 1.2 State the laws of indices 1.3 Solve simple problems using the laws of indices.	Define indices.  State the laws of indices.  Solving simple problems using the laws of indices.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.	Define indices.  Establish the laws of indices.  Solve simple problems using the laws of indices.	Illustrate with example and  Supervise the students' work.  Explain laws of indices.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.
<b>GENERAL OBJECTIVE 2.0:</b> Understand Theory of Logarithms, Surds And Their Applications In Manipulating Expression						
2-3	2.1 Define logarithms. 2.2 State the basic laws of logarithms. 2.3 Solve simple logarithms problems. 2.4 Define natural logarithms and common logarithms. 2.5 Define characteristics and mantissa 2.6 Read the logarithmic table for given numbers 2.7 Simplify numerical expressions using logarithms tables	Definite of logarithms.  Explain the basic laws of logarithms.  Find simple logarithms problems  Define natural logarithms and common logarithms.  Explain characteristics and mantissa.  Demonstrates the use of the logarithm table	Recommended textbooks, Marker Board, Lecture notes logarithm table, multimedia projector, and computer.	Define logarithm.  State the basic laws of logarithms.  Solve simple logarithm problem.  Define natural logarithm and common logarithm.  Define characteristic and mantissa  Read the logarithmic table for given numbers  Simplify numerical	Observe, instruct and guide the students in the exercises.  Supervise the students' work.  Correct any error in the students' definitions and concepts.  Illustrate with examples.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.

	<p>2.8 Apply logarithm in solving non-linear equations.</p> <p>2.9 Define surds</p> <p>2.10 Reduce a surd into its simplest form</p> <p>2.11 Solve simple problems on surds</p>	<p>Explains the use of the logarithm table in simplifying numerical expressions.</p> <p>Defines surds.</p> <p>Demonstrates the reduction of surds into its simplest form.</p> <p>Solve simple problems on surds.</p>		<p>expressions using logarithms tables</p> <p>Apply logarithms in solving non-linear equations.</p> <p>Define surds</p> <p>Reduce a surd into its simplest form</p> <p>Solve simple problems on surds</p>		
<b>GENERAL OBJECTIVE 3.0: Understand Principles Underlying The Construction Of Charts And Graphs</b>						
4	<p>3.1 Construct graphs of functions such as</p> $y = ax^n + b \text{ for } n=1,2.$ $y = ax^k$ <p>3.2 Apply knowledge from 3.1 in the determination of laws from experimental data.</p>	<p>Describe how to construct graphs of functions such as,</p> $y = ax^n + b \text{ for } n = 1, 2.$ $y = ax^k$ <p>Demonstrate with relevant examples how to determine laws from experimental data.</p>	Recommended textbooks, Marker Board, graph book, Lecture notes, multimedia projector, and computer.	<p>Construct graphs of functions such as</p> <p>Apply knowledge from 3.1 in the determination of laws from experimental data.</p>	<p>Supervise the students' work.</p> <p>Correct any error in the students' definitions and concepts</p>	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.
<b>GENERAL OBJECTIVE 4.0: Know The Different Methods of Solving Quadratic Equations.</b>						
5	<p>4.1 Solve quadratic equations by factorization.</p> <p>4.2 Solve quadratic equations by method of completing squares.</p> <p>4.3 Solve quadratic equations by general formula.</p> <p>4.4 Determine the roots of given quadratic equations.</p> <p>4.5 Form quadratic</p>	<p>Explain how to solve quadratic equations using factorization method.</p> <p>Explain how to solve quadratic equations by method of completing and by general formula.</p> <p>Demonstrate formulation of quadratic equations from given roots.</p>	Recommended textbooks, Marker Board, graph book, Lecture notes, multimedia projector, and computer.	<p>Solve quadratic equations by factorization.</p> <p>Solve quadratic equations by method of completing squares.</p> <p>Solve quadratic equations by general formula.</p> <p>Form quadratic equations from given roots.</p>	<p>Supervise the students' work.</p> <p>Correct any error in the students' definitions and concepts</p>	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.

	equations from given roots.					
--	-----------------------------	--	--	--	--	--

**GENERAL OBJECTIVE 5.0: Understand Permutations And Combinations.**

6	<p>5.1 Define permutation.</p> <p>5.2 State examples of permutations.</p> <p>5.3 Establish the theorem</p> ${}^n P_r = \frac{n!}{(n-r)!}$ <p>5.4 Define combination</p> <p>5.5 State examples of combination.</p> <p>5.6 Establish the theorem</p> ${}^n C_r = \frac{n!}{(n-r)!r!}$ <p>5.7 Establish <math>{}^n C_r = {}^n C_{n-r}</math></p>	<p>Define permutation.</p> <p>Illustrate permutation with examples.</p> <p>Establish the theorem</p> ${}^n P_r = \frac{n!}{(n-r)!}$ <p>Give the definition of combination</p> <p>Illustrate the idea of combination with examples.</p> <p>Establish the theorem</p> ${}^n C_r = \frac{n!}{(n-r)!r!}$ <p>Show that</p> ${}^n C_r = {}^n C_{n-r}$	<p>Recommended textbooks, Marker Board, graph sheets, Lecture notes, multimedia projector, and computer.</p>	<p>Define permutation.</p> <p>State examples of permutations.</p> <p>Establish the theorem</p> ${}^n P_r = \frac{n!}{(n-r)!}$ <p>Define combination.</p> <p>State examples of combination.</p> <p>Establish the theorem</p> ${}^n C_r = \frac{n!}{(n-r)!r!}$ <p>Establish <math>{}^n C_r = {}^n C_{n-r}</math></p>	<p>Correct any error in the students' definitions and concepts.</p> <p>Illustrate with examples.</p> <p>Observe, instruct and guide the students in the exercises.</p> <p>Supervise the students' work.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>
---	---	---	--	--	---	--

**GENERAL OBJECTIVE 6.0: Understand Set Theory**

7	<p>6.1 Define sets, subsets, and null sets</p> <p>6.2 Define union, intersection and</p>	<p>Define of sets, subsets, null sets, union, intersection and complement of sets.</p>	<p>Recommended textbooks, Marker Board, graph book, Lecture notes, multimedia projector, and computer.</p>	<p>Define sets, subsets, and null sets</p> <p>Define union, intersection and completion of sets.</p>	<p>Correct any error in the students' definitions and concepts.</p> <p>Illustrate with examples.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia</p>
---	--	--	--	--	--	---

	<p>complement of sets.</p> <p>6.3 Draw Venn diagrams to demonstrate the concepts in 6.2 above.</p> <p>6.4 Calculate the size or number of elements in a given set.</p> <p>6.5 Solve word problems on set.</p>	Demonstrate representation of sets using Venn diagrams.		<p>Draw Venn diagrams to demonstrate the concepts in 6.2 above.</p> <p>Calculate the size or number of elements in a given set.</p> <p>Solve word problems on set.</p>	<p>Observe, instruct and guide the students in the exercises.</p> <p>Supervise the students' work.</p>	projector, and computer.
--	---	---	--	--	--	--------------------------

**GENERAL OBJECTIVE 7.0:** Understand The Properties of Arithmetic And Geometric Progression.

8-9	<p>7.1 Define arithmetic progressions (A.P)</p> <p>7.2 Obtain the formula for nth term and the first n terms of an A.P</p> <p>7.3 Solve problems on A.P</p> <p>7.4 Define a geometric progression (G.P)</p> <p>7.5 Obtain the formula for the nth term and the first n terms of a geometric progression.</p> <p>7.6 State examples of 7.5 above.</p> <p>7.7 Define Arithmetic Mean (A.M) and Geometric Mean (G.M)</p> <p>7.8 Define convergence of series.</p> <p>7.9 Define divergence of series.</p>	<p>Define arithmetic progressions (A.P)</p> <p>Obtain the formula for nth term and the first n terms of an A.P</p> <p>Describe how to solve problems on A.P</p> <p>Define a geometric progression (G.P)</p> <p>Explain how to obtain the formula for the nth term and the first n terms of a geometric progression.</p> <p>Define Arithmetic Mean (A.M) and Geometric Mean (G.M)</p> <p>Define convergence of series.</p> <p>Define divergence of series</p>	Recommended textbooks, Marker Board, graph sheets, Lecture notes, multimedia projector, and computer.	<p>Define arithmetic progressions (A.P)</p> <p>Obtain the formula for nth term and the first n terms of an A.P</p> <p>Solve problems on A.P</p> <p>Define a geometric progression (G.P)</p> <p>Obtain the formula for the nth term and the first n terms of a geometric progression.</p> <ul style="list-style-type: none"> <li>Define Arithmetic Mean (A.M) and Geometric Mean (G.M.)</li> <li>Define convergence of series.</li> <li>Define divergence of series.</li> </ul>	<p>Correct any error in the students' definitions and concepts.</p> <p>Illustrate with examples.</p> <p>Observe, instruct and guide the students in the exercises.</p> <p>Supervise the students' work.</p>	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.
-----	--	--	---	--	---	---

**GENERAL OBJECTIVE 8.0:** Understand The Binomial Theorem And Its Application In The Expansion Of Expressions.

10-11	<p>8.1 Explain the method of mathematical induction.</p> <p>8.2 State and prove the binomial theorem for a positive integral index.</p> <p>8.3 Expand expressions of the forms <math>(x + y)^2</math>, <math>(x \pm 1)^5</math>, applying binomial theorem.</p> <p>8.4 Find the coefficient of a particular term in the expansion of simple binomial expressions.</p> <p>8.5 Find the middle terms in the expansion of binomial expression.</p> <p>8.6 State the binomial theorem for a rational index.</p> <p>8.7 Expand expressions of the form: <math>(1 + x)^{-1}</math>, <math>(1 \pm x)^{\frac{1}{2}}</math>, <math>(1 \pm x)^{-\frac{1}{3}}</math> applying binomial theorem</p> <p>8.8 Expand and approximate expressions of the type <math>(1.001)^n</math>, <math>(0.998)^n</math>, <math>(1 + x)^{\frac{1}{2}}</math>, <math>(1 \pm x)^{\frac{1}{3}}</math> to a stated degree of accuracy</p>	<p>Explain the method of mathematical induction.</p> <p>State and prove the binomial theorem for a positive integral index.</p> <p>Show the expansion of expressions of the forms <math>(x + y)^2</math>, <math>(x \pm 1)^5</math>, etc and applying binomial theorem.</p> <p>Find the coefficient of a particular term in the expansion of simple binomial expressions.</p> <p>Show how to find the middle terms in the expansion of binomial expression.</p> <p>State the binomial theorem for a rational index.</p> <p>Demonstrate the expansion of expressions of the form: <math>(1 + x)^{-1}</math>, <math>(1 \pm x)^{\frac{1}{2}}</math>, <math>(1 \pm x)^{-\frac{1}{3}}</math> applying binomial theorem.</p> <p>Guide the student to expand and approximate expressions of the type</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>	<p>Explain the method of mathematical induction.</p> <p>State and prove the binomial theorem for a positive integral index.</p> <p>Expand expressions of the forms <math>(x + y)^2</math>, <math>(x \pm 1)^5</math>, etc and applying binomial theorem.</p> <p>Find the coefficient of a particular term in the expansion of simple binomial expressions.</p> <p>Find the middle terms in the expansion of binomial expression.</p> <p>State the binomial theorem for a rational index.</p> <p>Expand expressions of the form: <math>(1 + x)^{-1}</math>, <math>(1 \pm x)^{\frac{1}{2}}</math>, <math>(1 \pm x)^{-\frac{1}{3}}</math> applying binomial theorem</p> <p>Expand and approximate expressions of the type <math>(1.001)^n</math>, <math>(0.998)^n</math>, <math>(1 + x)^{\frac{1}{2}}</math>, <math>(1 \pm x)^{\frac{1}{3}}</math> to a stated degree of accuracy</p>	<p>Correct any error in the students' definitions and concepts.</p> <p>Illustrate with examples.</p> <p>Observe, instruct and guide the students in the exercises.</p> <p>Supervise the students' work.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>
-------	---	--	--	---	---	--

		$(1.001)^n, (0.998)^n,$ $(1+x)^{1/2}, (1\pm x)^{1/3}$ to a stated degree of accuracy				
<b>GENERAL OBJECTIVE 9.0:</b> Understand The Basic Concepts And Manipulation Of Vectors And Their Applications To The Solutions of Engineering Problems.						
12-13	<p>9.1 State the definitions and representations of vectors.</p> <p>9.2 Identify vector quantities.</p> <p>9.3 Define a position vector.</p> <p>9.4 Define unit vector</p> <p>9.5 Explain scalar multiple of a vector</p> <p>9.6 List the characteristics of parallel vectors</p> <p>9.7 Compute the modulus of any given vector up to 2 and 3 dimensions.</p> <p>9.8 State the parallelogram law for addition and subtraction of vectors</p> <p>9.9 Apply the parallelogram law in solving problems.</p> <p>9.10 Explain the concept of components of a vector and the meaning of orthogonal components.</p> <p>9.11 Resolve a vector into its orthogonal components.</p> <p>9.12 List characteristics of coplanar localized vectors.</p> <p>9.13 Define the resultant or</p>	<p>State the definitions and representations of vectors.</p> <p>Define a position vector.</p> <p>Define unit vector</p> <p>Explain scalar multiple of a vector.</p> <p>List the characteristics of parallel vectors</p> <p>Demonstrate computation of the modulus of any given vector up to 2 and 3 dimensions.</p> <p>State the parallelogram law for addition and subtraction of vectors</p> <p>Apply the parallelogram law in solving problems.</p> <p>Explain the concept of components of a vector and the meaning of orthogonal components.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>	<p>State the definitions and representations of vectors.</p> <p>Identify quantities that may be classified as vector.</p> <p>Define a position vector and a unit vector</p> <p>Explain scalar multiple of a vector</p> <p>List the characteristics of parallel vectors</p> <p>Compute the modulus of any given vector up to 2 and 3 dimensions.</p> <p>State the parallelogram law for addition and subtraction of vectors, and apply it to solve problems.</p> <p>Explain the concept of components of a vector and the meaning of orthogonal Components.</p> <p>Resolve a vector into its orthogonal components.</p> <p>List characteristics of</p>	<p>Correct any error in the students' definitions and work.</p> <p>Illustrate with examples.</p> <p>Observe, instruct and guide the students in the exercises.</p> <p>Supervise the students' work.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>

	<p>composition of coplanar vectors.</p> <p>9.14 Compute the resultant of coplanar forces acting at a point using algebraic and graphical methods.</p> <p>9.15 Apply the techniques of resolution and resultant to the solution of problems involving coplanar forces.</p> <p>9.16 Apply vector techniques in solving problems involving relative velocity.</p> <p>9.17 State the scalar product of two vectors.</p> <p>9.18 Compute the scalar product of given vectors.</p> <p>9.19 Define the cross product of the vector product or two vectors.</p> <p>9.20 Calculate the direction ratios of given vectors.</p> <p>9.21 Calculate the angle between two vectors using the scalar product.</p>	<p>Resolve a vector into its orthogonal components.</p> <p>List characteristics of coplanar localized vectors.</p> <p>Define the resultant or composition of coplanar vectors.</p> <p>Compute the resultant of coplanar forces acting at a point using algebraic and graphical methods.</p> <p>Apply the techniques of resolution and resultant to the solution of problems involving coplanar forces.</p> <p>Apply vector techniques in solving problems involving relative velocity.</p> <p>State the scalar product of two vectors.</p> <p>Compute the scalar product of given vectors.</p> <p>Define the cross product of the vector product or two vectors.</p> <p>Calculate the direction ratios of given vectors.</p>		<p>coplanar localized vectors.</p> <p>Define the resultant or composition of coplanar vectors and compute the resultant of coplanar forces acting at a point using algebraic and graphical methods.</p> <p>Apply the techniques of resolution and resultant to the solution of problems involving coplanar forces.</p> <p>Apply vector techniques in solving problems involving relative velocity.</p> <p>State and compute the scalar product of two vectors.</p> <p>Define the cross product of the vector product or two vectors.</p> <p>Calculate the direction ratios of given vectors and the angle between two vectors using the scalar product</p>		
--	--	--	--	--	--	--

		Calculate the angle between two vectors using the scalar product.				
<b>GENERAL OBJECTIVE 10.0</b> Know The Concept To Solve Linear Simultaneous Equation With Two Unknown Variables						
14	<p>10.1 Explain the concept of equation.</p> <p>10.2 List different types of equations; linear, quadratic, cubic, etc.</p> <p>10.3 State examples of linear simultaneous equations in two unknowns and simultaneous equations with at least one quadratic equation.</p> <p>10.4 Apply algebraic and graphical methods in solving two simultaneous equations involving a linear equation and a quadratic equation.</p> <p>10.5 Define a determinant of nth order.</p> <p>10.6 Apply determinants of order 2 and 3 in solving simultaneous linear equation.</p>	<p>Explain the concept of equation.</p> <p>List different types of equations; linear, quadratic, cubic, etc.</p> <p>Give examples of linear simultaneous equations in two unknowns and simultaneous equations with at least one quadratic equation.</p> <p>Apply algebraic and graphical methods in solving two simultaneous equations involving a linear equation and a quadratic equation.</p> <p>Define a determinant of nth order.</p> <p>Apply determinants of order 2 and 3 in solving simultaneous linear equation.</p>	Recommended textbooks, Marker Board, graph sheets, Lecture notes, multimedia projector, and computer.	<p>Explain the concept of equation.</p> <p>List different types of equations; linear, quadratic, cubic, etc.</p> <p>Give examples of linear simultaneous equations in two unknowns and simultaneous equations with at least one quadratic equation.</p> <p>Apply algebraic and graphical methods in solving two simultaneous equations involving a linear equation and a quadratic equation.</p> <p>Define a determinant of nth order.</p> <p>Apply determinants of order 2 and 3 in solving simultaneous linear equation.</p>	<p>Correct any error in the students' definitions and work.</p> <p>Illustrate with examples.</p> <p>Observe, instruct and guide the students in the exercises.</p> <p>Supervise the students' work.</p>	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.

<b>GENERAL OBJECTIVE 11.0</b> Understand The Concept Of Trigonometric Functions And Apply Them In Solving Problems.						

15	<p>11.1 Define the basic trigonometric ratios, sine, cosine and tangent of an angle.</p> <p>11.2 Derive the other trigonometric ratios; cosecant, secant and cotangent using the basic trigonometric ratios in 11.1 above.</p> <p>11.3 Derive identities involving the trigonometric ratios;  <math>\cos^2 \theta + \sin^2 \theta = 1</math>,  <math>\sec^2 \theta = 1 + \tan^2 \theta</math>, etc.</p> <p>11.4 Derive compound angle formulae for <math>\sin(A+B)</math>, <math>\cos(A+B)</math> and <math>\tan(A+B)</math>.</p>	<p>Define the basic trigonometric ratios.</p> <p>Derive the reciprocal of basic trigonometric ratios.</p> <p>Derive special identities involving the trigonometric ratios.</p> <p>Derive compound angle formulae for sine, cosine and tangent.</p>	<p>Recommended textbooks, Marker Board, graph sheets, Lecture notes, multimedia projector, and computer.</p>	<p>Define the basic trigonometric ratios.</p> <p>Derive the reciprocal of basic trigonometric ratios.</p> <p>Derive special identities involving the trigonometric ratios.</p> <p>Define the basic trigonometric ratios.</p> <p>Derive the reciprocal of basic trigonometric ratios.</p> <p>Derive special identities involving the trigonometric ratios.</p> <p>Derive compound angle formulae for sine, cosine and tangent.</p>	<p>Correct any error in the students' definitions and work.</p> <p>Illustrate with examples.</p> <p>Observe, instruct and guide the students in the exercises.</p> <p>Supervise the students' work.</p>	<p>Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.</p>

				<b>PRACTICAL: 2 Hours/Week</b>		
<b>Goal:</b> The course is intended to provide the student with basic knowledge of Electrical Engineering Science.						
<b>GENERAL OBJECTIVE: 1.0 Understand The Elementary Idea of Culture of Current Flow.</b>						
<b>THEORETICAL CONTENT</b>			<b>PRACTICAL CONTENTS</b>			
<b>Wk/S</b>	<b>Specific Learning Outcome</b>	<b>Teachers Activities</b>	<b>Resource</b>	<b>Specific Learning Outcomes</b>	<b>Teachers Activities</b>	<b>Resource</b>
1	<p>1.0 State the Composition of an atom their corresponding charges.</p> <p>1.1 Define electric Current as the drift of electrons in the direction.</p> <p>1.2 Explain the concept of resistance and potential difference and electromotive force.</p> <p>1.3 State the unit of current, resistance, potential difference and electromotive force</p> <p>1.5 Define the unit of current resistance, potential difference an electromotive force.</p>	<p>State the Composition of an atom their corresponding charges.</p> <p>Explain the concept of resistance and potential difference and electromotive force.</p>	<p>Marker Board, maker, overhead projector</p> <p>Sketches</p> <p>Laboratory &amp; laboratory equipment</p>	<p>Determine the unit of current resistance, potential difference an electromotive force.</p>	<p>Carryout practical experiment to determine the unit of current resistance, potential difference an electromotive force.</p>	<p>Sketches</p> <p>Laboratory &amp; laboratory equipment</p>
<b>GENERAL OBJECTIVE: 2.0: Know The Application of Ohm's Law.</b>						

2	<p>2.1 State ohm's law.</p> <p>2.2 Verify ohm's law by experiment</p> <p>2.3 Solve problems applying ohm's law to basic electrical circuits.</p> <p>2.4 Determine the equivalent resistance of a number of resistances in series and parallel.</p> <p>2.5 Solve problems on series, parallel and combination</p>	<p>Explain the concept of Ohm's law</p>	<p>Marker Board, maker, overhead projector.</p>	<p>Verify ohm's law by experiment</p> <p>Determine the equivalent resistance of a number of resistances in series and parallel.</p>	<p>Carryout experiment to determine the equivalent resistance of a number of resistances in series and parallel</p>	<p>Laboratory &amp; laboratory equipment</p>
<b>GENERAL OBJECTIVE: 3.0 Understand The Application Of Kirchhoff's Law.</b>						
3	<p>3.1 State Kirchhoff's 1<sup>st</sup> and 2<sup>nd</sup> law.</p> <p>3.2 Solve simple problems involving Kirchhoff's 1<sup>st</sup> and 2<sup>nd</sup> law.</p>	<p>Explain the concept of Kirchhoff's Law</p>	<p>Marker Board, maker, overhead projector</p>	-	-	-
<b>GENERAL OBJECTIVE: 4.0 Understand The Concept Of Power And Energy.</b>						
4	<p>4.1 Define power and energy.</p> <p>4.2 State the relationship between power and time, current, voltage and resistance.</p> <p>4.3 Write formula for energy using the relationship between power and time, current, voltage and resistance.</p> <p>4.4 Solve problems on relationship between power and time, current, voltage and resistance and Write formula for energy</p>	<p>Explain the concept of Power And Energy</p>	<p>Marker Board, maker, overhead projector.</p>	-	-	-

	using the relationship between power and time, current, voltage and resistance.					
<b>GENERAL OBJECTIVE: 5.0 Understand The Effect Of Electric Current.</b>						
5	<p>5.1 State the three effects of electric current.</p> <p>5.2 Explain how heat energy is produced by passage of current through a resistor (conductor).</p> <p>5.3 Determine energy dissipated as heat.</p> <p>5.3 State practical application of the heating effect of electric current. (cooker, electric iron, electric furnaces, thermocouple)</p> <p>5.4 Verify the heating effect of electric current experimentally.</p> <p>5.5 Explain how chemical reaction occurs when current passes through an electrolyte.</p> <p>5.6 Explain Faraday's law of electrochemical equivalent.</p> <p>5.7 Solve problems involving faraday's law of electrochemical equivalent</p> <p>5.8 Verify Faraday's law experimentally.</p> <p>5.9 Explain the chemical reaction in electroplating electrolysis and the car Battery.</p>	Explain the effect of electric current	Marker Board, maker, overhead projector.	<p>Determine energy dissipated as heat</p> <p>Determine the heating effect of electric current experimentally.</p> <p>Determine Faraday's law experimentally</p> <p>Determine the direction of the force on conductor carrying current which is situated in the magnetic field.</p>	<p>Carryout experiment to determine energy dissipated as heat.</p> <p>Verify the heating effect of electric current experimentally</p> <p>Verify Faraday's law experimentally</p> <p>Perform experiment to determine the direction of the force on conductor carrying current which is situated in the magnetic field.</p>	<p>Laboratory &amp; laboratory equipment</p> <p>Sample of the instrument is required</p>

	<p>5.10 Explain the magnetic effect of electric current.</p> <p>5.11 Plot the magnetic field produced by a straight conductor, two parallel conductors, a solenoid, etc.</p> <p>5.12 Explain the right hand grip-rule.</p> <p>5.13 State the cork screw rule.</p> <p>5.14 Determine the direction of line flux with the right hand grip rule, and cork screw rule.</p> <p>5.16 Explain how force is exerted on a conductor carrying current which is situated in a magnetic field.</p> <p>5.17 State the relationship between the force, the current and the flux.</p> <p>5.18 Solve problems on the relationship between the force, the current and the flux.</p> <p>5.19 Determine the direction of the force on conductor carrying current which is situated in the magnetic field.</p> <p>5.20 Determine the direction of the force on conductor carrying current situated in magnetic field using the Fleming's left-hand rule.</p> <p>5.21 Explain how magnetic effect is made use of</p>					
--	---	--	--	--	--	--

	<p>in the moving coil instrument, electric bell, motors, etc.</p> <p>5.22 Explain how the magnetic effect is made use of in the moving coil instrument, electric bell, motors, etc.</p> <p>5.23 Explain the detailed construction of how the magnetic effect is made use of in the moving coil instrument, electric bell, motors, etc.</p>					
<b>GENERAL OBJECTIVE: 6.0</b> Understand The Principles Of Electromagnetic Induction						
6	<p>6.1 Explain the principles of induction.</p> <p>6.2 State Fleming's law.</p> <p>6.3 Explain the principle of coil in the Carignition system.</p> <p>6.4 Explain the construction of the generator.</p> <p>6.5 Determine the magnetic lines of flux.</p>	Explain the principles of electromagnetic induction	Marker Board, maker, overhead projector	Determine the magnetic lines of flux	Perform experiment to determine the magnetic lines of flux	<p>Laboratory &amp; laboratory equipment</p> <p>Sample of the instrument is required</p>
<b>GENERAL OBJECTIVE: 7.0</b> Understand The Basic Phenomenon Of Electrostatics						
7	<p>7.1 Explain basic idea of electric charges.</p> <p>7.2 Define the colours.</p> <p>7.3 Explain the use of capacitor as an electrical charge storing device.</p> <p>7.4 Describe the construction of a simple parallel plate capacitor.</p> <p>7.5 Define capacitance.</p> <p>7.6 State formula relating capacitance to area of</p>	Discuss the basic Phenomenon Of Electrostatics	Marker Board, maker, overhead projector	Describe the construction of a simple parallel plate capacitor.	Carryout construction of a simple parallel plate capacitor	<p>Laboratory &amp; laboratory equipment</p> <p>Sample of the instrument is required</p>

	<p>plates, thickness of the dielectric.</p> <p>7.7 State the relationship between charges applied, voltage and capacitance.</p> <p>7.8 Solve problems on 7.7 and 7.8.</p> <p>7.9 Derive expression for capacitors in series and parallel.</p> <p>7.10 Solve problems on 7.10.</p>					
<b>GENERAL OBJECTIVE: 8.0 Know The Basic A.C Theory</b>						
8	<p>8.1 Explain the A.C wave forms (sinusoidal, triangular, square, saw tooth, etc.)</p> <p>8.2 Define the common AC frequency period, cycle, and instantaneous value from factor value.</p> <p>8.3 Draw relationship between root mean square values, average value, and peak value, crest value and form factor.</p> <p>8.4 Solve problems on 8.3.</p> <p>8.5 Illustrate graphically the relationship between current and voltage in AC circuit containing resistance, capacitor and inductor both separately and combined.</p> <p>8.6 Derive expression for series and parallel and complex impedance.</p> <p>8.7 Define apparent power (A), reactive power (Q), and active power (P).</p>	Discuss the basic A.C theory	Marker Board, maker, overhead projector	Illustrate graphically the relationship between current and voltage in AC circuit containing resistance, capacitor and inductor both separately and combined.	Demonstrate graphically the relationship between current and voltage in AC circuit containing resistance, capacitor and inductor both separately and combined.	<p>Laboratory &amp; laboratory equipment</p> <p>Sample of the instrument is required</p>

8.8 State that power factor is the ratio of active to apparent power. 8.9 Solve problems relating to 8.6,8.7,8.8						
---	--	--	--	--	--	--

**PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY**

<b>COURSE TITLE: SCIENCE AND PRPPERTIES OF MATERIALS</b>	<b>Course Code: CEC 104</b>	<b>UNIT: 5</b>	<b>CONTACT HOURS: 5 HRS/WEEK</b>
			<b>THEORETICAL: 2HOURS/WEEK</b>
<b>YEAR/SEMESTER:ND 1/ 2</b>	<b>PRE-REQUISITE: NONE</b>		<b>PRACTICAL: 3HOURS/WEEK</b>

Goal :The course is designed to enable students to acquire basic knowledge of Propeerties of Materials

**GENERAL OBJECTIVES**

On completion of this course, the students will be able to:

1. Understand the internal structure of the atom.
2. Understand the microstructure of solids
3. Understand the macroscopic properties of materials
4. Know various types and properties of aggregates used in Civil Engineering
5. Know types and properties of other materials used in Civil Engineering Construction.
6. Know the types and properties of cement.
7. Understand the properties and uses of concrete.
8. Know Properties and Uses of Ferrocement

<b>COURSE TITLE: SCIENCE AND PROPERTIES OF MATERIALS</b>		<b>COURSE CODE: CEC 104</b>		<b>UNIT:5</b>		<b>CONTACT HOURS: 5 HRS/WEEKS</b>	
						<b>THEORETICAL: 2HOURS/ WEEK</b>	
<b>Goal :</b> The course is designed to enable students to acquire basic knowledge of Properties of Materials							
<b>YEAR/SEMESTER: ND I/ 2<sup>nd</sup></b>		<b>PRE-REQUISITE :-</b>				<b>PRACTICAL: 3 HOURS/ WEEK</b>	
<b>1. General Objective 1.0: Understand the internal structure of the atom</b>							
<b>THEORETICAL CONTENT</b>				<b>PRACTICAL CONTENT</b>			
<b>WEEK /S</b>	<b>SPECIFIC LEARNING OUTCOME</b>	<b>TEACHERS ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHERS ACTIVITIES</b>	<b>RESOURCES</b>	
1	1.1 Define clearly the characteristics of electron, proton, and neutron. 1.2 Predict element positions in the periodic table. 1.3 Explain exceptions to rule of thumb. 1.4 Describe the duality concept clearly. 1.5 Describe clearly the Wave and Corpuscular models. 1.6 Explain De-Broglie's expressions. 1.7 Explain schrodinger's equation. 1.8 Derive Bohr's conclusion. 1.9 Describe how Bohr's conclusion explains atomic equilibrium, excitation, ionization state. 1.10 Illustrate ionic, co-valent and metallic bonds.	Explain to the students activities 1.1-1.10.  Prepare detailed lecture notes and relevant diagrams with video clips.	Lecture notes, video clips and Multimedia	-	-	-	
<b>General Objective 2.0: Understand the microstructure of solids</b>							
2	2.1 Describe clearly the crystalline structure of metals, ceramics, etc. 2.2 Describe clearly the crystalline nature of	Explain to the students activities 2.1-2.9.  Prepare detailed lecture notes and relevant	Lecture notes, video clips and Multimedia				

	<p>polymer fibres.</p> <p>2.3 Describe separate phases, alloys filled materials and composite materials.</p> <p>2.4 Describe, in detail, the various methods of studying microstructures.</p> <p>2.5 Illustrate these with diagrams.</p> <p>2.6 Describe the behaviour of charge carriers.</p> <p>2.7 Differentiate between majority and minority charge carriers.</p> <p>2.8 Define charge density and temperature.</p> <p>2.9 Define mobility, diffusion and conductivity.</p>	<p>diagrams with video clips.</p>				
<p><b>General Objective 3.0:</b> Understand the macroscopic properties of materials</p>						

3	<p>3.1 Explain the relationship between macroscopic properties and structural properties.</p> <p>3.2 Distinguish between elastic and plastic deformation.</p> <p>3.3 Define stress and strain .</p> <p>3.4 State the relationship between stress and strain.</p> <p>3.5 Define modulus of elasticity.</p> <p>3.6 Determine 3.5 by experiment and from experimental data.</p> <p>3.7 Define yield, plastic flow, creep.</p> <p>3.8 Define conductors and semiconductors.</p> <p>3.9 Describe dielectric, piezoelectric, and magnetic properties of solids.</p>	<p>Explain to the students activities 3.1-3.9.</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips.</p>	Lecture notes, video clips and Multimedia			
<b>General Objective 4.0</b> Know various types and properties of aggregates used in Civil Engineering						
4-5	<p>4.1 State Civil Engineering aggregates.</p> <p>4.2 Describe various common quarrying methods.</p> <p>4.3 Explain the properties of aggregate e.g porosity, absorption, void ratio, etc.</p> <p>4.4 Describe tests for cleanliness, silt test.</p> <p>4.5 Describe methods of moisture content determination and uses.</p> <p>4.6 Describe grading methods.</p> <p>4.7 Perform grading test.</p> <p>4.8 Describe crushing strength tests.</p>	<p>Explain to the students activities 4.1-4.9.</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips.</p>	Lecture notes, video clips and Multimedia			

	4.9 Perform the crushing strength tests.					
<b>General Objective: 5.0:</b> Know types and properties of other materials used in Civil Engineering Construction						
6-7	<p>5.1 Describe the use and application of stones in construction works</p> <p>5.2 Describe the use and application of earth, soil and laterite construction works.</p> <p>5.3 Describe the production and usage of fired clay in construction works.</p> <p>5.4 Describe the uses of binders in construction works</p> <p>5.5 Describe use of plastics in construction works.</p> <p>5.6 Describe types and properties of glass.</p> <p>5.7 Describe use and application of tar, bitumen and asphalt.</p> <p>5.8 State types and properties of asbestos.</p> <p>5.9 Define corrosion.</p> <p>5.10 State effects of corrosion as well as methods of prevention.</p>	<p>Explain to the students activities 5.1-5.10.</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips.</p>	Lecture notes, video clips and Multimedia			
<b>General Objective: 6.0:</b> Know the types and properties of cement.						

8	<p>6.1 Distinguish between, the different types of cement.</p> <p>6.2 Describe the methods of cement manufacture.</p> <p>6.3 Describe the acceptability tests for cement, e.g fineness, setting time, soundness, etc.</p> <p>6.4 Perform the acceptability tests for cement.</p>	<p>Explain to the students activities 6.1-6.4.</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips.</p>	Lecture notes, video clips and Multimedia			
<b>General Objective: 7.0:</b> Understand the properties and uses of concrete.						

9-11	<p>7.1 Describe, with illustrations, proper and improper storage of materials.</p> <p>7.2 Describe concrete batching, mixing and transporting methods.</p> <p>7.3 Describe standard tests for concrete e.g slumps tests, compaction factor, compressive strength test (cube, cylinder).</p> <p>7.4 Perform standard tests in 7.3</p> <p>7.5 Describe types of concrete pumps, placers, vibrators, etc.</p> <p>7.6 Describe proper protection and curing of concrete.</p> <p>7.7 Describe, with illustration, the bending and fixing of reinforcement.</p> <p>7.8 Illustrate, with sketches, different types of joints in concrete.</p> <p>7.9 Define proper concrete finishes.</p> <p>7.10 State the effect of corrosion on metals with regard to structural stability.</p> <p>7.11 State the causes of and methods of preventing corrosion.</p>	<p>Explain to the students activities 7.1-7.11.</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips.</p>	Lecture notes, video clips and Multimedia			
<b>General Objective: 8.0:</b> Know Properties and Uses of Ferrocement						

12-13	<p>8.1 Explain the meaning of ferrocement.</p> <p>8.2 Distinguish between sandcrete, reinforced concrete and ferrocement.</p> <p>8.3 Enumerate the uses of ferrocement in:</p> <ol style="list-style-type: none"> <li>a. Building construction;</li> <li>b. Underground construction works;</li> <li>c. Airport facilities;</li> <li>d. Road works;</li> <li>e. Water projects and</li> <li>f. Agricultural facilities.</li> </ol> <p>8.4 Describe the properties of ferrocement such as:</p> <ol style="list-style-type: none"> <li>(a) tensile (b) flexural strength (c) compressive strength (d) impact and fatigue strength (e) water (or liquid) retaining capacity. Etc.</li> </ol> <p>8.5 Enumerate the guidelines for the use of ferrocement.</p> <ol style="list-style-type: none"> <li>(a) Materials (b) Testing (c) Design (d) Construction.</li> </ol> <p>8.6 Discuss the criteria of choice of micro-reinforcement in concrete composites.</p> <p>8.7 Explain the use of ferrocement as a means of producing skinned elements in buildings e.g ribbed plates, floor slabs, walls, joints below floor slabs and walls etc.</p> <p>8.8 Explain the properties of bamboo that make it useful in construction industry.</p> <p>8.9 Describe the construction of the following with bamboo:</p> <ol style="list-style-type: none"> <li>a. split-bamboo piles (foundation)</li> </ol>	<p>Explain to the students activities 8.1-8.19.</p> <p>Prepare detailed lecture notes and relevant diagrams with video clips.</p>	Lecture notes, video clips and Multimedia			
-------	--	---	---	--	--	--

	<ul style="list-style-type: none"> <li>b. bamboo floor</li> <li>c. bamboo reinforced earth walls</li> <li>d. bamboo roofs structures e.g. <ul style="list-style-type: none"> <li>i. barrel vault</li> <li>ii. small geodesic dome</li> <li>iii. grid shell on a square base</li> <li>iv. irregularly shaped grid shells</li> <li>v. bamboo trusses</li> <li>vi. bamboo shingles with splint or string fixing</li> <li>vii. bamboo shingles as Spanish tiles</li> </ul> </li> </ul>

**PROGRAMME: ND CEMENT ENGINEERING TECHNOLOGY**

**Course: Science and Properties of Materials**

**Course Code: CEC 104**

**Contact Hours: 2 – 0 - 3**

**Course Specification: Practical Content**

<b>General Objective: Conduct Practicals to explain the theoretical Content</b>			
<b>WEEK</b>	<b>Specific Learning Outcome</b>	<b>Teachers Activities</b>	<b>Resources</b>
2	Carry out the following tests on a given cement sample: a. Consistency b. Initial and final setting time c. Soundness	<ul style="list-style-type: none"> <li>▪ Technologist to prepare cement and concrete samples in the presence of the students and monitor students during the practical.</li> <li>▪ He is to grade students reports and submit to lecturer.</li> <li>▪ The course lecturer is to supervise the above activities and collate the results of the graded practical.</li> </ul>	<ul style="list-style-type: none"> <li>▪ Vicat apparatus Le Chatelier test apparatus,</li> <li>▪ 150mm cube moulds,</li> <li>▪ 150mm cylindrical ,</li> <li>▪ Engine oil</li> <li>▪ Curing tank fall of water.</li> <li>▪ DEMIC gauge</li> </ul>
3 – 5	Perform the following tests on samples of concrete. a. Cast concrete cubes 12 in number and one cylindrical in shape. b. Cure in water c. Test 3 samples of cube after 7 days d. Test 3 samples of cube after 14 days e. Test 3 samples of cube after 28 days Compare results obtained with those specified in BS 12. Test the cylindrical concrete after 28 days and obtain the modulus of elasticity of concrete.		
6	Determine modulus of elasticity.		
7	Perform grading tests and crushing strength tests on concrete.		
8 – 9	Carry out field tests on soils and laterite.		
10 – 11	Carry out laboratory tests on soil and laterite.		
12	Carry out structural properties of ferrocement.i.e tensile, cracking, in pact strength fatigue strength, compressive strength.		

13 – 15	Design and construct a structure with either ferrocement or bamboo.		
---------	---	--	--

	<b>Programme: ND Cement Engineering Technology</b>	<b>Course Code: CET 121</b>		<b>Contact Hours: 2</b>
	<b>Subject/Course: Safety and Environmental Control in the Cement Industry</b>			<b>Theoretical: 2 hours/week</b>
	<b>Year: ND I Semester: 2<sup>nd</sup></b>	<b>Pre-requisite:-</b>	<b>-</b>	<b>Practical: hours/week</b>

**Goal:** The course is designed to provide the students with knowledge of safety and environmental control in cement industry.

### **General Objectives**

- 1.0: Know the legislations relevant to health and safety.
- 2.0: Understand the Mining and Petroleum Legislations.
- 3.0: Know the development of an effective safety policy.
- 4.0: Understand accident reporting and investigation.
- 5.0: Understand environmental control in the cement industry.
- 6.0: Understand air pollution.
- 7.0: Understand meteorological aspects of air pollutant dispersion.
- 8.0: Know air pollution control methods and equipment.
- 9.0: Understand solid waste management.
- 10.0: Understand noise pollution and control.
- 11.0: Understand radiation and heat control in the cement industry.

	<b>Course: Safety and Environmental Control in the Cement Industry</b>	<b>Course Code: CET 121</b>		<b>Contact Hours 2HRS/WEEK</b>

<b>Week</b>	<b>General Objective 1.0: Know the legislations relevant to health and safety</b>					
	<b>Specific Learning Outcome:</b>	<b>Teacher Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>TeachersActivities</b>	<b>Resources</b>
1	1.1 Outline the main provisions of the health and safety act at work. 1.2 Outline the main provisions of the Factories Act Fire Precautions. 1.3 State the relevance of Common Law to health and safety at work. 1.4 Explain the general duties in respect of health and safety of employers and employees and others in work places, etc.	1. Develop instructional manual for teaching this course. 2. Outline the provisions of the health and safety act at work place. 3. State the relevance of common law to health and safety at work. 4. Narrate the general duties in respect of health and safety of employers and others in control of work places, employees, suppliers, etc.	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			
	<b>General Objective 2.0: Understand the Mining and Petroleum Legislations</b>					
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
3	2.1 Outline the main provision of (a) Nigerian Minerals and Mining Act. (b) Petroleum Act.	1. Outline the main provisions of minerals, petroleum and quarries act. 2. Outline the main provisions of petroleum act. 3. Explain the difference between PA and the proposed PIB 4. Evaluate the students	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			
	<b>General Objective 3.0: Know the development of an effective safety policy</b>					
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>

4-5	<p>3.1 Outline the principles of developing effective safety policy.</p> <p>3.2 Explain the need for:</p> <ol style="list-style-type: none"> <li>Accident prevention</li> <li>Psychological basis for accident prevention.</li> <li>Economic basis for accident prevention</li> </ol> <p>3.3 Categorize potential causes of physical injuries and occupational illness.</p> <p>3.4 Describe possible preventive measures for 3.3 above</p> <p>3.5 Explain personal safety considerations, working practice and hazards associated with the following:</p> <ol style="list-style-type: none"> <li>Personal protection equipment.</li> <li>Fire and explosion hazards.</li> <li>Special safety measures</li> </ol> <p>3.6 Explain the role of management, supervisors, safety officers and operators in safety enforcement and compliance.</p> <p>3.7 Enumerate sources of information and materials needed in case of emergency.</p> <p>3.8 Explain rescue techniques.</p>	<ol style="list-style-type: none"> <li>Discuss the importance of an effective safety policy</li> <li>Enumerate causes of work place accident, physical injuries and occupational illness.</li> <li>Mention personal protective apparels used in mines, quarries, crushers, stackers, mills, kilns, coolers and packers</li> <li>Highlight the importance of safety management policy.</li> <li>Evaluate the students.</li> </ol>	<p>Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.</p>			
<b>General Objective 4.0: Understand accident reporting and investigation</b>						
<b>Week</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome:</b>	<b>Teachers Activities</b>	<b>Resources</b>
6-7	4.1 Classify accidents.	1. Classify accidents.	Instructional			

	<p>4.2 State the procedure for reporting accidents to appropriate authorities.</p> <p>4.3 List the main elements of oral and written reports of accidents and their purpose.</p> <p>4.4 Use the reports of accidents in generating statistical data for prevention and control of accident (e.g. frequency rate).</p>	<p>2. State the procedure for reporting accidents.</p> <p>3. List the main elements of oral and written reports of accidents and their purposes.</p>	<p>Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, Incident report book etc.</p>			
<b>General Objective 5.0: Understand environmental control in the cement industry.</b>						
8-9	<p>5.1 Define pollution.</p> <p>5.2 List the main sources of pollution in the mining and cement processing industry.</p> <p>5.3 Describe disposal methods for liquid, solid and gaseous wastes from mining, cement and mineral processing industries.</p> <p>5.4 Outline preventive methods adopted in the mining, cement and mineral processing Industries to check pollution.</p> <p>5.5 Explain the importance of Environmental Impact Assessment (EIA) and Environmental Evaluation (EE).</p> <p>5.6 Outline the main provision of relevant legislations (e.g. NESREA Act, Mineral Act, Petroleum Act, etc) on environmental</p>	<p>1. Explain the value of environmental control.</p> <p>2. Explain proper process of waste disposal system.</p> <p>3. Demonstrate how preventive methods in mining and minerals processing mitigate pollution.</p> <p>4. Cite relevant areas from mining and mineral processing Act and latest mining regulations concerning effect of mining on the environment.</p> <p>5. Explain types of pollution in the cement industry.</p> <p>6. Assess the students</p>	<p>Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.</p>			

	control.					
<b>General Objective 6.0: Understand air pollution</b>						
10-11	6.1 Define air pollution. 6.2 State the composition of natural air. 6.3 State the types air pollutants. 6.4 Classify air pollutants: primary and secondary. 6.5 Explain the effect of air pollution on: human health, materials and vegetation. 6.6 Explain major environmental phenomenon: acid rain, global warming, greenhouse effect, ozone layer depletion etc. 6.7 Explain air quality standard. 6.8 State air pollution laws.	Explain 6.1-6.8.	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, NESREA Act, Mineral Act, Petroleum Act etc.			
<b>General Objective 7.0: Understand Meteorological aspects of air pollutant dispersion.</b>						
12	8.1 Explain meteorological parameters influencing air pollution. 8.2 Explain the following: <ul style="list-style-type: none"> <li>• Turbulence effect</li> <li>• Topographical effect</li> <li>• Plume behavior</li> <li>• Looping</li> <li>• Trapping.</li> </ul>	Explain 7.1-7.2.	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			
<b>General Objective 8.0: Know air pollutant control methods and equipment</b>						
13	8.1 Explain natural and artificial purification processes of air. 8.2 Describe the following air control equipment: <ul style="list-style-type: none"> <li>• Gravitational settling chamber.</li> <li>• Cyclone.</li> </ul>	Explain 8.1-8.3.	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen,			

	<ul style="list-style-type: none"> <li>• Scrubber</li> <li>• Pressure gauge</li> <li>• Bag house filter</li> <li>• Eletrostatic precipitator.</li> </ul> <p>8.3 Describe the following processes for the control of gaseous pollutants:</p> <ul style="list-style-type: none"> <li>• Absorption</li> <li>• Adsorption</li> <li>• Condensation</li> <li>• Combustion</li> </ul>		Magnetic Board, etc.			
<b>General Objective 9.0: Understand Solid Waste Management</b>						
14	<p>9.1 State sources of solid waste.</p> <p>9.2 Classify solid waste.</p> <p>9.3 Explain public health aspects of solid waste management.</p> <p>9.4 Describe the following solid waste management methods:</p> <ul style="list-style-type: none"> <li>• Disposal methods: open dumping, sanitary land fill.</li> <li>• Incineration</li> <li>• Composting</li> </ul> <p>9.5 Explain recovery and recycling of solid waste.</p>	Explain 9.1-9.5.	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			
<b>General Objective 10.0: Understand Noise Pollution and Control</b>						
15	<p>10.1 Define noise pollution</p> <p>10.2 State sources of noise pollution.</p> <p>10.3 Explain the allowable limits of noise pollution for different areas.</p> <p>10.4 Explain the problems of noise pollution and measures to control them.</p> <p>10.5 Explain noise pollution</p>	Explain 10.1-10.5.	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			

	control devices.					
<b>General Objective 11.0: Understand radiation and heat control in the cement industry.</b>						
	11.1 Explain sources of radiation. 11.2 Explain sources of heat. 11.3 Explain problems associated with 11.1 and 11.2. 11.4 Explain control and safety measures to mitigate radiation and heat pollution.	Explain 11.1 – 11.4	Instructional Manual. Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Assignment	At least Two (2) assignments.	20
Total		100

PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY

COURSE TITLE: FUNDAMENTALS OF THERMODYNAMICS

COURSE CODE: CET122

CREDIT UNIT: 4

CONTACT HOUR: 4 HOURS/WEEK

GOAL: The course is designed to provide the students with knowledge on basic principles of thermodynamics in the cement industry.

## **GENERAL OBJECTIVES**

On completion of the course the student should:

1. Understand the basic principles of thermodynamics
2. Know the processes of thermodynamics.
3. Understand the first law of thermodynamics.
4. Know the applications of perfect gas laws to mixtures of gases and vapours.
5. Know different types of fuels and their composition.
6. Understand the second law of thermodynamics.
7. Know basic calculation in thermo-chemistry.

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>				<b>COURSE CODE: CET 122</b>

<b>COURSE SPECIFICATION: FUNDAMENTALS OF THERMODYNAMICS</b>				<b>PRACTICAL CONTENTS:</b>		
<b>GOAL:</b> The course is designed to provide the students with knowledge on basic principles of thermodynamics in the cement industry.						
<b>WEEK</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>		<b>TEACHERS ACTIVITIES</b>		<b>LEARNING RESOURCES</b>	
	<b>GENERAL OBJECTIVE: 1.0: Understand the basic principles of thermodynamics</b>					
<b>WEEK</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHER'S ACTIVITIES</b>	<b>LEARNING RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHER ACTIVITIES</b>	<b>LEARNING RESOURCES</b>
1-2	1.1 Define thermodynamics. 1.2 List the different thermodynamic processes and their characteristics. 1.3 Explain internal energy of gases. 1.4 Derive the characteristic equation of ideal gases i.e. $PV = nRT$ . 1.5 State the Zeroth law of thermodynamics..	Explain activities 1.1-1.5 to the students.	Video clips, Pictures, Power point slides, Marker Board, Recommended textbooks, Lesson notes, etc.	Determine temperature experimentally, when the thermometric property value at certain fixed points is given and scale of temperature is prescribed.	Guide the students to perform experiment to determine temperature when the thermometric property value at certain fixed points is given.	Immersion heaters, Thermometers.
	<b>General Objective 2.0: Know the processes of thermodynamics.</b>					
3-4	2.1 Explain the constant volume process 2.2 Show that the work done is equal to zero for non-flow processes 2.3 Explain constant pressure process. 2.4 Show that work done is equal	Explain activities 2.1-2.5 to the students.	Video clips, Pictures, Power point slides, Marker Board, Recommended textbooks, Lesson	-	-	-

	to change in internal energy and heat added. 2.5 Explain constant temperature process and determine the work done.		notes, etc.			
--	---	--	-------------	--	--	--

**GENERAL OBJECTIVES: 3.0: Understand the first law of thermodynamics.**

WEEK	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITIES	LEARNING RESOURCES	SPECIFIC LEARNING OUTCOMES	TEACHER ACTIVITIES	LEARNING RESOURCE
5-6	3.1 Define: <ul style="list-style-type: none"> <li>• Open and close systems.</li> <li>• Phase equilibrium.</li> <li>• Isothermal and adiabatic processes.</li> <li>• Extensive and Intensive properties.</li> <li>• State function.</li> <li>• Path functions.</li> <li>• Internal energy.</li> <li>• Enthalpy</li> </ul> 3.2 Define heat and work as applied to thermodynamic systems and the signs associated with them. 3.3 State the first law of thermodynamics for flow and non-flow system. 3.4 Define specific heat capacity at constant volume and constant pressure processes. 3.5 Calculate energy of	Explain activities 3.1-3.6 to the students.	Video clips, Pictures, Power point slides,  Marker Board, Recommended textbooks, Lesson notes, etc.	Determine specific heat capacities for solids and liquid experimentally.	Guide the students to perform the experiment to determine heat capacities for solids, and liquids.	Thermometer, Calorimeter

	conservation for batch and continuous processes.					
<b>GENERAL OBJECTIVES: 4.0: Understand the application of perfect gas laws to mixtures of gases and vapours.</b>						
9- 10	4.1 Define vapour pressure. 4.2 Distinguish between vapour and gas. 4.3 Define critical conditions (pressure, volume and temperature). 4.4 Convert partial pressure to mole fraction, volume percent or any. 4.5 Convert weight percent to volume percent. 4.6 Calculate average weight of gas mixtures. 4.7 Calculate the pressure, volume and temperature of gases using compressibility factors. 4.8 Convert gas composition from wet to dry bases and vice versa.	Explain activities 4.1- 4.8 to the students.	Video clips, Pictures, Power point slides, Marker Board, Recommended textbooks, Lesson notes, etc.	Determine the composition of an exhaust gas.  Determine CO, CO <sub>2</sub> , NO <sub>x</sub> and SO <sub>2</sub> of air.  Determine CO, CO <sub>2</sub> , NO <sub>x</sub> and SO <sub>2</sub> of stack gases.  Determine CO, CO <sub>2</sub> , and HC of exhaust gases from vehicle.	Guide the students to conduct the practical.	High volume sampler.  Slack monitoring kit.  Portable emission analyzer.  Orsat gas analyser
<b>General Objectives 5.0: Know different types of fuels and their composition</b>						
<b>WEEK</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>LEARNING RESOURCE</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>LEARNING RESOURCE</b>
7 - 8	5.1 Define Fuel. 5.2 List typical solid, liquid and gaseous fuels and their sources 5.3 State the chemical composition of fuels. 5.4 Define complete, incomplete and stoichiometric combustion.	Explain activities 5.1- 5.7 to the students.	Video clips, Pictures, Power point slides, Marker Board, Recommended	Determine the calorific values of fuels.	Guide the students to perform experiment to determine the calorific values of fuels.	Bomb calorimeter

	<p>5.5 Define air fuel ratio, rich and weak mixture, and mixture strength.</p> <p>5.6 Evaluate the theoretical quantity of air required in combustion.</p> <p>5.7 Define gross (higher) and net (lower) calorific values.</p>		textbooks, Lesson notes, etc.			
<b>GENERAL OBJECTIVES: 6.0: Understand second law of thermodynamics.</b>						
11	<p>6.1 Define the second law of thermodynamics.</p> <p>6.2 Explain the thermodynamics basis for temperature scale.</p> <p>6.3 Define spontaneous, reversible and irreversible changes, equilibrium and maximum work.</p> <p>6.4 Explain the functions H, U, G, S and their properties (H= enthalpy, U = internal energy, G= Gibbs free energy and S= entropy).</p>	<p>Explain activities 6.1-6.4 to the students</p>	<p>Video clips, Pictures, Power point slides,</p> <p>Marker Board,</p> <p>Recommended textbooks, Lesson notes, etc.</p>	-	-	-
<b>GENERAL OBJECTIVES: 7.0: Know the basic calculation in thermo-chemistry.</b>						
12- 14	<p>7.1 Define heat of formation, reaction and combustion.</p> <p>7.2 Calculate change in enthalpy of gas with temperature by interative and by using mean heat capacities.</p> <p>7.3 Calculate heat of reaction and combustion from heat of formation and vice versa at 25°C.</p>	<p>Explain activities 7.1-7.4 to the students.</p> <p>Illustrate with examples 7.2 – 7.4</p>	<p>Video clips, Pictures, Power point slides, Marker Board,</p> <p>Recommended textbooks, Lesson notes, etc.</p>	<p>Determine heat of reaction and solution experimentally.</p> <p>Determine heat of combustion.</p>	<p>Guide the students to perform experiment to determine heat of reaction.</p> <p>Guide the students to perform experiment to determine heat of solution.</p>	<p>Apparatus for heat of reaction, heat solution and heat combustion.</p>

	7.4 Calculate heat of reaction at various temperature and adiabatic reaction temperatures.				Guide the students to perform experiment to determine heat of combustion.	
--	--	--	--	--	---	--

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) practical exercises to be assessed by the teacher	20

					<b>THEORETICAL: 2HOURS/WEEK</b>	
<b>YEAR/SEMESTER:</b> ND I/ 2 <sup>nd</sup>			<b>PRE-REQUISITE:-</b>		<b>PRACTICAL:0HOURS/WEEK</b>	
<b>Goal:</b> To enable the students acquire basic knowledge of Kiln Operations and Control						
<b>GENERAL OBJECTIVE 1:0</b> Know types of kiln.						
<b>THEORETICAL CONTENTS</b>			<b>PRACTICAL CONTENTS</b>			
<b>WK</b>	<b>Specific Learning Outcome</b>	<b>Teacher's Activities</b>	<b>Resources</b>	<b>Specific Learning Outcome</b>	<b>Teacher's Activities</b>	<b>Resources</b>
	1.1 Describe Kiln 1.2 Describe the following types: i. Wet kiln ii. Lepol kiln iii. Long dry kiln iv. Pre-heater kiln iv Precalciner kiln  1.3 Differentiate between static (chamber and shaft kiln) and rotary/planetary kiln.  1.4 Draw a schematic diagram of a kiln.  1.5 Explain the operations of each section in 1.4.	Explain activities 1.1-1.5 to the students.	Instructional Manual, Video clips Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.		-	-
<b>General Objective 2:0</b> Know the different zones in the kiln.						
2	2.1 List the zones in the kiln. 2.2 Explain various kiln zones relative to temperature. 2.3 Explain the transformation of raw meal in the various kiln zones.	Explain activities 2.1-2.3 to the students.	Instructional Manual, Video clips, Simulator, prototype kiln, Recommended textbooks, e-Books, lecture notes, charts, Marker Board, PowerPoint Projector, Screen, etc.	-	-	-

<b>General Objective 3.0 Understand Types of Coolers</b>						
3-5	3.1 Define coolers. 3.2 List types of coolers. 3.3 Describe each type of coolers in 3.2 with sketches. 3.4 Explain the functions of a cooler. 3.5 Calculate heat balance of a cooler. 3.6 State merits and demerits of each in 3.3.	Explain activities 3.1-3.6 to the students.  Guide students through simple calculation of heat balance.	Instructional Manual, Video clips, Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, etc.			
<b>General Objective 4.0: Understand basic kiln operations.</b>						
6	4.1 Describe preheater induced draft fan (ID fan) and its functions. 4.2 Describe the process of igniting the burner pipe. 4.3 List the equipment involved in heating up the kiln. 4.4 Describe the procedure of heating up the kiln. 4.5 Explain the ignition procedure of calciner burner. 4.6 List all equipment involved and their uses in feed-taking of the kiln. 4.7 Describe the feed-taking operation of the kiln. 4.8 Explain kiln rotation relative to its feed (charge) and torque. 4.9 Explain the following possible kiln process upset: -Cycling -Coating collapse -Ring break out (clinker ring break out)	Explain activities 4.1-4.11 to the students.	Instructional Manual, Video clips, Simulator, prototype kiln, Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, Magnetic Board, etc.			

	-Sinter, middle, meal and mud rings -Hot meal rush(avalanche) -Red spot on the kiln shell 4.10 Explain loss of kiln feed. 4.11 Describe startup and shutdown procedures. 4.12 Explain safety and general considerations around the kiln.					
<b>General Objective 5.0: Understand basic kiln control.</b>						
6	5.1 Define control. 5.2 Explain kiln control and its importance. 5.3 Explain basic kiln control parameters 5.4 Explain kiln control rules.	Explain activities 5.1-5.4 to the students.	Instructional Manual, Video clips, Simulator, prototype kiln, Recommended textbooks, e-Books, lecture notes, Marker Board, PowerPoint Projector, Screen, etc.	Carry out basic kiln operations and control using Kiln simulator/CECIL software.	Demonstrate the use of a kiln simulator/CECIL software.	Kiln simulator/CECIL software.

# **SEMESTER 3 ND 2**

<b>PROGRAMME:</b> GENERAL STUDIES	<b>COURSE CODE:</b> GNS 201	<b>CREDIT HOURS:</b> 2Hrs/Wk
<b>COURSE:</b> USE OF ENGLISH II <b>SEMESTER:</b> Three		
<b>CODE:</b> GNS 201		
<b>UNITS:</b> 2.0	<b>PRE-REQUISITE:</b> 102	<b>PRACTICALS:</b>

**COURSE MAIN AIM/GOAL:** This course is designed to consolidate the student's competence in the use of English. At the end of the course the student should understand the rules and techniques of English grammar and perform well in the use of the language.

**GENERAL OBJECTIVES:**

On completion of this course the student should:

- 1.0 Understand the rules of grammar.
- 2.0 Write good essays.
- 3.0 Comprehend the difference between denotative and connotative uses of words.
- 4.0 Understand the techniques of comprehension and summary writing.
- 5.0 Appreciate literature in English.

	1.5 Identify the different types of sentences e.g. simple compound, complex and compound-complex.	Explain with examples, the different types of sentences.		<ul style="list-style-type: none"> <li>➤ Identify types of sentences.</li> <li>➤ construct sentences.</li> </ul>		
--	---	--	--	--	--	--

**General Objective:**2.0 Write good essays.

**Theoretical Content**

**Practical Content**

Week	Specific Objectives	Teacher Activity	Resources	Specific Learning Outcomes	Teacher's Activities	Evaluation
	<b>Essay:</b> 1.1 List the different types of essay.	Explain with relevant examples the different types of essay.	Textbooks, Marker Board, Marker, Project, CD/DVD	<ul style="list-style-type: none"> <li>➤ Define essay, list the different types of essay.</li> <li>➤ Identify the features of each type of essay listed in 2.1. above.</li> <li>➤ Generate/gather relevant information on a given topic.</li> <li>➤ Draw up a good outline.</li> <li>➤ Write a good essay on a given topic.</li> </ul>	Assist Supervise, Guide and Correct students' activities	Class work Assignment Tests

**General Objective:**3.0 Comprehend the difference between denotative and connotative uses of words.

**Theoretical Content**

**Practical Content**

Week	Specific Objectives	Teacher Activity	Resources	Specific Learning Outcomes	Teacher's Activities	Evaluation
	<p><b>Denotations and Connotations</b></p> <p>3.1 Define the term denotation.</p> <p>3.2 Explain the term Connotation.</p>	<p>Explain denotation with examples.</p> <p>Explain connotation with examples.</p>	Textbooks, Marker Board, Marker, Project, CD/DVD	<ul style="list-style-type: none"> <li>➤ Define denotation.</li> <li>➤ Identify words used denotatively.</li> <li>➤ Define connotation with examples.</li> <li>➤ Use words connotatively.</li> <li>➤ Distinguish between denotative and connotative usage.</li> </ul>	<ul style="list-style-type: none"> <li>➤ Assist Supervise, Guide and Correct students' activities.</li> <li>➤ Provide sentences</li> </ul>	

**General Objective:** 4.0 Understanding the techniques of comprehension and summary writing.

**Theoretical Content**

**Practical Content**

Week	Specific Objectives	Teacher Activity	Resources	Specific Learning Outcomes	Teacher's Activities	Evaluation
	<p>4.1 Define comprehension</p> <p>4.2 Define summary writing.</p>	<ul style="list-style-type: none"> <li>➤ Explain the concept of comprehension.</li> <li>➤ Give hints on answering questions on comprehension passages.</li> </ul> <p>Explain summary.</p>	Textbooks, Marker Board, Marker, Project, CD/DVD	<ul style="list-style-type: none"> <li>➤ Define comprehension.</li> <li>➤ Answer questions on passages read.</li> <li>➤ Define summary.</li> <li>➤ Write within a specified length, good summary of given passages.</li> <li>➤ Give contextual explanation to statements from the texts used.</li> </ul>	Assist Supervise, Guide and Correct students' activities.	Class work Assignments Tests

**General Objective:**5.0 Appreciate literature in English.

**PROGRAMME:** NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY

**COURSE TITLE:** RESEARCH METHODOLOGY

**CODE:** GNS228

**CREDIT UNITS:** 2

**CONTACT HOURS:** 2 HOURS/WEEK

**GOAL:** This course is designed to provide the students with the tools to carryout research project on a topic pertinent to Cement Engineering Technology.

**On completion of the course, the student should be able to:**

1. Understand research management.
2. Understand the importance of research.
3. Understand types of project.
4. Understand steps in the research process.
5. Know result presentation.
6. Understand Referencing.

<b>COURSE: RESEARCH METHODOLOGY</b>		<b>COURSE CODE: GNS 228</b>		<b>CONTACT HOURS: 2 HOURS/WEEK</b>		
<b>Course Specification: Theoretical &amp; Practical Contents</b>						
<b>Goal:</b> This course is designed to provide the students with the tools to carryout research project on a topic pertinent to Cement Engineering Technology.						
<b>WEEK</b>	<b>General Objective 1.0: Understand research management.</b>					
	<b>Theoretical Content</b>			<b>Practical Content</b>		
	<b>Specific Learning Outcomes</b>	<b>Teacher's Activities</b>	<b>Resources</b>	<b>Specific Learning Outcomes</b>	<b>Teacher's Activities</b>	<b>Resources</b>
<b>1-3</b>	<p>1.1 Explain data gathering and presentation.</p> <p>1.2 Explain Technical Correspondence letter of inquiring and replies letter of application, overview of research.</p> <p>1.3 Explain the logic/Breakthrough in research methods.</p>	- Explain and make relevant lecture notes.	- Overheard projector, slides and Marker Board	- Collect and analyse available data.		- Test, Assignment, seminars, oral interviews and examination. - Practical assessment.
	<b>General Objective 2.0: Understand the importance of research</b>					
<b>4-6</b>	<p>2.1 Introduction to research identification and formulation of problems, research objective relevance to the industries and academic.</p> <p>2.2 Research literature and material gathering</p>	- Explain and make relevant lecture notes.	- Overheard projector, slides and Marker Board	<p>- Identify and formulate research problems and objectives relevant to the industry and academia.</p> <p>- Conduct literature review and material gathering</p>	- Explain	- Test, Assignment, seminars, oral interviews and examination. - Practical assessment.

	<b>General Objective 3.0: Understand types of project.</b>					
<b>7 - 8</b>	<p>3.1 Explain different types of research projects.</p> <ul style="list-style-type: none"> <li>- Experimental</li> <li>- Analytical,</li> <li>- Modelling</li> <li>- Validation and</li> <li>- Simulation types.</li> </ul>	<ul style="list-style-type: none"> <li>- Explain, analyse and make relevant lecture notes.</li> </ul>	<ul style="list-style-type: none"> <li>- Overhead projector, slides and Marker Board</li> </ul>	Identify different types of research projects	<ul style="list-style-type: none"> <li>- Explain</li> </ul>	<ul style="list-style-type: none"> <li>- Test, Assignment, seminars, oral interviews and examination.</li> <li>- Practical assessment.</li> </ul>
	<b>General Objective 4.0: Understand steps in the research process.</b>					
<b>9 - 10</b>	<p>4.1 List the steps involves in carrying a research.</p> <p>4.2 Discuss the various steps in Research.</p> <ul style="list-style-type: none"> <li>- Review of relevant literatures.</li> <li>- Formulation of research questions.</li> </ul> <p>4.3 Describe methods for data collection.</p> <p>4.4 Discuss data analysis methodology.</p> <p>4.5 Explain method of Recording results</p>	<p>Explain activities 4.1-4.7 to the students and prepare detailed lecture notes and relevant diagrams with video clips.</p>	<p>Overhead projector, slides and Marker Board</p>			

	<p>4.6 Explain how to analyze data while carrying out a research</p> <p>4.7 Explain how to make conclusions based on data analysis.</p>					
<b>General Objective 5.0: Know result presentation</b>						
11-13	<p>5.1 Explain Engineering Sub routing available. Presentation of results. Trend in engineering research Student paper writing.</p> <p>5.2 Explain purpose of report writing</p> <p>5.3 Explain the importance of literature review</p> <p>5.4 Explain data measurement</p> <p>5.5 Apply the use of tables graphs in data presentation</p> <p>5.6 Examine methods of data interpretation</p>	<ul style="list-style-type: none"> <li>- Explain and apply MS-EXCEL and MATLAB in data analysis</li> </ul>	<ul style="list-style-type: none"> <li>- Overheard projector, slides and Marker Board</li> <li>- PCs with MS-WORD, EXCEL and MATLAB software</li> </ul>	<ul style="list-style-type: none"> <li>- Apply EXCEL or MATLAB to present research results.</li> </ul>	<ul style="list-style-type: none"> <li>- Explain with EXCEL or MATLAB for the students to learn and allow them to perform the task.</li> </ul>	<ul style="list-style-type: none"> <li>- Test, Assignment, seminars, oral interviews and examination.</li> <li>- Practical assessment.</li> </ul>

	5.7 Evaluate oral presentation of information					
	<b>General Objective 6.0: Understand referencing.</b>					
<b>14 - 15</b>	6.1 List the different types of references.  6.2 Discuss the various types of references in 6.1  6.3 Explain the term plagiarism  6.4 Discuss how plagiarism can be avoided	Explain activities 6.1-6.4 to the students and prepare detailed lecture notes and relevant diagrams with video clips.	Overheard projector, slides and Marker Board			

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE TITLE: PRACTICE OF ENTREPRENEURSHIP</b>	<b>COURSE CODE: EEd 216</b>	<b>UNIT:3</b>	<b>CONTACT HOURS: 3HOURS/WEEK</b>
			<b>THEORETICAL: 12HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/1</b>	<b>PRE-REQUISITE: NONE</b>		<b>PRACTICAL: 2HOURS/WEEK</b>

**Goal:** this course is designed to enable students to acquire the knowledge of entrepreneurship

**General Objectives:**

On completion of this course, the student should be able to:

- 1.0 Understand Financial Management
- 2.0 Know how to prepare simple accounts
- 3.0 Know simple cost preparation
- 4.0 Know product and job costing
- 5.0 Understand the Laws relating to formation of Companies
- 6.0 Understand Labour and Industrial Law
- 7.0 Understand Copyright and patent laws
- 8.0 Understand the nature of sale of goods

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>

<b>YEAR/SEMESTER: ND II/ 1</b>			<b>PRE-REQUISITE : NONE</b>	<b>THEORETICAL: 1HOURS/WEEK</b>		
				<b>PRACTICAL: 2HOUR/WEEK</b>		
<b>Goal:</b> this course is designed to enable students to acquire the knowledge of entrepreneurship						
<b>General objective 1:0</b> Understand Financial Management						
<b>THEORETICAL CONTENT</b>				<b>PRACTICAL CONTENT</b>		
WEEK\S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITY	RESOURCES	SPECIFIC LEARNING OUTCOME	TEACHER'S ACTIVITY	RESOURCES
1-2	1.1 Define financial management 1.2 Explain sources and types of finding 1.3 Define the concepts of cost, price, revenue, profit and break-even point. 1.4 Explain financial statements e.g budgeting, balance sheet, profit and loss accounts, and cash flow budget.	Illustrate activities in 1.1 -1.4	Marker, Magi-board Manuals, Recommended textbooks, Lecture notes, Ropes and Chairs pulley boice.			
<b>General objective 2:0</b> Know how to prepare simple accounts						
3-4	2.1 Explain Dealing with assets 2.2 Prepare profit and loss statement. 2.3 Prepare balance sheet.	Illustrate activities in 2.1 -2.3	Marker, Magi-board Manuals, Recommended textbooks, Lecture notes, Ropes and Chairs pulley boice.			
<b>General objective 3:0</b> Know simple cost preparation						
5-6	3.1 Determine labour costs. 3.2 Determine direct machine cost. 3.3 Determine Overheads: labour, machine, and general	Illustrate activities in 3.1 -3.3	Marker, Magi-board Recommended textbooks, Manuals, lecture notes, etc. Dusters			
<b>General objective 4:0</b> Know product and job costing						
7-8	4.1 Explain product costing 4.2 Explain Job costing	Illustrate activities in 4.1-4.3 with diagrams	Marker, Magi-board Recommended			

	4.3 Explain Project costing	and make notes where necessary	textbooks, Manuals, lecture notes, etc. Dusters			
	<b>General objective 5:0</b> Understand the Laws relating to formation of Companies					
9-10	5.1 Identify the fundamental concepts in company law. 5.2 Explain memorandum and Articles of Association. 5.3 Explain promoters, promotion and the prospectus. 5.4 Distinguish between shares and debentures. 5.5 Analyse the functions and powers of Directors, Secretaries and Auditors. 5.6 Explain liquidation of companies.	Illustrate activities in 5.1-5.6 with diagrams and make notes where necessary	Marker, Magi-board Recommended textbooks, Lecture notes, Manuals, Marker, Magi-board , Duster, etc.			
	<b>General Objective 6.0:</b> Understand Labour and Industrial Law					
13-14	6.1 Analyse the laws relating to employer-employee relationship 6.2 Explain industrial safety laws. 6.3 Examine water and public health laws. 6.4 Evaluate land acquisition.	Illustrate activities in 6.1-6.4 with diagrams and make notes where necessary	Recommended textbooks, Lecture notes, Manuals, Marker, Magi-board , Duster, etc.			
	<b>General Objective 7.0:</b> Understand Copyright and patent laws					
13-14	7.1 Explain copyrights 7.2 Explain patent. 7.3 Explain rights and liabilities under the copyrights and patent laws. 7.4 Evaluate beach and remedies	Illustrate activities in 7.1-7.4 with diagrams and make notes where necessary	Recommended textbooks, Lecture notes, Manuals, Marker, Magi-board , Duster, etc.			
	<b>General Objective 8.0:</b> Understand the nature of sale of goods					

13-14	8.1 Define contract of sale of goods 8.2 Distinguish sale of goods from other contracts e.g. hire purchase and works and materials. 8.3 Explain duties of the parties. 8.4 Explain passing of properties and titles. 8.5 Examine breach and remedies.	Illustrate activities in 8.1 -8.5	Recommended textbooks, Lecture notes, Manuals, Marker, Magi-board, Duster, etc.			
-------	---	-----------------------------------	---	--	--	--

**Assessment:**

<b>Programme:ND CEMENT ENGINEERING TECHNOLOGY</b>	<b>Course Code: MTH 211</b>	<b>UNIT: 2</b>	<b>Total Contact Hours:</b>
<b>COURSE TITLE: CALCULUS</b>			<b>Theoretical: 2 hours/week</b>
<b>Year/Semester: ND II /1</b>	<b>Pre-requisite:-</b>		<b>Practical: 0 hours/week</b>

**Goal:** To enable the students acquire the basic knowledge of differential and integral calculus and apply same in solving problems.

**General Objectives:** On the completion of the course, the students should

- 1.0** Understand the basic concepts of differential calculus and its application in solving engineering problems.
- 2.0** Know integration as the reverse of differentiation and its application to engineering problems.
- 3.0** Understand first order homogenous linear ordinary differential equations with constant coefficients as applied to simple circuits.
- 4.0** Understand the basic concepts of partial differentiation and apply same to engineering problems.
- 5.0** Understand the methods of solving second order differential equations
- 6.0** Understand Laplace transform
- 7.0** Understand double integrals and their geometric and physical application.

**PROGRAMME: NATIONAL DIPLOMA PROGRAMME IN CEMENT ENGINEERING TECHNOLOGY**

**COURSE/TITLE: Calculus**

**CODE: MTH 211**

**CH/CU: 2**

**GOAL:** To enable the students acquire the basic knowledge of differential and integral calculus and apply same in solving problems.

**GENERAL OBJECTIVE 1.0:** Understand The Basic Concepts of Differential Calculus And Their Application In Solving Engineering Problems.

	<b>THEORETICAL CONTENT: 2 hours/week</b>			<b>PRACTICAL CONTENT: 0hours/week</b>		
<b>WK/S</b>	<b>Specific Learning Outcome</b>	<b>Teacher Activities</b>	<b>Resource</b>	<b>Specific Learning Outcome</b>	<b>Teacher Activities</b>	<b>Resource</b>
1-4	1.1 Define limits with examples. 1.2 State and prove the basic theorems on limits. 1.3 Prove that $\lim_{\theta \rightarrow 0} \frac{\tan \theta}{\theta} = 1$ $\lim_{\theta \rightarrow 0} \frac{\sin \theta}{\theta} = 1$ 1.4 Define differentiation as an incremental notation of a function. 1.5 Differentiate a function from first principles. 1.6 Prove the formulae for derivative of functions, Function of a function, products, and quotient of functions. 1.7 Differentiate simple algebraic, trigonometric, logarithmic, exponential, hyperbolic parametric, inverse and implicit functions. 1.8 Derive second derivative of a function. 1.9 Apply differentiation to simple engineering and technological problems. 1.10 Explain the rate of change of a function 1.11 Explain the condition for turning point of a function. 1.12 Distinguish between maximum and minimum value of a function. 1.13 Sketch the graph of a function showing its maximum, minimum points and points of inflexion. 1.14 Estimate error quantities from	Define the limits and gives examples.  Prove sine and tangent of limit to be one (1) as $\theta$ tends to zero (0).  Differentiate a function from first principles.  Show the formulae for derivative of functions, Function of a function, products, and quotient of functions.  Differentiate simple algebraic, trigonometric, logarithmic, exponential, hyperbolic parametric, inverse and implicit functions.  Explain the rate of change of a function and the condition for turning point of a function.  Explain the differences between maximum and minimum value of a function.	Recommended textbooks, Marker Board, Lecture notes, multimedia projector, and computer.	Define the limits and give examples. Total		100

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE TITLE: FLUID MECHANICS</b>	<b>COURSE CODE: MEC 214</b>	<b>UNIT:4</b>	<b>CONTACT HOURS: 4HOURS/WEEK</b>
			<b>THEORETICAL: 2HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/1</b>	<b>PRE-REQUISITE: NONE</b>		<b>PRACTICAL: 2HOURS/WEEK</b>

**Goal:** this course is designed to enable students to acquire the knowledge of fundamentals of fluid measurements applicable to cement engineering

**General Objectives:**

On completion of this course, the student should be able to:

1. Know the Classification, Types of Fluid and their Characterize Properties
2. Understand the concept of pressure and the principles of pressure
3. Understand Archimedes principles
4. Understand energy and motion of fluid for one dimensional flow
5. know the momentum equation and its practical application
6. Understand the fundamentals of Hydrostatics
7. Understand the fundamental elements of fluid Dynamics

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>COURSE TITLE:</b> FLUID MECHANICS		<b>COURSE CODE:</b> MEC 214		<b>UNIT: 4</b>	<b>CONTACT HOURS: 4HOURS/WEEK</b>	
					<b>THEORETICAL: 2HOURS/WEEK</b>	
<b>YEAR/SEMESTER: ND II/ 1</b>		<b>PRE-REQUISITE : NONE</b>			<b>PRACTICAL: 2HOUR/WEEK</b>	
<b>Goal:</b> this course is designed to enable students to acquire the knowledge of fundamentals of fluid measurements applicable to cement engineering						
<b>General objective 1:0 Know the Classification, Types of Fluid and their Characterize Properties</b>						
<b>THEORETICAL CONTENT</b>				<b>PRACTICAL CONTENT</b>		
WEEK\S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITY	RESOURCES	SPECIFIC LEARNING OUTCOME	TEACHER'S ACTIVITY	RESOURCES
1-2	1.0 Comprehend classification types and characteristics of fluids	Explain the different types of fluids	Textbooks Marker Board, duster, maker	Know types and characteristics of fluids	Determine the viscosity of different types of fluids experimentally	Different types of fluid Viscometer

<b>General objective 2:0 Understanding the concept of pressure and the principles of pressure</b>						
3-4	2.1 Explain the concept of pressure and the principle of pressure measurement/ 2.2 Understand Pressure distribution over plane and curved surfaces.	Explain the concept of pressure and the principle of pressure measurement	Textbook, notes, Marker Board, duster, maker	Test the accuracy of a gauge	Perform Pressure gauge calibration experiment	Pressure gauge and dead weights,
<b>General objective 3:0 Understanding Archimedes principles</b>						
5-6	3.1 Explain the Principle of Archimedes	Explain and principle of Archimedes and all the parameters in it.	Textbook, notes, Marker Board, duster, maker	Verify Archimedes principles	Demonstration of pressure drops in the laboratory using ship models  Perform Floating bodies experiment  Perform Buoyancy experiment	Metacentric height
<b>General objective 4:0 Understand energy and motion of fluid for one dimensional flow</b>						
7-8	4.1 Explain fluid and one dimensional flow	Explain uniform & uniform flows  Describe nature of motion around blunt and stream line bodies  Describe velocity profile, boundary layer separation  Explain the principle of shear flow	Textbook, notes, Marker Board, duster, maker	Carryout fluid flow through orifices	Perform Orifices jet experiment	Orifices and jet apparatus
<b>General objective 5:0 Know the momentum equation and its practical application</b>						

9-10	5.1 Describe momentum and its application  5.2 State the effects of fluid friction in pipes and channels	Explain momentum and its application  State the differences between frictional factor and Reynolds number  Explain flow characteristics of pumps and turbines	Textbook  White marker board, multimedia	Demonstrate fluid flow  Demonstrate effects of friction in fluid flow	Perform Impact of jet experiment	Impact of jet apparatus
<b>General Objective 6.0: Understand the concept of Hydrostatics</b>						
13-14	6.1 Define pressure, density, surface tension, viscosity, compressibility 6.2 State Hydrostatics equation and its integration for incompressible fluids 6.3 Identify fluid pressure distribution over plain and curved surfaces 6.4 Describe measurement of pressure	Describe the fundamental elements of statics: i. Pressure ii. Density iii. Velocity iv. Surface tension	Recommended Textbooks, Marker Board, marker, Projector	Demonstrate fluid flows through channels of circular cross section and parallel plates.	Perform the experiment on fluid flows through large channels of low viscosity	Open channel apparatus
<b>General Objective 7.0: Understand the fundamental elements of fluid Dynamics</b>						
15	7.1 Define the following teams: <ul style="list-style-type: none"> <li>Steady and unsteady fluid flow</li> <li>Streamlines fluids flow, steam tubes</li> <li>Two and three dimensional flow, uniform and non-uniform flows, laminar and turbulent flows</li> </ul>	Describe the following teams: <ul style="list-style-type: none"> <li>Steady and unsteady fluid flow</li> <li>Streamlines fluids flow, steam tubes</li> <li>Differentiate between two and three dimensional flow,</li> <li>Differentiate between</li> </ul>	Textbooks, Marker Board, marker, Projector	Determine types of fluid flows and their characteristics  Demonstrate laminar and turbulent flows	Demonstrate types of fluid flows and their characteristics  Perform laminar and turbulent flows experiment	Pressure gauge and dead weights  Viscometers

		uniform and non-uniform flows, • Differentiate between laminar and turbulent flows				
--	--	---	--	--	--	--

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE TITLE:</b> PRINCIPLES OF UNIT OPERATIONS I	<b>COURSE CODE: CET 211</b>	<b>UNIT: 4</b>	<b>CONTACT HOURS: 4 HOURS/WEEK</b>
			<b>THEORETICAL: 2 HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/1</b>	<b>PRE-REQUISITE: NONE</b>		<b>PRACTICAL: 2 HOURS/WEEK</b>

**Goal:** This course is designed to enable students to acquire the knowledge of basic fundamentals of size reduction and homogenization applicable to cement and allied industries.

**General Objectives:**

On completion of this course, the student should be able to:

- 1.0 Know the techniques of particle size analysis.
- 2.0 Understand the principles and practice of particle screening in the industry.
- 3.0 Know the principles and practice of size reduction processes
- 4.0 Know particle separation processes.
- 5.0 Know material handling and conveying of solids
- 6.0 Understand storage of solids, size classification and air separators
- 7.0 Know blending and pre-homogenisation
- 8.0 Know the principles of liquid and solid mixing

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>COURSE TITLE: PRINCIPLES OF UNIT OPERATIONS I</b>		<b>COURSE CODE: CET 211</b>		<b>UNIT: 4</b>	<b>CONTACT HOURS: 4HOURS/WEEK</b>	
					<b>THEORETICAL: 2HOURS/WEEK</b>	
<b>YEAR/SEMESTER: ND II/ 1</b>		<b>PRE-REQUISITE : NONE</b>			<b>PRACTICAL: 2HOURS/WEEK</b>	
<b>Goal:</b> This course is designed to enable students acquire the knowledge of basic fundamentals of unit operations applicable to cement/allied industries.						
<b>General objective 1:0</b> Know the techniques of particle size analysis						
<b>THEORETICAL CONTENT</b>				<b>PRACTICAL CONTENT</b>		
WEEK\S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITY	RESOURCES	SPECIFIC LEARNING OUTCOME	TEACHER'S ACTIVITY	RESOURCES
1-4	1.1 Explain the meaning of particle size and shape. 1.2 Explain particle size distribution, size averaging and equivalence. 1.3 Explain the reasons for and methods of particle size analysis. 1.4 Identify the range of particle sizes found in dusts, powders, slurries and mists. 1.5 Explain size estimation in sub-micron range 1.6 State optimum sizes at various stages from extraction to mills. 1.7 Explain the influence of size fraction and reactivity. 1.8 Describe the following screening equipment: grizzlies, stationary, vibrating, curved and DSM screens & screen capacity. 1.9 Explain cumulative and frequency particle size distribution (Gaussian, poison, etc). 1.10 Distinguish mean particle diameters from the various size reduction units. 1.11 Analyse particle size using	Explain activities 1.1-1.12 to the students.	Marker, Magic-board Manuals, Recommended textbooks, Lecture notes,	Carry out experiments in screen analysis.	Guide the students to conduct the practical.  Show students how to calculate average particle size and standard deviation from experiment on screen analysis.	Raw sample, Sieves (mm – $\mu$ m), shaker log graph paper.

	<p>probability graph papers.</p> <p>1.12 Explain particle size measurement techniques: sieving, microscopy, sedimentation, permeability.</p>					
<b>General objective 2:0</b> Understand the principles and practice of particle screening in the industry.						
3-4	<p>2.1 Explain the need for industrial screening.</p> <p>2.2 Explain screening in dedusting operations.</p> <p>2.3 List various classifiers.</p> <p>2.4 Explain each in 2.3.</p> <p>2.5 Calculate screen capacity and effectiveness.</p>	<p>Explain activities 2.1 to 2.5 to the students.</p>	<p>Marker, Magic-board Manuals, Recommended textbooks, Lecture notes,</p>			
<b>General objective 3:0</b> Know the principles and practice of size reduction processes.						
5-6	<p>3.1 Explain the need for size reduction.</p> <p>3.2 Describe the common types of comminution equipment e.g. jaw crushers; gyratory crushers; roll mills; ball mills; dix mills etc.</p> <p>3.3 Explain the behavior of materials subjected to size reduction.</p> <p>3.4 State laws of size reduction (Bond's, Rittinger's, Kick's laws and Work index).</p> <p>3.5 Estimate power requirements of a size reduction process applying Bond's, Kick's, Rittinger's laws and Work index formulae.</p> <p>3.6 Explain the theory of crushing and grinding.</p> <p>3.7 Explain open and closed grinding circuit.</p> <p>3.8 Explain the factors affecting performance of size</p>	<p>Explain activities 3.1 to 3.8 to the students.</p>	<p>Marker, Magic-board Manuals, Recommended textbooks, Lecture notes,</p>	<p>Carryout experiment on particle size analysis to estimate and identify settling regimes.</p> <p>Determine energy and power requirements in crushing and grinding in the laboratory.</p>	<p>Guide students to carryout experiments.</p>	<p>Sieves, shaker, laboratory size crushing and grinding machine, raw mix, weighing balance.</p>

	reduction equipment.					
	<b>General objective 4:0</b> Know particle separation processes.					
7-8	<p>4.1 Describe the features and operation of: horizontal flow-setting tank; settling chamber for dust removal; gas cyclone; solid bowl centrifuge and electrostatic precipitator.</p> <p>4.2 Describe the different zones of separation.</p> <p>4.3 Describe the effect of flocculation on suspension sedimentation.</p> <p>4.4 Describe the measurements of settling rates for different concentrations of a suspension.</p> <p>4.5 Calculate maximum settling rate using given experimental data.</p>	Explain activities 4.1 to 4.5 to the students.	Marker, Magic-board Manuals, Recommended textbooks, Lecture notes,	<ul style="list-style-type: none"> <li>Carry out experiment to determine sedimentation rate with varying concentrations and heights of suspension.</li> <li>Determine experimentally factors (particle size, thickner, time, and composition) affecting the flow of slurries.</li> </ul>	Guide students to carryout experiments.	Glasswares, sedimentation study apparatus, thickner (Chloride based), centrifuge.
	<b>General objective 5:0</b> Know material handling and conveying of solids.					
9-10	<p>5.5 Explain the various systems of material handling, haulage and transportation from mines e.g trucks, dumpers, conveyors etc.</p> <p>5.6 Describe the features and operations of the following solid conveying systems: screw conveyors, bucket conveyors, belt conveyors, vibrator conveyors and pneumatic conveyors.</p> <p>5.7 State factors that determine conveyor selection.</p> <p>5.8 Explain pneumatic and hydraulic transportation of solids.</p>	Explain activities 5.1 to 5.4 to the students.	Marker, Magic-board Manuals, Recommended textbooks, Lecture notes,	<p>Carryout an industrial visit to cement/allied industries to observe materials handling and transportation.</p> <p>Write a report detailing the various methods of handling and transportation of materials.</p>	Guide students at the industrial visit.	Cement/allied industry. Video clips.
	<b>General Objective 6.0:</b> Understand storage of solids, size classification and air separators.					
13-14	6.1 Describe the storage of raw	Explain activities 6.1 to	Marker, Magic-			

	<p>materials in bins, silos, hoppers, and stockpiles.</p> <p>6.2 List methods of size classification.</p> <p>6.3 Explain each in 6.2.</p> <p>6.4 State types of air separators used in cement/allied product manufacturing.</p> <p>6.5 Explain the principle of operation in each of 6.4.</p> <p>6.6 Explain wet classification and hydro-cyclones.</p> <p>6.7 Describe cyclone material balances in open and closed circuit operations and their separating efficiencies.</p>	6.7 to the students.	board Manuals, Recommended textbooks, Lecture notes,			
<b>General Objective 7.0:</b> Know blending and pre-homogenisation						
15	<p>7.1 Explain preparation of cement raw meal as per raw mix design, combined &amp; segregated pre-homogenisation.</p> <p>7.2 List methods of pre-homogenisation, stacking of blending beds, chevron method and windrow method.</p> <p>7.3 Explain area stock piling, axial stock piling and continuous stock piling.</p> <p>7.4 List the equipment used for reclaiming materials from stockpiles.</p> <p>7.5 Explain blending bed theory, batch and continuous homogenisation.</p> <p>7.6 Explain Fuller's one-eighth blending method.</p> <p>7.7 Explain stacking of blending beds: in longitudinal and circular stockpiles system and their comparison.</p>	Explain activities 7.1 to 7.8	Marker, Magic-board Manuals, Recommended textbooks, Lecture notes,			

	<b>General Objective 8.0:</b> Know the principles of liquid and solid mixing.					
15	8.1 Describe a typical agitation equipment. 8.2 Explain the effects of baffles in agitation vessels. 8.3 Distinguish impellers in terms of flow types. 8.4 Explain axial and radial types of impellers. 8.5 Describe propellers, paddies and turbines. 8.6 Explain the effect of viscosity on the selection of mixers 8.7 Describe mixers for thick pastes e.g. kneaders, extruders etc. 8.8 Describe mixers for powders.	Explain activities 8.1 to 8.7 to the students.	Marker, Magic-board Manuals, Recommended textbooks, Lecture notes,			

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)

Total		100

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE TITLE: CEMENT PLANT SERVICES AND MAINTENANCE</b>	<b>COURSE CODE: CET 212</b>	<b>UNIT:3</b>	<b>CONTACT HOURS: 3HOURS/WEEK</b>
			<b>THEORETICAL: 1HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/1</b>	<b>PRE-REQUISITE: NONE</b>		<b>PRACTICAL: 2HOURS/WEEK</b>

**Goal:** This course is designed to enable the student acquire the knowledge of fundamentals of plant services and maintenance applicable to cement and allied industries

**General Objectives:**

On completion of this course, the student should be able to:

- 1.0 Know the general Safety Rules for maintenance
- 2.0 Know installation and commissioning of machinery in the cement industry
- 3.0 Understand utility services in plant operations and maintenance
- 4.0 Know how to maintain different types of bearings, gear box and impellers
- 5.0 Understand the principles of maintenance planning
- 6.0 Understand the maintenance of conveyors.
- 7.0 Understand the maintenance in the kiln section
- 8.0 Understand the maintenance of vertical roller mill and ball mill

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>COURSE TITLE: CEMENT PLANT SERVICES AND MAINTENANCE</b>		<b>COURSE CODE: CET 212</b>		<b>UNIT: 4</b>	<b>CONTACT HOURS: 4HOURS/WEEK</b>	
<b>YEAR/SEMESTER: ND II/ 1</b>		<b>PRE-REQUISITE : NONE</b>		<b>THEORETICAL: 2HOURS/WEEK</b>		<b>PRACTICAL: 2HOUR/WEEK</b>
<b>Goal:</b> this course is designed to enable students to acquire the knowledge of fundamentals of plant services and maintenance applicable to cement and allied industries						
<b>General objective 1:0</b> Know the general Safety Rules for maintenance.						
<b>THEORETICAL CONTENT</b>				<b>PRACTICAL CONTENT</b>		
WEEK\S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITY	RESOURCES	SPECIFIC LEARNING OUTCOME	TEACHER'S ACTIVITY	RESOURCES
1-2	1.1 List the safety rules for maintenance. 1.2 State factors affecting maintenance practices in the industry. 1.3 Explain types of maintenance. 1.4 Describe the various safety signs and signals 1.5 Explain safety drill	Explain activities 1.1-1.5 to the students	Markerboard Manuals, Recommended textbooks, safety charts	Identify safety signs and symbol in laboratory and workshop.  Conduct safety evaluation of a typical laboratory/workshop  Conduct safety drill	Guide students to carry out the practical exercise	Safety manuals and charts  Safety equipment
<b>General objective 2:0</b> Know installation and commissioning of machinery in the cement industry						
3-4	2.1 State factors affecting plant installation such as weight; size Stability, rigidity, and running speed. 2.2 State properties of concrete, metal, wood and bricks for plant installation 2.3 Describe typical machine foundation. 2.4 Describe the use of the following in machinery installation: Ropes and Chains, Kate's Tripod and shear legs, Forklift and pulley block, Mobile and overhead cranes, Derrick and	Explain activities 2.1-2.4 to the students	Markerboard Manuals, Recommended textbooks, safety charts	Watch a documentary on installation and commissioning of machinery in a cement plant.	Provide relevant video clips to demonstrate installation and commissioning of machinery.	Video clips Projectors, screens, etc

	gantry, etc					
	<b>General objective 3:0</b> Understand utility services in plant operations and maintenance.					
5-6	<p>3.1 State the utility services in cement plant operation.</p> <p>3.2 Describe the following utility equipment: compressors, pumps, valves, air receiver tanks, air dryer, sedimentation tanks, filtration bed etc.</p> <p>3.3 State the functions of items in 3.2.</p> <p>3.4 Draw symbols of items in 3.2.</p> <p>3.5. State the causes of bearing failure.</p> <p>3.6 Draw flow diagrams with symbols.</p> <p>3.7 Interpret flow diagrams with symbols.</p> <p>3.9 Identify basic parts of equipment in 3.2</p>	Explain activities 3.1 to 3.9 to students.	Markerboard, recommended textbooks, charts manuals, etc.	<p>Identify the following types of utility equipment: compressors, pumps, valves, air receiver tanks air dryers, sedimentation tanks, filtration beds.</p> <p>Fix the following utility equipment on the flow line: compressors, pumps, valves, air receiver tanks , air dryers, sedimentation tanks, filtration beds.</p>	Guide students to carry out repairs and maintenance.	compressors, pumps, valves, air receiver tanks , air dryers, sedimentation tanks, filtration beds.
	<b>General objective 4:0</b> Know how to maintain different types of bearings, gearboxes and impellers					
7-8	<p>4.1 Define bearing, gearbox and impeller.</p> <p>4.2 State types and functions of items in 4.1.</p> <p>4.3 Explain routine inspection and maintenance of items in 4.1.</p> <p>4.4 List possible faults of items in 4.1.</p> <p>4.5 Explain how to remove and replace bearing.</p> <p>4.6 Explain lubrication of bearings and gearboxes.</p> <p>4.7 Explain how to remove and replace small size</p>	Explain activities 4.1 to 4.9 to the students.	Markerboard recommended textbooks, manuals, etc.	Dismantle and couple back small gearbox and impeller.	Guide students to carry out routine maintenance.	Bearing extractor puller bearings small size impeller small gearbox complete ' tools box diagnose and inspection equipment.

	<p>impellers.</p> <p>4.8 Interpret bearing codes.</p> <p>4.9 List tools for carrying out the tasks in 4.3.</p>					
<b>General Objective 5.0:</b> Understand the principles of maintenance planning						
13-14	<p>5.1 Define maintenance.</p> <p>5.2 List types of maintenance</p> <p>5.4 Explain basic procedures for maintenance types in 5.2.</p> <p>5.4 State requirements for maintenance planning such as manpower, task, spare parts, man-hour, Standard Operation Practice (SOP), tools and materials</p> <p>5.5 Explain how to write maintenance report.</p>	<p>Explain 5.1 to 5.5 to students.</p>	<p>Markerboard recommended textbooks, manuals, etc.</p>	-	-	-
<b>General Objective 6.0:</b> Understand maintenance of conveyors.						
15	<p>6.1 Define a conveyor.</p> <p>6.2 State types and functions of conveyors.</p> <p>6.3 Identify parts of each conveyor in 6.2</p> <p>6.4 Explain how to carry out inspection and training/adjustment of idlers.</p> <p>6.5 Identify safety devices on conveyors such as sway max, rope switch, Emergency stop (E-stop), Safety gaps.</p> <p>6.6 Explain procedure for replacement of conveyor belt, chain, lamina pan, screw and bucket.</p> <p>6.7 Define vulcanization</p>	<p>Explain activities 6.1 to 6.9 to the students</p>	<p>Recommended textbooks, manuals, markerboard, etc.</p>	<p>Carry out vulcanization of a sample of a conveyor belt.</p>	<p>Guide students to conduct the maintenance exercise.</p>	<p>Sample of conveyor belt, cold patch chemicals,</p>

	6.8 List materials and tools required for vulcanization 6.9 Explain how to carry out vulcanization of conveyor belt.					
<b>General Objective 7.0:</b> Understand the maintenance in the kiln section						
15	7.1 State maintenance schedule of a kiln: <ul style="list-style-type: none"> <li>• routine</li> <li>• preventive</li> <li>• predictive.</li> </ul> 7.2 Explain how to carry out items in 7.1. 7.3 Explain how to carry out inspection of the kiln with respect to floating, migration, red spot, tyre temperature, tyre bearing temperature, retaining ring, outlet nose ring. 7.4 Explain how to clean cooler hydraulic filters. 7.5 Explain how to replace damaged seal of kiln support roller. 7.6 Explain how to replace: damaged seal support roller oil 7.7 Explain how to adjust kiln support roller during operation. 7.8 Explain how to replace support roller oil if the temperature is high. 7.9 Explain inspection of kiln support roller	Explain activities 7.1 to 7.20 to the students.	Recommended textbooks, Manuals, Markerboard , Duster, etc.	Take a visit to cement factory to observe maintenance activities at the kiln section	Guide students during the visit	Cement factory

	<p>bearing water line with the view of avoiding blockage or scaling.</p> <p>7.10 Explain how to clean kiln support roller surface in order to aid migration.</p> <p>7.11 Explain how to replace damaged bag filter bags and cages.</p> <p>7.12 Explain the fixing of malfunctioning air blasters.</p> <p>7.14 Explain the cleaning of raw meal silo root blowers filters.</p> <p>7.15 Explain the inspection and torqueing of bucket elevator belt joints.</p>					
<b>General Objective 8.0:</b> Understand the maintenance of vertical roller mill and ball mill.						
15	<p>8.1 State types and functions of mills</p> <p>8.2 Describe the following mills: Vertical Roller Mill (VRM) and ball mills (BM).</p> <p>8.3 Identify types of mills in 8.2</p> <p>8.4 Explain routine inspection and maintenance of mills in 8.2</p> <p>8.5 Explain how to lubricate main gear box, rollers, classifiers, bearings of VRM.</p> <p>8.6 Draw schematic diagram of VRM and BM</p> <p>8.7 Draw schematic diagram of VRM hydraulic system.</p> <p>8.8 Explain SOP for</p>	<p>Explain activities 8.1 to 8.10 to the students.</p>	<p>Recommended textbooks, Manuals, Markerboard, Duster, Pipes, etc.</p>	<p>Identify physically the parts stated in 8.9 of a small ball mill.</p>	<p>Demonstrate activities to students</p>	<p>Small size ball mill, Hand tools</p>

	carrying out welding work in the mills. 8.9 Explain how to replace the following in ball mills: Head wall liners, step liners, intermediate segment plate, diaphragm slot, water injection nozzle and bearings. 8.10 Explain the inspection of the following in ball mills: FK pump (Fuller Kinyon pump), vibrating screen (for tears) , bucket elevator, centre diaphragm mesh (for cracks), gear box, filling-up or mill charge.

Total			100

**Goal:** This course is designed to enable students acquire the knowledge of geology and mining of cement raw materials

**General Objectives:**

On completion of this course, the student should be able to:

- 1.0 Know the source and classification of cement raw materials.
- 2.0 Know the distribution and assessment of deposits of cement raw materials in Nigeria.
- 3.0 Understand the fundamental principles of rock mechanics required for excavation design and support selection.
- 4.0 Understand the concepts of formation and exploitation of geologic deposits.
- 5.0 Understand the factors that affect mining methods.
- 6.0 Understand hard rock mining methods.

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>COURSE TITLE:GEOLOGY AND MINING OF CEMENT RAW MATERIALS</b>		<b>COURSE CODE: CET 213</b>		<b>UNIT: 3</b>	<b>CONTACT HOURS: 3HOURS/WEEK</b>	
					<b>THEORETICAL: 1HOURS/WEEK</b>	
<b>YEAR/SEMESTER: ND II/ 1</b>		<b>PRE-REQUISITE : NONE</b>			<b>PRACTICAL: 2HOUR/WEEK</b>	
<b>Goal:</b> This course is designed to enable students acquire the knowledge of geology and mining of cement raw materials.						
<b>General objective 1:0</b> Know the sources and classification of cement raw materials.						
<b>THEORETICAL CONTENT</b>				<b>PRACTICAL CONTENT</b>		
WEEK\S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITY	RESOURCES	SPECIFIC LEARNING OUTCOME	TEACHER'S ACTIVITY	RESOURCES
1-2	1.1 Define geology 1.2 List the branches of geology. 1.3 Define rocks. 1.4 List types of rocks. 1.5 Explain the term mineral. 1.6 State the class of rock from which cement raw materials are derived. 1.7 Describe the sources of rock types that constitute cement raw materials. 1.8 List the characteristics of various cement raw materials.	Explain activities 1.1 to 1.8 to the students.	Makerboard Manuals, Recommended textbooks, Lecture notes,	Perform physical identification of cement raw materials. -Colour  -Texture  - Grain size  - Determination of specific gravity  - Hardness  - Compressive strength  Perform determination of total Carbonate and Magnesium Carbonate of cement raw materials  Perform chemical analysis and determination of LOI, CaO, SiO <sub>2</sub> , Al <sub>2</sub> O <sub>3</sub> , Fe <sub>2</sub> O <sub>3</sub> , MgO, Na <sub>2</sub> O, K <sub>2</sub> O, Cl of cement raw materials  Field visit to some mine sites is an essential part of this course.	Guide students to carry out Uniaxial Compressive Strength (UCS) determination of rocks, Tri-axial tests, Brazilian Tests, Direct Shear Strength, Point Load Index test, Schmidt Hammer Rebound Number determination tests  Guide students to determine total carbonate and Magnesium Carbonate of cement raw materials  Guide students carry out chemical analysis and determination of LOI, CaO, SiO <sub>2</sub> , Al <sub>2</sub> O <sub>3</sub> , Fe <sub>2</sub> O <sub>3</sub> , MgO, Na <sub>2</sub> O, K <sub>2</sub> O, Cl of cement raw materials	Samples, specific gravity bottles, sieves, atterberg limit apparatus, tray, oven, tri-axial machine, UCS machine, crushing machine, Schmidt hammer, X-ray crystallograph machine, chemical analysis test etc
<b>General objective 2:0</b> Know the distribution and assessment of deposits of cement raw materials in Nigeria.						

3-4	<p>2.1 Describe geological distribution of cement raw materials deposits in Nigeria.</p> <p>2.2 Assess the quality, quantity and suitability of cement raw materials deposits in Nigeria,</p> <p>2.3 Explain calcareous and argillaceous raw materials.</p> <p>2.4 Explain sources of Silica, Alumina, Iron oxide and Shale.</p> <p>2.5 Explain the effects of coal ash and additives as corrective materials (fly ash, slag, lime sludge) in cement manufacturing.</p> <p>2.6 Explain prospecting and exploration of cement raw materials deposits.</p> <p>2.7 Explain reserve estimation.</p> <p>2.8 Explain statistical and geo-statistical evaluation of deposits.</p> <p>2.9 Describe Computer aided deposit evaluation.</p>	Explain activities 2.1 to 2.9 to the students.	Markerboard, Manuals, Geological Maps, Recommended textbooks, Lecture notes etc.	<ul style="list-style-type: none"> <li>• Appreciate the strata of geological formation.</li> <li>• Extract data from the geological maps.</li> <li>• Analyze the data.</li> <li>• Interpret the result of the analysis.</li> <li>• Draw conclusion.</li> </ul>	<p>Organize visit to :</p> <ul style="list-style-type: none"> <li>• Geological survey department.</li> <li>• Mining site</li> </ul> <p>Guide students to ask questions on prospecting, exploration, exploitation and reserve estimation of cement raw materials in Nigeria.</p> <p>Guide students to observe the geological information of the limestone deposits.</p>	<p>Geological survey maps</p> <p>Mining sites</p>
<p><b>General objective 3:0</b> Understand the fundamental principles of rock mechanics required for excavation design and support selection.</p>						
5-6	<p>3.1 Explain the concepts of stress and infinitesimal strain.</p> <p>3.2 Explain linear elasticity.</p> <p>3.3 List physical and mechanical properties</p>	Explain activities 3.1 to 3.9 to the students.	Instructional manual, video clips, Marker board Recommended textbooks, e-books, power point projector,	Carry out stress analysis of rocks.	Guide students to carry out stress analysis of rocks.	Samples of rocks, Crushing machine Universal testing machine (UTM)

	<p>of rocks.</p> <p>3.4 Explain rock failure theory.</p> <p>3.5 Explain rock mass classification schemes and their applications in excavation design and support selection</p> <p>3.6 Describe in-situ stress.</p> <p>3.7 Explain openings in massive jointed and weak rocks.</p> <p>3.8 Describe stability analysis and design of rock slopes and pillars.</p> <p>3.9 Explain subsidence, its prediction, measurement and control.</p>		screen, geological maps, etc			
<b>General objective 4:0</b> Understand the concepts of development and exploitation of geologic deposits.						
7-8	<p>4.1 Explain surface mining.</p> <p>4.2 Explain Unit operations &amp; Mining steps.</p> <p>4.3 Describe methods of mining of limestone deposits</p> <p>4.4 Explain bench size and height.</p> <p>4.5 Explain estimation of tonnage and grade of benches.</p> <p>4.6 Explain mine production scheduling.</p>	Explain activities 4.1 to 4.6 to the students.	Instructional manual, video clips Marker board, Recommended textbooks, e-books, power point projector, screen, etc	Observe unit operations in a typical surface mine.	Guide students to undertake a visit to a typical surface mine	Mining sites
<b>General Objective 5.0:</b> Understand the factors that affect mining methods.						

13-14	5.1 State the factors affecting choice of mining methods 5.2 Explain geometrical considerations in open pits. 5.3 Explain Pit limits 5.4 Explain Slope stability 5.5 Relate choice of mining methods to economic, safety and production capacity	Explain activities 5.1 to 5.5 to the students.	Recommended textbooks, Lecture notes, Manuals, Marker board, Duster, etc.	-	-	-
<b>General objective 6:0</b> Understand hard rock mining methods.						
9-10	6.1 Explain the types of mining methods for hard rocks 6.2 Describe the equipment for hard rock mining. 6.3 Describe Blasting techniques 6.4 State types of explosives and accessories. 6.5 Explain safety in mining operation. 6.6 Explain pit head quality control	Explain activities 6.1 to 6.6 to the students.	Marker board Recommended textbooks, Lecture notes, Manuals, Duster, projector, etc.	Observe unit operations in a typical surface mine.	Guide students to undertake a visit to a typical surface mine	Mining sites

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
Examination	Final examination (written) to assess knowledge and understanding	60

Test	At least Two (2) class tests for feedback.	20
Practical	At least Eight (8) practical exercises to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE TITLE: RAW MIX DESIGN AND CHEMISTRY OF CEMENT</b>	<b>COURSE CODE: CET 214</b>	<b>UNIT:1</b>	<b>CONTACT HOURS: 1HOURS/WEEK</b>
			<b>THEORETICAL: 1HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/1</b>	<b>PRE-REQUISITE: NONE</b>		<b>PRACTICAL: -HOURS/WEEK</b>
<p><b>Goal:</b>This course is designed to enable students acquire knowledge of raw material proportioning to achieve desired cement quality.</p> <p><b>General Objectives:</b></p> <p>On completion of this course, the student should be able to:</p> <ol style="list-style-type: none"> <li>1.0 Know raw mix design.</li> <li>2.0 Understand the chemistry of cement manufacturing process</li> <li>3.0 Know the constituents of cement and their roles in cement performance</li> </ol>			

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>COURSE TITLE: RAW MIX DESIGN AND CHEMISTRY OF CEMENT</b>		<b>COURSE CODE: CET 214</b>		<b>UNIT: 2</b>	<b>CONTACT HOURS: 2HOURS/WEEK</b>	
<b>YEAR/SEMESTER: ND II/ 1</b>		<b>PRE-REQUISITE : NONE</b>		<b>THEORETICAL: 1HOURS/WEEK</b>		<b>PRACTICAL: -1HOUR/WEEK</b>
<b>Goal:</b> This course is designed to enable students acquire knowledge of raw material proportioning to achieve desired cement quality.						
<b>General objective 1:0</b> Know raw mix design.						
<b>THEORETICAL CONTENT</b>				<b>PRACTICAL CONTENT</b>		
WEEK\S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITY	RESOURCES	SPECIFIC LEARNING OUTCOME	TEACHER'S ACTIVITY	RESOURCES
1 - 4	1.1 Explain sampling and pre blending of cement raw materials. 1.2 Explain the estimation of Silica Modulus (SM), Alumina Modulus (AM), Hydraulic Modulus (HM), Lime saturation Factor (LSF), Liquid Content (LC). 1.3 Describe the methods of proportioning, 2, 3 and 4 component mixes. 1.4 Explain the impact of moduli values on cement manufacturing process and quality of clinker.	Explain 1.1 to 1.4.	Instructional manual, video clips Marker, Magi-board Recommended textbooks, , e-books, power point projector, screen, etc	Carryout experiment to determine Silica Modulus, Alumina Modulus and Lime Saturation Factor	Guide students to carryout determination of Silica Modulus, Alumina Modulus and Lime Saturation Factor	Reagent, glass wares
<b>General objective 2.0:</b> Understand the chemistry of cement manufacturing process						
5 – 8	2.1 Explain the Cement manufacturing process. 2.2 Explain chemical composition of various types of cement, cement component and their phase relation. 2.3 Explain binary and ternary compounds of cement and formation of eutectic.	Explain 2.1 to 2.4 to students.	Instructional manual, video clips Marker, Magi-board Recommended textbooks, , e-books, power point projector, screen, etc			

	2.4 Explain Bauge's calculation.					
	<b>General objective 3:0</b> Know the constituents of cement and their roles in cement performance					
9 - 15	3.1 Explain clinker minerals. 3.2 Explain absorption of constituents in clinkers phases. 3.3 Explain using the phase diagram absorption of constituents in clinkers phases. 3.4 Explain chemical reaction during clinkerization, roles of minor constituents in clinkerization, 3.5 Explain Thermochemistry of clinker formation. 3.5 Explain mineralizer 3.6 Explain the role of additives in clinker formation. 3.7 Explain the various mineralizer and fluxes, their role in manufacture of clinker. 3.8 Explain hydration of clinker materials. 3.9 Explain the role of gypsum in cement hydration process. 3.10 Explain hydration of Portland and strength of Portland cement	Explain activities 3.1 to 3.10 to the students.	Instructional manual, video clips Marker, Magi-board Recommended textbooks, e-books, power point projector, screen, etc	Carry out experiment to determine the composition, LSF, SM and AM, of limestone, clinker, gypsum and cement available locally.	Guide students in carry out the experiment.	Glasswares, Reagents, Samples.

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20

Practical	At least Three (3) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>

			<b>THEORETICAL: 2HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/1</b>	<b>PRE-REQUISITE: NONE</b>		<b>PRACTICAL: 0 HOURS/WEEK</b>

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE TITLE: MATERIAL AND ENERGY BALANCE</b>	<b>COURSE CODE: CET 215</b>	<b>UNIT: 1</b>	<b>CONTACT HOURS: 1HOURS/WEEK</b>
			<b>THEORETICAL: 1HOUR/WEEK</b>
<b>YEAR/SEMESTER: ND II/ 1</b>	<b>PRE-REQUISITE : NONE</b>		<b>PRACTICAL: -HOUR/WEEK</b>
<b>Goal:</b> This course is designed to enable the student acquire the knowledge of material and energy balance applicable to cement technology .			
<b>General objective 1:0</b> Understand materials and energy balance.			
<b>THEORETICAL CONTENT</b>		<b>PRACTICAL CONTENT</b>	

**Goal:**This course is designed to enable the student acquire the knowledge of material and energy balance applicable to cement technology .

**General Objectives:**

On completion of this course, the student should be able to:

- 1.0 Understand material and energy balance.
- 2.0 Understand steady and unsteady state materials balance.
- 3.0 Understand phase equilibrium and vapour pressure saturation.
- 4.0 Understand material and energy balance in reactive processes.
- 5.0 Understand mass and energy balance calculation for unit operations.

WEEK\S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITY	RESOURCES	SPECIFIC LEARNING OUTCOME	TEACHER'S ACTIVITY	RESOURCES
1-3	1.1.Explain the concepts of unit and dimensions. 1.2 Describe the range of functions performed by process engineers. 1.3. Identify the unit of operationsinvolved in a process drawing and process flowchart for: <ul style="list-style-type: none"> <li>• singleunit operations.</li> <li>• multiple unit operations.</li> </ul> 1.4. Identify process variables. 1.5 Explain materials and energy balance incement production stages.	Explain activities 1.1 - 1.5 to the students.	Marker board Manuals, Recommended textbooks, Lecture notes, Ropes and Chairs pulley boice.			
<b>General objective 2.0:</b> Understand steady and unsteady state materials balance.						
4 – 6	2.1 Define steady and unsteady states. 2.2 Derive mass and energy balance equations necessary for solving reaction and non –reaction steady – state. 2.3 Solve steady state problems that include both mass and energy balances. on: <ul style="list-style-type: none"> <li>a) non-reactive processes</li> <li>b) reactive processes.</li> </ul> 2.3 Solve simple problems on unsteady state material and energy balance.	Explain activities 2.1 - 2.5 to the students.	Marker board Manuals, Recommended textbooks, Lecture notes, Ropes and Chairs pulley boice.			

	<b>General objective 3.0 :Understand phase equilibrium and vapour pressure saturation.</b>					
7 – 9	<p>3.1 Explain single-phase system.</p> <p>3.2 Explain single-component phase Equilibrium.</p> <p>3.3 Explain gibbs phase rule.</p> <p>3.4 Explain gas-liquid system one condensable component.</p> <p>3.5 Explain liquid and solid densities</p> <p>3.6 Describe change in pressure at constant temperature.</p> <p>3.7 Explain phase change operations.</p>	Explain activities 3.1 – 3.7 to the students.	<p>Markerboard</p> <p>Recommended textbooks, Manuals, lecture notes, etc.</p> <p>Dusters</p>			
	<b>General Objective 4.0: Understand material and energy balance in reactive processes.</b>					
10 – 12	<p>5.1 State content related to reactive processes.</p> <p>5.2 Explain atom balance method.</p> <p>5.3 Describe the extent of reaction method.</p> <p>5.4 Explain heat of formation method.</p> <p>5.5 Explain the general procedure for energy balance with reaction.</p>	Explain activities 4.1 – 4.5 to the students.	<p>Recommended textbooks, Lecture notes, Manuals, Markerboard, Duster, etc.</p>			
	<b>General Objective 5.0: Understand mass and energy balance calculation for unit operations.</b>					
13 – 15	<p>5.1 Define the following terms:</p> <ul style="list-style-type: none"> <li>• Mass input.</li> <li>• Mass output.</li> <li>• Mass inventory.</li> </ul> <p>5.2 State mass balance</p>	Explain activities 5.1 – 5.5 to the students	<p>Recommended textbooks, Lecture notes, Manuals, Markerboard, Duster, etc.</p>			

	<p>equations according to law of conservation of mass.</p> <p>5.3 Explain the principle of conducting mass and energy balances for unit operations and processes with and without chemical reaction.</p> <p>5.4 Define the following processes:</p> <ul style="list-style-type: none"> <li>• Recycle.</li> <li>• Bye-pass.</li> <li>• Reflux ratio.</li> <li>• Current and co-current.</li> </ul> <p>5.5 Calculate mass and energy entering and leaving process by component balances.</p>

# **SEMESTER 4 ND 2**

<b>PROGRAMME:</b> GENERAL STUDIES		
<b>COURSE:</b> COMMUNICATION IN ENGLISH II		<b>SEMESTER:</b> SECOND
<b>CREDITHOURS:</b> 2Hrs/wk		
<b>CODE:</b> GNS 202	<b>THEORY:</b>	
<b>UNITS:</b> 2.0	<b>PRE-REQUISITE:</b> GNS 201	<b>PRACTICALS:</b>
<p><b>COURSE GOAL:</b> This course is designed to equip the student with the necessary level of competence and proficiency to enable him adapt to his professional environment. At the end of this course the student should be able to communicate clearly and effectively in both general and specific situations.</p>		
<p><b>GENERAL OBJECTIVES:</b></p> <p>On completion of this course the student should:</p> <ol style="list-style-type: none"> <li>1.0 Understand the registers.</li> <li>2.0 Apply the principles of correspondence.</li> <li>3.0 Apply the principles of writing for publication.</li> <li>4.0 Write a report.</li> </ol>		

<b>General Objective: 1.0 Understand the registers.</b>						
<b>Theoretical Content</b>				<b>Practical Content</b>		
<b>Week</b>	<b>Specific Objectives</b>	<b>Teacher's Activity</b>	<b>Resources</b>	<b>Specific Learning Outcomes</b>	<b>Teacher's Activities</b>	<b>Evaluation</b>
	<p><b>Register:</b></p> <p>1.1 Define registers.</p> <p>1.2 List factors influencing register, viz., field (profession), mode (speech or writing), tenor (relationship between the interacting parties).</p> <p>1.3 List some items of register peculiar to different professions.</p> <p>1.4 State appropriate uses of jargon.</p>	<p>Explain the meaning of registers.</p> <p>Explain the factors that influence registers.</p> <p>Explain some registers found in the students' professions.</p> <p>Explain the use of jargons.</p>	<p>Textbooks</p> <p>Journals</p> <p>Internet</p> <p>Projector</p> <p>Marker Board</p> <p>marker</p> <p>CD/DVD</p>	<p>Define registers.</p> <p>List the factors that influence registers.</p> <p>List some registers found in different profession.</p> <p>Identify registers in a given passage.</p>	<p>Guide, lead, supervise and assess students' activities.</p>	<p>Class work, Assignments and Tests.</p>

<b>General Objective:2.0 Apply the Principles of Correspondence.</b>						
<b>Theoretical Content</b>				<b>Practical Content</b>		
<b>Week</b>	<b>Specific Objectives</b>	<b>Teacher Activity</b>	<b>Resources</b>	<b>Specific Learning Outcomes</b>	<b>Teacher's Activities</b>	<b>Evaluation</b>
4-7	<p><b>Correspondence:</b></p> <p>2.1 Describe different types of business letters e.g., applications, enquiries, invitations and complaints, with their replies.</p> <p>2.2 Identify suitable languages for specific types of letters.</p>	<p>Explain the different types of business letters.</p> <p>Explain the language suitable for</p>	<p>Textbooks</p> <p>Journals</p> <p>Internet</p> <p>Projector</p> <p>Marker Board</p> <p>marker</p> <p>CD/DVD</p>	<p>Describe different types of business letters.</p> <p>➤ Identify the suitable language for a specific</p>	<p>Guide, lead, supervise and assess students' activities.</p>	<p>Class work, Assignments and Tests.</p>

		specific types of letter, with appropriate examples.		type of letter. ➤ Use the identified languages to write different types business letters.		
--	--	--	--	--	--	--

**General Objective:** 3.0 Apply the Principle of Writing for Publication.

Theoretical Content			Practical Content				
Week	Specific Objectives	Teacher Activity	Resources	Specific Outcomes	Learning	Teacher's Activities	Evaluation
	<b>Writing for Publication:</b>  3.1 List techniques of writing for publication.  3.2 Identify published essays of literary value.  3.3 State the development of ideas in a given article.	Explain the techniques of writing for publication.  Analyse published essays of literary value.  Explain the development of ideas in a given article.	Textbooks Journals Internet Projector Marker Board marker CD/DVD Magazines Newspapers	List the techniques.  ➤ Identify published essays. ➤ Analyse published essays. ➤ Write essays on topical and current issues.  ➤ State the stages of development of ideas. ➤ Write good articles for publication		Guide, lead, supervise and assess students' activities.	Class work, Assignments and Test

**General Objective:**4.0 Write a report.

Theoretical Content			Practical Content				
Week	Specific Objectives	Teacher Activity	Resources (Theory)	Specific Outcomes	Learning	Teacher's Activities	Evaluation

11-12	<b>Reports:</b> 4.1 Define report. 4.2 List the types of report. 4.3 Enumerate uses of report. 4.4 List the characteristics of a good report. 4.5 Outline the stages of writing a report. 4.5 Evaluate a given report.	Explain reports. Explain the types of report. Explain the uses of report. Explain the characteristics of report e.g objectivity, style etc. Explain the stages of writing a report. Analyse a report.	Textbooks Journals Internet Projector Marker Board marker CD/DVD	Define report. List the types of report. Mention the uses of report. Mention the characteristics of a good report. Outline the stages of writing a report. > Analyse a given report. > Write a report.	Guide, lead, supervise and assess students' activities.	Class work Assignments
-------	--	--	---	--	---	---------------------------

<b>PROGRAMME: NATIONAL DIPLOMA CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: MTH 122</b>	<b>UNIT: 2</b>	<b>TOTAL CONTACT HOURS: 2HRS/WEEK</b>
<b>COURSE TITLE: TRIGONOMETRY AND</b>			<b>THEORETICAL: 2HOURS/WEEK</b>

<b>ANALYTICAL GEOMETRY</b>		
<b>YEAR/SEMESTER: ND II/2</b>	<b>PRE-REQUISITE: -</b>	<b>PRACTICAL: - HOURS/WEEK</b>
<p><b>Goal:</b> This course is to enable Students understand trigonometry and analytical geometry applicable to cement engineering</p> <p><b>GENERAL OBJECTIVES</b></p> <p>On completion of this course, the student will be able to:</p> <ol style="list-style-type: none"> <li><b>1.0</b> Understand the manipulation of Trigonometric Formulae and equations</li> <li><b>2.0</b> Understand the concept of Mensuration and its application to Engineering problems.</li> <li><b>3.0</b> Understand concept of Analytical Geometry and their applications.</li> <li><b>4.0</b> Know the different forms of conics such as ellipse, Parabola and hyperbola.</li> </ol>		

PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY						
COURSE TITLE: TRIGONOMETRY AND ANALYTICAL GEOMETRY		COURSE CODE : MTH122		UNIT: 2	CONTACT HOURS: 2	
YEAR/SEMESTER: ND II /2					THEORETICAL: 2 Hours/week	
					PRACTICAL: - Hours/week	
Goal: This course is to enable Students understand trigonometry and analytical geometry applicable to cement engineering						
GENERAL OBJECTIVES 1.0 : Understand the manipulation of Trigonometric Formulae and equations						
THEORETICAL CONTENTS			PRACTICAL CONTENTS			
WEEK/S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITIES	RESOURCE S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITIES	RESOURCES
1-3	<p>1.1 Convert sums and differences of trigonometric ratios to products:  <math>\sin A + \sin B = 2 \sin \left(\frac{A+B}{2}\right) \cos \left(\frac{A-B}{2}\right)</math>  <math>\cos A + \cos B = 2 \cos \left(\frac{A+B}{2}\right) \cos \left(\frac{A-B}{2}\right)</math></p> <p>1.2 Prove the sine and cosine formulae of triangles</p> <p>1.3 Solve triangles using the sine and cosine formulae e.g.:- The sides a,b,c, of a triangle are 4cm, 5cm, and 6cm respectively. Find the angles.</p> <p>1.4 Calculate angles of elevation and depression using trigonometric ratios e.g.:- From the top of a tree 120m high an observer sees a boat 560m away. Calculate the angle of depression.</p> <p>1.5 Compute bearings, heights and distances of inaccessible objects and projections, e.g. B A man walks 3km due N, and the 3km N.52° W. How far is the of his starting point? What is his bearing from his original position.</p> <p>1.6 Derive half angle formulae fro sin,</p>	<p>Illustrate with good examples activities in 1.1 to 1.10 and ask the students to solve problems on them.</p>	<p>Recommend ed textbook, Chalkboard, duster, Chalk, Lecture notes</p>			

	<p>cos and tan.</p> <p>1.7 Define inverse circular function.</p> <p>1.8 Explain inverse circular functions graphically.</p> <p>1.9 Solve problems involving 1.8 and e.g.:- Draw the graph of <math>1/(\cos 2\theta)</math> Taking values from <math>0^\circ</math> to <math>90^\circ</math> inclusive.</p> <p>1.10 Apply the concepts in 1.8 above to three dimensional problems.</p>					
	<b>GENERAL OBJECTIVE 2.0:</b> Understand the concept of Mensuration and its application to Engineering problems.					
3-6	<p>2.1 Explain circular measure</p> <p>2.2 State the relation between radians and degrees</p> <p>2.3 Prove the formulae for arc length and area of a sector.</p> <p>2.4 Identify segment and chord of a circle.</p> <p>2.5 Determine the area of a segment and the chord of length of a given circle.</p> <p>2.6 Calculate the surface areas and volumes of simple shapes such as cylinder, sphere and cone. E.g. A solid sphere has radius 8cm. Calculate its volume.</p> <p>2.7 Determine the areas and volumes of irregular shapes applying Simpsons rule.</p> <p>2.8 Apply mid-ordinate rule to determine the areas and volumes applying mid-ordinate rule.</p>	<p>Illustrate with good examples activities in 2.1 to 2.8 and ask the students to solve problems on them.</p>	<p>Recommended textbooks, chalkboard, duster, chalk, lesson notes, etc</p>			
	<b>GENERAL OBJECTIVE 3.0 :</b> Understand concept of Analytical Geometry and their applications.					

7-8	<p>3.1 Explain two dimensional coordinate systems: Cartesian and Polar-coordinate systems.</p> <p>3.2 Explain plotting and sketching of graphs w.r.t. the two coordinate systems.</p> <p>3.3 Relate Cartesian coordinate to polar coordinates.</p> <p>3.4 Explain the slope of a line in relation to the above concepts in 3.3. above.</p> <p>3.5 Explain the intercept of a line.</p> <p>3.6 Derive the formula for the gradient of line passing through two points.</p> <p>3.7 Derive the equation of a straight line given the gradient and the co-ordinates of a point.</p> <p>3.8 Reduce a given linear equation to the intercept form. <math>x/a + y/b = 1</math></p> <p>3.9 Determine the coordinates of the point of intersection of two straight lines.</p> <p>3.10 Define locus</p> <p>3.11 Derive the slope-intercept form of the equation of a straight line: <math>y = mx+c</math></p> <p>3.12 Derive the point B slope form of the equation of a straight line: <math>y - y_1 = m(x - x_1)</math></p> <p>3.13 Derive the double B point form of the equations of the straight line: <math>y - y_1 = \frac{y_2 - y_1}{x_2 - x_1} (x - x_1)</math></p> <p>3.14 Derive the perpendicular form of the equation of a straight line</p> <p>3.15 Solve examples of 3.11 to 3.14 above.</p> <p>3.16 Find the angle (Q) between two lines whose slopes, (<math>m_1</math>, and <math>m_2</math>) are Known: <math>Q = \tan^{-1} \frac{m_2 - m_1}{1 + m_1 m_2}</math></p> <p>3.17 Determine the conditions for two</p>	Illustrate with good examples activities in 3.1 to 3.26 and ask the students to solve problems on them.	Recommended textbooks, chalkboard, chalk Dusters, lesson notes etc.			
-----	--	---	---	--	--	--

	<p>lines to be parallel and to be perpendicular.</p> <p>3.18 Derive the expression for the perpendicular distance from a point to a line.</p> <p>3.19 Draw a circle.</p> <p>3.20 Derive the equation of a circle with center at the origin and radius r.</p> <p>3.21 Derive the equation of a circle with center outside the origin.</p> <p>3.22 State general equation of a circle.</p> <p>3.23 Determine the coordinates of the center of a circle from a given equation of a circle.</p> <p>3.24 Draw orthogonal circles</p> <p>3.25 Find the equations of the tangent and the normal at a point circle</p> <p>3.26 List illustrative examples of each of 3.20 to 3.25 above</p>					
<b>GENERAL OBJECTIVE 4.0 :Know the different forms of conics such as ellipse, Parabola and hyperbola.</b>						
9-11	<p>4.1 Define the Parabola</p> <p>4.2 Derive the standard equation of a Parabola <math>y^2 = 4ax</math></p> <p>4.3 State the properties of the parabola</p> <p>4.4 Define the focal chord, axis and latus rectum of the parabola</p> <p>4.5 Determine the equation of the tangent and normal from a given point to the parabola.</p> <p>4.6 Solve problems on parabola e.g. Write down the equation of the parabola and state its vertex if the focus B is (2,0) and the directrix <math>x = -2</math>.</p> <p>4.7 Define an ellipse</p> <p>4.8 Derive the equation of an ellipse <math>x^2/a^2 + y^2/b^2 = 1</math></p> <p>4.9 State the properties of the ellipse</p> <p>4.10 Determine the equation of the tangent and the normal to an ellipse from a given point.</p> <p>4.11 Define focal chord and axes of</p>	<p>Illustrate with good examples activities in 4.1 to 4.19 and ask the students to solve problems on them.</p>	<p>Recommended textbook, Chalkboard, duster, Chalk, Lecture notes, etc Drawing materials/instrument</p>	-	-	-

	4.12	ellipse. Solve problems on ellipses e.g. Find the length of the axes and the eccentricity for the ellipse: $4x^2 + 9y^2 = 36$					
	4.13	Define the Hyperbola					
	4.14	Derive the equation of the Hyperbola					
	4.15	Identify the properties of the Hyperbola.					
	4.16	Define asymptotes, chord, tangent and normal to a hyperbola.					
	4.17	Solve problems on hyperbola e.g. Find the foci and directrices for hyperbola: $x^2/16 + y^2/9 = 1$					
	4.18	Explain rectangular hyperbola					
	4.19	Determine tangent and normal to the rectangular hyperbola.					

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20

<b>COURSE TITLE: INTRODUCTION TO ENGINEERING MANAGEMENT</b>			<b>THEORETICAL: 2HOURS/WEEK</b>
<b>YEAR/ SEMESTER: ND II/ 2</b>	<b>PRE-REQUISITE:-</b>		<b>PRACTICAL: 0HOURS/WEEK</b>

**Goal:** This course is to enable Students understand organization of an industry, basic management and personnel functions, basic economics, elements of law and different organizational working conditions.

**GENERAL OBJECTIVES**

On completion of this course, the student will be able to:

- 1.0 Know The Organization Of An Industry
- 2.0 Know Industrial Relations
- 3.0 Know The Basic Management Functions
- 4.0 Know Personnel Management Functions
- 5.0 Know Basic Economics
- 6.0 Know Elements Of Law
- 7.0 Know Different Working Conditions
- 8.0 Review Of Stcw 78 And Subsequent Amendments

<b>COURSE TITLE:</b> INTRODUCTION TO ENGINEERING MANAGEMENT		<b>COURSE CODE:</b> MAR 224		<b>UNIT: 2</b>		<b>CONTACT HOURS: 2</b>	
				<b>THEORETICAL:2 HOURS/WEEK</b>			
<b>YEAR/ SEMESTER: ND II/ 2</b>		<b>PRE-REQUISITE:_</b>		<b>PRACTICAL: 0 HOURS/WEEK</b>			
<b>Goal:</b> This course is to enable Students understand organization of an industry, basic management and personnel functions, basic economics, elements of law and different organizational working conditions.							
<b>GENERAL OBJECTIVES 1:0 KNOW THE ORGANIZATION OF AN INDUSTRY</b>							
<b>THEORETICAL CONTENTS</b>			<b>PRACTICAL CONTENTS</b>				
<b>WEEK/S</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	
1-2	Industrial Organization 1.1 Differentiate between small, medium and large industries 1.2 Explain the structure of various types of industries 1.3 State the functions of the various departments in an industry 1.4 State the functions and responsibilities of a Director, Manager and Supervisor 1.5 Explain the decision process and communication in an organization 1.6 Explain the structure of ship board management 1.7 Explain the structure of shipyard management 1.8 List the different types of business and explain their structures e.g. sole proprietorship, partnership, limited liability and public liability companies.	Explain 1.1-1.8	Teaching aids: Diagrams Photographs Sketches O/H projector Multimedia projector And slides, diskettes, CDs etc.	-	-	-	
<b>GENERAL OBJECTIVE 2.0: KNOW INDUSTRIAL RELATIONS</b>							
3-4	Management Functions	Explain 2.1-2.6	Teaching aids as in 1.1	-	-	-	

	<p>2.1 Outline the functions of Directors</p> <p>2.2 Outline the functions of Managers</p> <p>2.3 Discuss the influence of production on the viability of the company</p> <p>2.4 explain planning and control process</p> <p>2.5 Explain the effect of work study, job analysis and specification to the decision making process</p> <p>2.6 Discuss the function of a ship's master and Chief Engineer Officer</p>		Evaluation, group discussion, test and examination			
<b>GENERAL OBJECTIVE 3.0: KNOW THE BASIC MANAGEMENT FUNCTIONS</b>						
5-7	<p>Personnel Management</p> <p>3.1 State various man power selection and training methods</p> <p>3.2 State various methods of advertising for recruitment</p> <p>3.3 Discuss interview techniques</p> <p>3.4 Outline industrial training schemes</p> <p>3.5 Discuss the merits of on-the-job training</p> <p>3.6 Discuss the effect of incentive on production level</p>	Explain 3.1-3.6	<p>Teaching aids:</p> <p>Diagrams</p> <p>Photographs</p> <p>Sketches</p> <p>O/H projector</p> <p>Multimedia projector</p> <p>And slides, diskettes, CDs etc.</p>	-	-	-
<b>GENERAL OBJECTIVE 4.0: KNOW PERSONNEL MANAGEMENT FUNCTIONS</b>						
8-10	<p>Industrial Relation</p> <p>4.1 Outline employee-employer relationship in an organization</p> <p>4.2 Discuss trade unions, strikes and lockouts</p> <p>4.3 Discuss the advantages and disadvantages of having trade unions in an</p>	Explain 4.1-4.5	<p>Teaching aids:</p> <p>Diagrams</p> <p>Photographs</p> <p>Sketches</p> <p>O/H projector</p> <p>Multimedia projector</p> <p>And slides, diskettes, CDs etc.</p>	-	-	-

	<p>organization and collective bargaining</p> <p>4.4 Discuss the role of industrial arbitration</p> <p>4.5 Discuss workers participation in management</p>					
<b>GENERAL OBJECTIVE 5.0: KNOW BASIC ECONOMICS</b>						
11-13	<p>Fundamentals of Economics</p> <p>5.1 Outline the basic concept and scope of economics</p> <p>5.2 Explain the demand and supply theory</p> <p>5.3 Discuss costing and pricing concepts</p> <p>5.4 Describe the straight line method of evaluating equipment depreciation</p>	Explain 5.1-5.5	<p>Teaching aids:</p> <p>Diagrams</p> <p>Photographs</p> <p>Sketches</p> <p>O/H projector</p> <p>Multimedia projector</p> <p>And slides, diskettes, CDs etc.</p>	-	-	-
<b>GENERAL OBJECTIVE 6.0: KNOW ELEMENTS OF LAW</b>						
14-15	<p><b>Law</b></p> <p>6.1 Discuss elements of legislation, wages act, workman's compensation etc.</p> <p>6.2 Discuss elements of contract and contract obligation</p> <p>6.3 Discuss the provisions of the ISM – code</p> <p>6.4 Differentiate between port-state and flag- state control</p> <p>6.5 International safety management</p> <p>6.6 Rational of safety management</p> <p>6.7 the ISPS code</p> <p>6.8 The ISM code</p> <p>6.9 ISM Auditors</p> <p>6.10 ISM code operation</p> <p>6.11 ISM code development</p>	Explain 6.1-6.11	<p>Teaching aids:</p> <p>Diagrams</p> <p>Photographs</p> <p>Sketches</p> <p>O/H projector</p> <p>Multimedia projector</p> <p>And slides, diskettes, CDs etc.</p>	-	-	-
<b>GENERAL OBJECTIVE 7.0: KNOW DIFFERENT WORKING CONDITIONS</b>						
16	<p>7.1 Comparison of Nigeria Navy and University conditions</p> <p>7.2 Comparison of Nigerian Defence Academy and</p>	Explain 7.1-7.5	<p>Teaching aids:</p> <p>Diagrams</p> <p>Photographs</p> <p>Sketches</p>	-	-	-

	Maritime Academy of Nigeria, Oron 7.3 Working conditions in NIMASA 7.4 Working conditions in Mobil Nigeria 7.5 Working conditions in different European countries		O/H projector Multimedia projector And slides, diskettes, CDs etc.			
	<b>GENERAL OBJECTIVE 8.0: REVIEW OF STCW 78 AND SUBSEQUENT AMENDMENTS</b>					
17	8.1 1978 Convention 8.2 1995 amendments 8.3 1997 amendments 8.4 1998 amendments 8.5 2006 amendments 8.6 2010 amendments	Explain 8.1-8.6	Teaching aids: Diagrams Photographs Sketches O/H projector Multimedia projector And slides, diskettes, CDs etc.	-	-	-

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: MEC 222</b>	<b>UNIT: 4</b>	<b>TOTAL CONTACT HOURS: 2HRS/WEEK</b>
<b>COURSE TITLE: STRENGTH OF MATERIAL</b>			<b>THEORETICAL: 2HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/2</b>	<b>PRE-REQUISITE: -</b>		<b>PRACTICAL: 2HOURS/WEEK</b>

**Goal:**This course is to enable Students understand various types of stress & strain, shearing force & bending moments, shear stress, torque in circular shafts, temperature stresses and second moment of area.

**GENERAL OBJECTIVES**

On completion of this course, the student will be able to:

- 1.0 Understand various types of stress and strain
- 2.0 Understand the construction of shearing force and bending moment diagrams and the computation of shearing force and bending Moment
- 3.0 Know Shear Stress and Torque in Circular Shaft
- 4.0 Understand the Use of Mohr's Circle
- 5.0 Know composite bar and Temperature stresses
- 6.0 Bending Stresses and Second moment of area

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>COURSE TITLE: STRENGTH OF MATERIALS</b>		<b>COURSE CODE : MEC 222</b>		<b>UNIT: 4</b>	<b>CONTACT HOURS: 4</b>	
					<b>THEORETICAL:2 Hours/week</b>	
<b>YEAR/SEMESTER: ND II /2</b>					<b>PRACTICAL: 2 Hours/week</b>	
<b>Goal:</b> This course is to enable Students understand various types of stress & strain, shearing force & bending moments, shear stress, torque in circular shafts, temperature stresses and second moment of area.						
<b>GENERAL OBJECTIVES 1.0 : UNDERSTAND VARIOUS TYPES OF STRESS AND STRAIN</b>						
<b>THEORETICAL CONTENTS</b>			<b>PRACTICAL CONTENTS</b>			
<b>WEEK/S</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>
1-3	<b>Direct stress and Strain</b> 1.1 Define Stress and Strain 1.2 Give the type of stresses and strains 1.3 Differentiate between the following: Tensile and Compressive stresses 1.4 State Hooke's law 1.5 Draw and explain stress and strain curves for :brittle and ductile materials 1.6 Describe strength properties of some	Explain in details direct stress and strain.	Recommended textbook, Chalkboard, duster, Chalk, Lecture notes	Verify Hooke's law using spring and dead weight  Conduct tensile tests and compression tests on ductile and brittle materials.  Conduct Izod and Charpy tests on different materials And Brinell hardness test	Demonstrate activities in 1.1, 1.2, 1.3 and 1.4 for the students to learn and ask them to carry out all the activities.	Springs, loads modulus of rubber apparatus etc.

	engineering materials.					
<b>GENERAL OBJECTIVE 2.0: UNDERSTAND THE CONSTRUCTION OF SHEARING FORCE AND BENDING MOMENT DIAGRAMS AND THE COMPUTATION OF SHEARING FORCE AND BENDING MOMENT</b>						
3-6	<b>Shear Force and Bending moment</b> 2.1 Define shearing force and bending moments. 2.2 Beam 2.3 Type of beams and loads 2.4 sign convention for shear force and bending moment 2.5 Write expression for shear force and bending moment at a section of a loaded beam. 2.6 Calculate the point of contraflexure. 2.7 Calculate the neutral axis, the second moment of area of section, the moment of resistance.	Explain shear force and bending moment in detail and derive an expression to draw the shear and bending moment at a section.	Recommended textbooks, chalkboard, duster, chalk, lesson notes, etc	Identify different types of beam.  Analyze simply supported beams with concentrated loads  Perform experiment on young modulus using metalrod	Demonstrate 2.2 to 2.3 to students and let them carry it out	Springs Young modulus apparatus etc.
<b>GENERAL OBJECTIVE 3.0 : KNOW SHEAR STRESS AND TORQUE IN CIRCULAR SHAFT</b>						

7-8	<p>3.1 Define shaft</p> <p>3.2 List materials used for shafts</p> <p>3.3 List types of shafts</p> <p>3.4 Know requirement for design of shafts</p> <p>3.5 Derive an expression for torsion of Circular shafts : Solid and hollow shafts</p> <p>Solve problems related to 3.1 angles of twist, torsional stress, torque etc.</p>	<p>Explain torsion and derive an expression for the torsion of a circular shaft.</p> <p>Solve problems relating to shear stress. angle of twist and torque in circular shafts</p>	<p>Recommended textbooks, chalkboard, chalk Dusters, lesson notes etc.</p>	<p>Conduct torsion test.</p> <p>Investigate the whirling speed of an unloaded shaft with fix-fixed ends.</p>	<p>Demonstrate all the activities for the students to learn and ask them to carry out all the activities</p>	Torsion test apparatus
<b>GENERAL OBJECTIVE 4.0 : UNDERSTAND THE USE OF MOHR'S CIRCLE</b>						
9-11	<p>4.1 Define mohr's circle</p> <p>4.2 Know how to use mohr's circle to determine principal stresses and the plane in which they occur</p>	<p>Explain in details the application of mohr's circle and how to use mohr's circle to solve basic problems.</p>	<p>Recommended textbook, Chalkboard, duster, Chalk, Lecture notes, etc Drawing materials/instrument</p>	-	-	-
<b>GENERAL OBJECTIVE 5.0 : KNOW COMPOSITE BAR AND TEMPERATURE STRESSES</b>						

12-13	<p>5.1 Define composite bar</p> <p>5.2 Define temperature stresses</p> <p>5.3 Derive an expression for 5.1 and 5.2 above</p> <p>5.4 Solve basic problems related to 5.1 and 5.2</p>	<p>Explain composite bar and temperature stresses with working examples.</p>	<p>Recommended textbook, Chalkboard, duster, Chalk, Lecture notes, etc Drawing materials/instrument</p>	-	-	-
<b>GENERAL OBJECTIVE 6.0 : BENDING STRESSES AND SECOND MOMENT OF AREA</b>						
13-15	<p>6.1 Define center of gravity</p> <p>6.2 define centroid</p> <p>6.3 differentiate between 6.1 and 6.2</p> <p>6.4 Explain Bending Stresses</p> <p>6.5 Derive an expression for pure bending of a rectangular beam ,position of neutral axis and moment of resistance</p> <p>6.6 explain second moment of area</p> <p>6.7 explain the parallel axis theorem</p> <p>6.8 solve basic</p>	<p>Explain 6.1 to 6.7 in details with aid of diagrams, working examples and adequate notes.</p>	<p>Recommended textbook, Chalkboard, duster, Chalk, Lecture notes, etc Drawing materials/instrument</p>	-	-	-

	problems on 6.1. 6.9 determine the second moment of area the neutral axis.					
--	--	--	--	--	--	--

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: CET 221</b>	<b>UNIT: 4</b>	<b>TOTAL CONTACT HOURS: 5HRS/WEEK</b>
<b>COURSE TITLE: PRINCIPLES OF UNIT OPERATIONS II</b>			<b>THEORETICAL: 2HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/2</b>	<b>PRE-REQUISITE: -</b>		<b>PRACTICAL: 2 HOURS/WEEK</b>

**Goal:** This course is designed to enable the student understand the principles of separation processes.

**GENERAL OBJECTIVES**

On completion of this course, the student will be able to:

- 1.0 Understand leaching and extraction processes.
- 2.0 Understand the principles of gas absorption operations.
- 3.0 Understand the principles of evaporation.
- 4.0 Understand the principles of humidification and drying.
- 5.0 Understand the principles of crystallization.

PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY						
COURSE TITLE: PRINCIPLES OF UNIT OPERATION II		COURSE CODE : CET 221		UNIT: 4	CONTACT HOURS: 4	
YEAR/SEMESTER: ND II /2					THEORETICAL: 2 Hours/week	
					PRACTICAL: 2Hours/week	
<b>Goal:</b> This course is designed to enable the student understand the principles of separation processes.						
<b>GENERAL OBJECTIVES 1.0 :</b> Understand leaching and extraction processes.						
THEORETICAL CONTENTS			PRACTICAL CONTENTS			
WEEK/S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITIES	RESOURCES	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITIES	RESOURCES
1-3	1.1 Define the following: <ul style="list-style-type: none"> <li>• Leaching and</li> <li>• Extraction processes.</li> </ul> 1.2 Explain liquid-liquid and liquid-solid equilibria.           1.3 Explain pre-treatment of feed.           1.4 Explain the process of solvent recovery.           1.5 Differentiate between batch and continuous operations.           1.6 Explain the shank's system of counter-current contacting.           1.7 List equipment for continuous counter-current contacting.           1.8 Describe layout of continuous counter-current contacting.           1.9 Describe liquid-liquid extraction equipment.	Explain activities 1.1- 1.9 to the students.	Recommended textbook, Marker board, cleaner, Lecture notes etc.	<ul style="list-style-type: none"> <li>• Select solvents and test for extraction efficiency.</li> <li>• Determine the effect of agitation, particle size, temperature and feed rate on extraction efficiency for batch and continuous leaching operation.</li> <li>• Compare concurrent and counter-current leaching.</li> </ul>	Guide students to conduct the practical.	Solvents, Soxhlet apparatus, solid – liquid extraction apparatus, glasswares.
<b>GENERAL OBJECTIVE 2.0:</b> Understand the principles of gas absorption operations.						

3-6	<p>2.1 Define solubility of gases.</p> <p>2.2 Define absorption and stripping.</p> <p>2.3 Explain the properties and types of tower packing.</p> <p>2.4 Describe the construction of gas absorption towers.</p> <p>2.5 Explain the factors affecting the selection of solvents in gas absorption operations.</p> <p>2.6 Explain the principles of operation for:</p> <ul style="list-style-type: none"> <li>• stage-wise gas absorption and</li> <li>• continuous gas absorption equipment.</li> </ul>	Explain activities 2.1- 2.6 to the students.	Recommended textbooks, cleaner, markerboard, etc			
<b>GENERAL OBJECTIVE 3.0</b> : Understand the principles of evaporation						
7-8	<p>3.1 Define evaporation.</p> <p>3.2 Explain the mechanism of evaporation.</p> <p>3.3 Describe single and multiple effect evaporation.</p> <p>3.4 Explain the following terms and modes:</p> <ul style="list-style-type: none"> <li>• forward feed</li> <li>• backward feed and</li> <li>• parallel feed.</li> </ul>	Explain activities 3.1- 3.4 to the students.	Recommended textbooks, Markerboard, cleaners, etc.			
<b>GENERAL OBJECTIVE 4.0</b> : Understand the principles of humidification and drying.						
9-11	<p>4.1 Explain humidification and dehumidification.</p> <p>4.2 Distinguish between wet bulb and adiabatic saturation temperatures.</p> <p>4.3 Explain humidity and dew point.</p> <p>4.4 Explain the principles and operation of a cooling tower.</p>	Explain activities 4.1- 4.7 to the students.	Recommended textbook, Chalkboard, duster, Chalk, Lecture notes	Determine humidity and dew point using psychomatic charts. Carry out moisture content test.	Guide students to conduct the practical.	Wet and dry bulb hydrometer, psychomatic charts, weighing balance, glasswares, oven etc.

	<p>4.5 Explain the mechanism of drying operations.</p> <p>4.6 Define the following terms:</p> <ul style="list-style-type: none"> <li>• bond and unbond moisture;</li> <li>• free moisture;</li> <li>• critical moisture content and</li> <li>• equilibrium moisture.</li> </ul> <p>4.7 List equipment used for batch and continuous drying.</p>					
<b>GENERAL OBJECTIVE 5.0</b> :Understand the principles of crystallization.						
12-13	<p>5.1 Define crystallisation.</p> <p>5.2 Explain the mechanism of crystallisation.</p> <p>5.3 Explain the effects of temperature and impurities on crystallization.</p> <p>5.4 State examples of batch and continuous crystallizers.</p>	Explain activities 5.1- 5.4 to the students.	Recommended textbook, Markerboard, etc.			

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

PROGRAMME:	NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY
COURSE TITLE:	MASS & HEAT TRANSFER
COURSE CODE:	CET 222
CREDIT UNIT:	4
CONTACT HOUR:	4 HOURS/WEEK
GOAL:	The course is designed to provide the students with knowledge on fundamentals of heat and mass transfer operations.

### **GENERAL OBJECTIVES**

On completion of the course the student should:

- 1.0 Know the fundamentals of mass transfer operations
- 2.0 Understand molecular diffusion in fluids
- 3.0 Know how to evaluate mass transfer coefficients.
- 4.0 Understand fundamentals of heat transfer phenomena.
- 5.0 Understand the analysis of heat conduction.
- 6.0 Understand the concepts of heat convection.
- 7.0 Understand basic radioactive heat transfer.

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>				<b>COURSE CODE: CET 222</b>		
				<b>CONTACT HOURS: 4 HOURS/WEEK</b>		
<b>COURSE SPECIFICATION: MASS &amp; HEAT TRANSFER</b>				<b>PRACTICAL CONTENTS:</b>		
<b>GOAL:</b> The course is designed to provide the students with knowledge on fundamentals of heat and mass transfer operations.						
<b>WEEK</b>	<b>SPECIFIC LEARNING OBJECTIVES</b>		<b>TEACHERS ACTIVITIES</b>		<b>LEARNING RESOURCES</b>	
	<b>GENERAL OBJECTIVE: 1.0: Know the fundamentals of mass transfer operations</b>					
<b>WEEK</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHER'S ACTIVITIES</b>	<b>LEARNING RESOURCES</b>	<b>SPECIFIC LEARNING OBJECTIVE</b>	<b>TEACHER ACTIVITIES</b>	<b>LEARNING RESOURCES</b>
1	1.1 Differentiate between transport and transfer processes. 1.2 Describe mass transfer operation. 1.3 Differentiate between direct and indirect phase contact operations. 1.4 Explain criteria for choice of specific mass transfer operation.	Explain to the students activities 1.1-1.4 to the students.	Video clips, Pictures, Power point slides, Marker Board, Recommended textbooks etc.	-	-	-
	<b>General Objective 2.0: Understand molecular diffusion in fluids.</b>					
2-4	2.1 Define molar flux and molar average velocity. 2.2 Define molecular, thermal and momentum diffusivity. 2.3 State Fick's first law of diffusion for binary system. 2.4 Derive the general expression for net molar flux for steady state diffusion in fluids at rest and in laminar flow. 2.5 Determine the diffusion coefficient for liquids and	Explain to the students activities 2.1-2.7 to the students.	Video clips, Pictures, Power point slides, Marker Board, Recommended textbooks, etc.	Measure the rate of diffusion of gaseous components evaporating into air stream.  Measure equimolar counter diffusion of liquid components into a liquid solvent.  Determine the net molar	Carry out gaseous diffusion experiment  Carry out equimolar diffusion experiment.	Gas diffusion apparatus  Liquid diffusion coefficient apparatus

	gases using empirical equation and formulae.			flux for steady state equimolar counter diffusion.  Determine the net flux for steady state diffusion through a stagnant medium.		
--	--	--	--	--	--	--

**GENERAL OBJECTIVES: 3.0: Know how to evaluate mass transfer coefficients.**

<b>WEEK</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>LEARNING RESOURCES</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER ACTIVITIES</b>	<b>LEARNING RESOURCE</b>
5-7	3.1 Define Mass transfer 3.2 Explain mass transfer coefficient in relation to net molar flux and concentration driving force. 3.3 Explain mass transfer coefficient with respect to mole fraction, partial pressure and concentration in liquid and gas phases. 3.4 Explain mass transfer coefficient in relation to equimolar counter diffusion in a stagnant medium. 3.5 Explain the conversion of mass transfer coefficient from one form to another. 3.6 Define Schmidt, Prandtl and Reynolds numbers. 3.7 Estimate mass transfer coefficients from empirical equations and formula for laminar and turbulent flows. 3.8 Define overall mass transfer coefficient, gas film and liquid film control. 3.9 Carry out calculations from 3.2 – 3.5.	Explain activities 3.1-3.7 to the students.	Video clips, Pictures, Power point slides, Marker Board, Recommended textbooks, Lesson notes, etc.	Carry out experiment to determine the effect of temperature on diffusivities of gases and liquids.	Guide the student to carry out the experiment.	Liquid diffusion coefficient apparatus.

<b>General Objectives 4.0: Understand basic heat transfer phenomena.</b>						
<b>WEEK</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>LEARNING RESOURCE</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>LEARNING RESOURCE</b>
8	4.1 Explain the phenomena and mechanism of heat transfer by conduction, convection and radiation. 4.2 Explain the importance of heat transfer in cement industry. 4.3 Explain the characteristic behaviour and properties of materials vis-à-vis heat conduction, convection and radiation.	Explain activities 4.1-4.3 to the students	Video clips, Pictures, Power point slides, Marker Board, Recommended textbooks, etc.	-	-	-
<b>GENERAL OBJECTIVES: 5.0: Understand the analysis of heat conduction.</b>						
9- 10	5.1 Explain Fourier's First Law. 5.2 Develop Fourier's field equation for heat conduction in an isotropic medium by energy balance. 5.3 Explain thermal conductivity for isotropic and anisotropic media. 5.4 Calculate thermal conductivities for solids, liquids and gases from empirical equations and formulae.	Explain activities 5.1-5.4 to the students.	Video clips, Pictures, Power point slides, Marker Board, Recommended textbooks, etc.	Determine linear and radial temperature profiles applying Fourier's law of heat conduction.  Determine the effect of individual thermal conductivities, surface contacts and insulation on thermal conductivity.	Perform linear and radial temperature profile experiment applying Fourier's law of heat conduction  Perform thermal conductivity experiment	Heat conduction apparatus
<b>GENERAL OBJECTIVES: 6.0: Understand the concepts of convection.</b>						
	6.1 Explain natural and forced convection mechanisms of heat transfer. 6.2 Define the heat transfer coefficient. 6.3 Explain the dependence of heat transfer	Explain to the students activities 6.1-6.7.	Video clips, Pictures, Power point slides, Marker Board, Recommended textbooks, etc.	Carry out heat convection experiments.	Guide the students to carry out the experiment.	Heat convection apparatus.  Heat exchange test rig.

11- 13	coefficient on the fluid flow regions. 6.4 Define overall heat transfer coefficient. 6.5 Describe heat exchange equipment. 6.6 Define temperature gradient, heat transfer resistance, effectiveness and Net Unit Transfer (NUT) concepts. 6.7 Determine heat exchange surface through simple performance and design calculations.					
--------	---	--	--	--	--	--

**GENERAL OBJECTIVES: 7.0: Understand basic radioactive heat transfer**

14- 15	7.1 Explain ideal or black body radiation. 7.2 Define transmittivity, reflectivity, emissivity and absorptivity. 7.3 Differentiate between spectral and total values of intensity, emissive power and parameters in black body radiation. 7.4 Develop Lambert's Cosine law, Wien's displacement law, Stefan-Boltsman law and Kirchoff's law. 7.5 Differentiate between black and grey surfaces. 7.6 Explain view factors and direct radiant interchange areas.	Explain activities 7.1- 7.6 to the students.  Prepare detailed lecture notes and relevant diagrams with video clips.	Video clips, Pictures, Power point slides,  Marker Board,  Recommended textbooks, Lesson notes, etc.	Perform the following radioactive heat transfer experiments:  Determine radiant heat exchange between ideal isothermal surfaces.  Determine view factors and radiant exchange between ideal rectangular surfaces in various configurations.  Determine view factors in radiant exchange systems.	Guide the students to carry out the experiments.	Thermal radiation apparatus
--------	---	--	--	--	--	-----------------------------

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Eight (8) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: CET 223</b>	<b>UNIT: 2</b>	<b>TOTAL CONTACT HOURS: 2HRS/WEEK</b>
<b>COURSE TITLE: ELECTRICAL MACHINES AND INDUSTRIAL DRIVES</b>			<b>THEORETICAL: 2HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/2</b>	<b>PRE-REQUISITE: -</b>		<b>PRACTICAL: 0 HOURS/WEEK</b>

**Goal:** This course is designed to enable the student understand electrical machines and industrial drives.

**GENERAL OBJECTIVES**

On completion of this course, the student will be able to:

- 1.0 Know electrical/electronic graphical symbols.
- 2.0 Know and draft basic wiring diagrams.
- 3.0 Know different sizes and applications of cables.
- 4.0 Understand the fundamentals of D.C. and A.C. machines.
- 5.0 Understand the need for various types of AC Machines.
- 6.0 Know the drives for various industrial applications.

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE TITLE: ELECTRICAL MACHINES AND INDUSTRIAL DRIVES</b>	<b>COURSE CODE : CET 223</b>	<b>UNIT: 2</b>	<b>CONTACT HOURS: 2</b>
			<b>THEORETICAL: 2 Hours/week</b>
<b>YEAR/SEMESTER: ND II /2</b>			<b>PRACTICAL: Hours/week</b>
<b>Goal:</b> This course is to enable Students understand electrical machines and industrial drives			

	<b>GENERAL OBJECTIVE 1.0 :</b> Know electrical/electronic graphical symbols.				
1 – 3	<p>1.1 Identify and draw electrical/electronic graphical symbols such as: Resistor, Capacitor, Inductor, Diodes, Thyristor, Diac, Triac, Operational Amplifier, Logic gates, Linear IC, Power switches, Sockets, Isolator switches, Breakers, Motors,</p> <p>1.2 Draft various electrical installation/wiring diagrams.</p> <p>1.3 Draw the installation diagram for a single phase and three-phase energy meters in domestic and commercial/industrial premises.</p>	<p>Explain activities 5.1-5.4 to the students.</p>	<p>Recommended textbook, Markerboard, duster, Drawing materials/instrument, circuit diagrams, electrical symbol charts.</p>		
	<b>GENERAL OBJECTIVE 2.0 :</b> Know and draft various wiring diagrams.				

3 – 5	<p>2.1 Explain schematic and wiring diagrams.</p> <p>2.2 State the merits and demerits of schematic and wiring diagrams</p> <p>2.3 Draft various wiring diagrams.</p> <p>2.4 Explain methods of preventing hazards</p> <p>2.5 Define earth continuity conductor, earth electrode, consumer's earth terminal.</p> <p>2.6 Explain the protection of an installation by fuse and by ELCB.</p> <p>2.7 Distinguish between solid earthing practice and earth leakage circuit breaker protection.</p> <p>2.8 State a number of problems associated with earth leakage circuit breakers.</p> <p>2.9 Explain how to prevent electric shock.</p> <p>2.10 Explain artificial respiration:</p> <p>a) mouth resuscitation</p> <p>b) revised Holger Nelson resuscitation</p> <p>c) external cardio compression/cardiopulmonary resuscitation.</p>	<p>Explain to the students activities 2.1 – 2.10.</p> <p>Show various wiring diagrams.</p> <p>Use video clips to demonstrate artificial respiration in 2.10.</p>	<p>Recommended textbook, Marker board, duster, Lecture notes, Drawing materials/instrument video clips etc</p>			
<b>GENERAL OBJECTIVE 3.0 :Know different sizes and applications of cables.</b>						

13-15	<p>3.1 List the main types of insulating and conducting materials.</p> <p>3.2 Distinguish between conductors and insulators.</p> <p>3.3 State the advantages and disadvantages of using different types of cable such as PVE - Insulated, PVC - sheathed cables, Mineral - Insulated metal-sheathed cables, Armoured PVC - insulated, PVC - sheathed cables, Steel/PVC conduits, Steel/PVC trunking and Flexible cable etc.</p>	<p>Explain to the students activities 3.1-3.3.</p> <p>Identify various cables.</p> <p>Students to visit nearby industries to familiarize with the industrial machines and drives</p>	<p>Recommended textbook, Markerboard, cleaner, Drawing materials/instrument, samples of assorted cables, etc.</p>			
<b>GENERAL OBJECTIVES 4.0</b> :Understand the fundamentals of D.C. and A.C machines.						
1-3	<p>4.1 Define motor and generator.</p> <p>4.2 Explain the principle of construction of motor and generator (DC/AC).</p> <p>4.3 Explain the principle of operation of motor and generator (DC/AC).</p> <p>4.4 Explain the characteristics of motor and generator (DC/AC).</p> <p>4.5 State torque and Electromagnetic induction (EMI) equation.</p>	<p>Explain activities 4.1 – 4.5 to the students.</p>	<p>Recommended textbook, Markerboard, cleaner.</p>			

	4.6 Explain various excitation schemes. 4.7 Explain speed control and braking of D.C. Motor.					
	<b>GENERAL OBJECTIVE 5.0:</b> : Understand the need for various types of AC Machines					
3-6	5.1 List types of A.C machines. 5.2 Explain the principle of operation of each in 2.1. 5.3 State Electromotive force (EMF) law. 5.4 Sketch phasor diagrams of synchronous motor. 5.5 Explain principle of rotation in a magnetic field. 5.6 Explain starting methods. 5.7 Explain the principle of operation of induction motor. 5.8 Explain the features of synchronous motor. 5.9 Explain speed control of induction motor. 5.10 List types of single phase induction motor. 5.11 Explain the following: <ul style="list-style-type: none"> <li>• Capacitor start</li> <li>• Capacitor run motors.</li> <li>• Shaded pole motor.</li> </ul>	Explain activities 5.1 – 5.13 to the students.	Recommended textbooks, Markerboard, duster, etc			

	<ul style="list-style-type: none"> <li>• Repulsion type motor</li> <li>• Universal motor</li> <li>• Hysteresis motor</li> <li>• Permanent magnet synchronous motor.</li> <li>• Switched reluctance motor.</li> </ul> <p>5.12 Compare single and three phase induction motors.</p> <p>5.13 Explain:</p> <ul style="list-style-type: none"> <li>• features</li> <li>• principle of operation of synchronous generators.</li> </ul>					
<b>GENERAL OBJECTIVE 6.0 : Know the drives for various industrial applications</b>						
9-11	<p>6.1 Define electrical drives.</p> <p>6.2 Explain factors determining selection of drives:</p> <ul style="list-style-type: none"> <li>• Rating of motors,</li> <li>• speed – torque</li> <li>• loads,</li> <li>• distance.</li> </ul> <p>6.3 Explain starting, braking and reversing operations in relation to drives.</p> <p>6.4 Explain speed control of DC motors</p> <p>6.5 Explain thyristor converter fed DC drives.</p> <p>6.6 Explain single, two and four quadrant operations of thyristor.</p>	Explain activities 4.1-4.20 to the students	Recommended textbook, Chalkboard, duster, Chalk, Lecture notes, etc Drawing materials/instrument			

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least Five (5) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: CET 224</b>	<b>UNIT: 1</b>	<b>TOTAL CONTACT HOURS: 1HRS/WEEK</b>
<b>COURSE TITLE: INTRODUCTION TO INDUSTRIAL AUTOMATION</b>			<b>THEORETICAL: 1HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/2</b>	<b>PRE-REQUISITE: -</b>		<b>PRACTICAL: 0 HOURS/WEEK</b>

**Goal:** This course is to enable the student understand basic concept of industrial automation.

**GENERAL OBJECTIVES**

On completion of this course, the student will be able to:

- 1.0 Understand the basic concept of industrial automation
- 2.0 Know different industrial sensors and their applications
- 3.0 Know different industrial controllers and their applications
- 4.0 Understand basic industrial communication protocol

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>COURSE TITLE: INTRODUCTION TO INDUSTRIAL AUTOMATION</b>		<b>COURSE CODE : CET 224</b>		<b>UNIT: 1</b>	<b>CONTACT HOURS: 1</b>	
				<b>THEORETICAL: 1Hours/week</b>		
<b>YEAR/SEMESTER: ND II /2</b>				<b>PRACTICAL: 0Hours/week</b>		
<b>Goal:</b> This course is designed to enable the student understand basic concept of industrial automation.						
<b>GENERAL OBJECTIVES 1.0 :</b> Understand the basic concept of industrial automation						
<b>THEORETICAL CONTENTS</b>			<b>PRACTICAL CONTENTS</b>			
<b>WEEK/S</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>
1-3	1.1 Explain the significance of feedback as the basis of automation. 1.2 Explain automation as combination of sensing, measurement and control of physical variable without human intervention. 1.3 Explain classification of control as: Open loop control system; Closed loop control system. 1.4 State the features of each classification in 1.3. 1.5 Explain the following process control components: i) Set point (Reference input) ii) Controller iii) Process or plant iv) Feedback sensor v) Actuator (final control element)	Explain activities 1.1 – 1.5 to the students.	Recommended textbook, Markerboard, duster, etc,			

	vi) Controlled output					
<b>GENERAL OBJECTIVE 2.0:</b> Know different industrial sensors and their applications						
3-6	<p>2.1. Identify the following sensors:</p> <ul style="list-style-type: none"> <li>i) Temperature sensors</li> <li>ii) Level sensors</li> <li>iii) Flow sensors</li> <li>iv) Pressure sensors</li> <li>v) Position sensors.gProximity Switches, Photo - Electric Sensors and Encoders.</li> </ul> <p>2.2. Explain principles of operation of items in 2.1 above</p> <p>2.3 Understand common application of these sensors in industrial processes.</p> <p>2.4 Explain general procedure on installations, repair and maintenance of different sensors</p>	Explain activities 2.1 – 2.4 to the students.	Recommended textbooks, Markerboard, samples of thermocouples, RTD, thermistor, etc.			
<b>GENERAL OBJECTIVE 3.0 :</b> Know different industrial controllers and their applications						
7-8	<p>3.1 Explain the following types of controls:</p> <ul style="list-style-type: none"> <li>• on and off control,</li> <li>• proportional control,</li> <li>• integral control and</li> <li>• derivative control.</li> </ul> <p>3.2. Explain the operation of the following controllers:</p> <ul style="list-style-type: none"> <li>• Proportional Integral</li> </ul>	Explain activities 2.1 – 3.4 to the students.	Recommended textbooks, Markerboard, chalk Cleaner, samples of control etc.			

	(PI) controller • Proportional Derivative (PD) controller • Proportional Integral and Derivative (PID)controller . 3.4 Describe the following modern controllers: • Programmable logic controller (PLC) • Supervisory Control and data acquisition system (SCADA) • Distributed Control System (DCS). 3.4 State the function and applications of modern controllers in cement production.					
<b>GENERAL OBJECTIVE 4.0</b> : Understand basic industrial communication protocol						
9-11	4.1 Explain the basic operating principles of the following: i) Foundation field bus ii) Modbus iii) HART(Highway Addressable Remote Transmitter) iv) AS-I (Actuator Sensor Interface) v) Device-Net vi) Profibus vii) CANbus viii) ControlNET 4.2 Explain the applications of each item in 4.1.	Explain activities 4.1 – 4.2 to the students.	Recommended textbook, Markerboard, cleaner, etc	Industrial visit. Write report on the visit.	Organize industrial visit to cement/allied factoryto appreciate automated cement production.	Cement/allied factory.

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Practical	At least one industrial visit to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA CEMENT ENGINEERING TECHNOLOGY</b>	<b>COURSE CODE: CET 225</b>	<b>UNIT: 2</b>	<b>TOTAL CONTACT HOURS: 2HRS/WEEK</b>
<b>COURSE TITLE: PYRO-PROCESSING AND CLINKER FORMATION</b>			<b>THEORETICAL: 2HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/2</b>	<b>PRE-REQUISITE: -CET 123</b>		<b>PRACTICAL: 0 HOURS/WEEK</b>

**Goal:** This course is designed to enable students understand pyro-processing of the raw meal for clinker formation.

**GENERAL OBJECTIVES**

On completion of this course, the student will be able to:

- 1.0 Know the types of fuels used in pyro-processing.
- 2.0 Understand the treatment of fuels for pyro-processing.
- 3.0 Understand firing process.
- 4.0 Understand clinkerization in cement kilns
- 5.0 Understand cooling of clinker.
- 6.0 Know refractories.

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>COURSE TITLE: PYRO-PROCESSING AND CLINKER FORMATION</b>		<b>COURSE CODE : CET 225</b>		<b>UNIT: 2</b>	<b>CONTACT HOURS: 2</b>	
				<b>THEORETICAL: 2 Hours/week</b>		
<b>YEAR/SEMESTER: ND II /2</b>				<b>PRACTICAL: 0Hours/week</b>		
<b>Goal:</b> This course is designed to enable students understand pyro-processing of the raw meal for clinker formation.						
<b>GENERAL OBJECTIVE 1.0 :</b> Know the types of fuels used in pyro-processing.						
<b>THEORETICAL CONTENTS</b>			<b>PRACTICAL CONTENTS</b>			
<b>WEEK/S</b>	<b>SPECIFIC IN LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>
1-2	1.1 Define pyro-processing. 1.2 State the sources of the following types of fuel used in cement kilns pyro processing: i. Low Pour Fuel Oil (LPFO). ii. Coal iii. Petroleum Coke iv. Gas. v. Waste fuel (tyres, palm kernel, oils, residues, rice husks) 1.3 Explain the availability of the types of fuel in 1.2 locally. 1.4 Compare the calorific values and sulphur contents of the types fuel stated in 1.2. 1.5 Explain the effect of fuel types listed in 1.2 on the chemistry of clinker and cost of production.	Explain activities 1.1-1.5 to the students.	Instructional Manual, Video Clips, Recommended textbooks, e-books, Markerboard, Power Point Projector, Screen, etc	Carry out laboratory determination of calorific values of these types of fuel.  Carry out laboratory determination of sulphur content of these types of fuel.	Guide the students in identifying samples of types of fuel used in pyro-processing	Calorimeter, and fuel samples, chemical reagents and glass wares.

	<b>GENERAL OBJECTIVE 2.0:</b> Understand the treatment of fuels for pyro-processing.				
3-4	<p>2.1 Explain the treatment of LPFO using oil boilers.</p> <p>2.2 Explain coarse coal grinding and fine coal storage.</p> <p>2.3 Explain the storage and treatment of waste fuel.</p> <p>2.4 Explain the safety involved in the treatment of fuels listed in 1.2.</p>	<p>Explain activities 2.1-2.4 to the students.</p>	<p>Instructional Manual, Video Clips, Recommended textbooks, e-Books, Markerboard, Power Point Projector, Screen, etc.</p>		
<b>GENERAL OBJECTIVE 3.0 :</b> Understand Firing Process.					
5-7	<p>3.1 Explain direct and indirect firing methods.</p> <p>3.2 State the advantages and disadvantages of the firing methods</p> <p>3.3 Describe with the aid of diagram the burner pipe of cement kilns.</p> <p>3.4 Explain the firing mechanism of the kilns main burner (burner pipe).</p> <p>3.5 Explain pattern of flame formation during firing of the burner pipe.</p> <p>3.6 Explain the heating-up process with the aid of heating curve.</p> <p>3.7 Explain the impact of the tertiary air duct (T.A.D) control on burner pipe firing using the T.A.D damper.</p>	<p>Explain activities 3.1-3.8 to the students</p>	<p>Instructional Manual, Video Clips, Recommended textbooks, e-Books, Markerboard, Power Point Projector, Screen, , etc</p>		

	<p>3.8 State the similarities and differences between the calciner burners and burner pipe.</p> <p>3.9 Explain burner pipe alignment and its importance.</p>					
<b>GENERAL OBJECTIVE 4.0</b> :Understand clinkerization in cement kilns.						
8-10	<p>4.1 Define clinkerization.</p> <p>4.2 Explain the burning process of raw meal (mix).</p> <p>4.3 Explain sintering reactions.</p> <p>4.4 Write the chemical equations for 4.3.</p> <p>4.5 Distinguish solid phase and liquid phase of clinker formation in cement kilns.</p> <p>4.6 Explain the transition of kiln feed at the various zones.</p> <p>4.7 Distinguish ring and coating formations during clinkerization.</p> <p>4.8 Explain types of ring formation.</p> <p>4.9 Distinguish normal coating formation and coating build-up.</p> <p>4.10 Explain the effects of silica modulus, lime saturation factor and alumina modulus on</p>	<p>Explain activities 4.1-4.10 to the students.</p>	<p>Instructional Manual, Video Clips, Recommended textbooks, e-books, Marker Board, Power Point Projector, Screen, etc</p>			

	clinkerization. 4.11 Explain cement kiln dust.					
<b>GENERAL OBJECTIVE 5.0</b> : Understand cooling of clinker.						
10-11	5.1 Explain the cooling mechanism for clinker. 5.2 Explain effect of mechanical flow regulator (MFR) on cooling of clinker. 5.3 Explain the formation of snowman in the clinker cooler. 5.4 Explain the recuperation of heat loss during cooling of clinker. 5.5 State the advantages and disadvantages of types of cooler.	Explain activities 5.1-5.5 to the students.	Instructional Manual, Video Clips, Recommended textbooks, e-Books, Markerboard, Power Point Projector, Screen etc.			
<b>GENERAL OBJECTIVE 6.0</b> : Know Refractories						
12-14	6.1 Define refractory. 6.2 Explain the role of refractories in pyro-processing. 6.3 List all refractory materials used in cement kilns. 6.4 State the chemical composition of refractories. 6.5 Explain refractory maintenance planning. 6.6 Distinguish hot and red spots. 6.7 Explain refractory	Explain activities 6.1-6.10 to the students.	Instructional Manual, Video Clips, Recommended textbooks, e-books, Markerboard, Power Point Projector, Screen etc			Samples of refractory materials

	brick lining in cement kilns.					
	6.8 List the equipment used in refractory lining.					
	6.9 Compare the coefficient of heat transfer of refractories in 6.2.					
	6.10 State the significance of ISO and VDZ shapes in brick lining.					

**Assessment:**

Type of Assessment	Purpose and Nature of Assessment	Weighting (%)
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Assignment	At least Five (5) works to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>			
<b>COURSE TITLE: QUALITY CONTROL IN CEMENT MANUFACTURE</b>	<b>COURSE CODE: CET 226</b>	<b>UNIT: 2</b>	<b>CONTACT HOURS: 2 HOURS/WEEK</b>
			<b>THEORETICAL: 2HOURS/WEEK</b>
<b>YEAR/ SEMESTER: ND II/2</b>	<b>PRE-REQUISITE: NONE</b>		<b>PRACTICAL: 0 HOURS/WEEK</b>

**Goal:**This course is designed to enable the student acquire basic knowledge of Quality control in Cement Manufacturing

**General Objectives:**

On completion of this course, the student should be able to:

- 1.0 Understand the use statistical analysis in quality control.
- 2.0 Understand national and international standards and specifications for cement.
- 3.0 Understand quality assurance methods.
- 4.0 Understand quality management systems (QMS).

<b>PROGRAMME: NATIONAL DIPLOMA IN CEMENT ENGINEERING TECHNOLOGY</b>						
<b>COURSE TITLE: QUALITY CONTROL IN CEMENT MANUFACTURE</b>			<b>COURSE CODE: CET 226</b>		<b>UNIT: 1</b>	<b>CONTACT HOURS: 1HOURS/WEEK</b>
					<b>THEORETICAL: 1HOUR/WEEK</b>	
<b>YEAR/SEMESTER: ND II/2</b>			<b>PRE-REQUISITE : NONE</b>		<b>PRACTICAL: 0 HOUR/WEEK</b>	
<b>Goal:</b> This course is designed to enable the student acquire basic knowledge of Quality control in Cement Manufacturing.						
<b>General objective 1:0</b> Understandthe use of statistical analysis in quality control.						
<b>THEORETICAL CONTENT</b>				<b>PRACTICAL CONTENT</b>		
WEEK\S	SPECIFIC LEARNING OUTCOMES	TEACHER'S ACTIVITY	RESOURCES	SPECIFIC LEARNING OUTCOME	TEACHER'S ACTIVITY	RESOURCES
1-2	1.1 Explain statistical quality control. 1.2 Explain control charts 1.3 State theimportance of quality control 1.4 Describe sampling and sampling techniques 1.5 Explain input control. 1.6 Explain the control of raw meal and kiln feed. 1.7 Explain the control of chemical composition and physical characteristics of limestone, coal, gypsum and cement.	Explain activities 1.1 - 1.7 to the students.  Give students exercises	Instructional manuals, Video clips, Recommended textbooks, e-books, power point, projector resources, statistical tables, calculators			Calculators, statistical tables
<b>General objective 2:0</b> Understand national and international standards and specifications for cement.						
3-4	2.1 Explain specification in relation to national and international standards. 2.2 Explain quality and specification requirements. 2.3 State the differences in test methods for national and international standards and specifications. 2.4 State the methods of comparison for each requirements in 2.3. 2.5 Explain the scheme of testing and inspection, detailed	Explain to the students activities 2.1-2.6.	Instructional manuals, Video clips, Recommended textbooks, e-books, power point, projector resources, statistical tables, calculators, ASTM, NIS, BS			NIS,ASTM, BS, etc

	requirements of Standards Organisation of Nigeria. 2.6 State the coding for national and international standards and specifications.					
<b>General objective 3:0</b> Understand Quality Assurance Methods.						
5-6	3.1 Define quality assurance. 3.2 Explain quality assurance needs, principles and essentials. 3.3 State the advantages of quality assurance system and quality manual. 3.4 Explain field complaints, quality audit and types.	Explain activities 3.1-3.4 to the students.	Instructional manuals, Video clips, Recommended textbooks, e-books, power point, projector resources,	-	-	-
<b>General objective 4:0</b> Understand Quality Management Systems						
7-8	4.1 Explain Quality Management Systems (QMS). 4.2 Describe QMS concept of quality circles. 4.3 Explain ISO:9001-2000 and NIS equivalents in relation to QMS. 4.4 Explain the practices of quality control system in a cement plant. 4.5 Explain the job functions of a Quality Control Manager in a cement factory.	Explain 4.1-4.5 to the students activities	Instructional manuals, Video clips, Recommended textbooks, e-books, power point, projector resources,			

**Assessment:**

<b>Type of Assessment</b>	<b>Purpose and Nature of Assessment</b>	<b>Weighting (%)</b>
Examination	Final examination (written) to assess knowledge and understanding	60
Test	At least Two (2) progress tests for feedback.	20
Assignment	At least Four(4) exercises to be assessed by the teacher	20
Total		100

<b>PROGRAMME: NATIONAL DIPLOMA IN BOAT/SHIPBUILDING TECHNOLOGY</b>						
<b>COURSE TITLE:FINAL YEAR PROJECT</b>		<b>COURSE CODE:CET 227</b>		<b>UNIT: 4</b>		<b>CONTACT HOURS: 4</b>
						<b>THEORETICAL: 0HOURS/WEEK</b>
<b>YEAR/SEMESTER: ND II/2</b>		<b>PRE-REQUISITE:-</b>				<b>PRACTICAL: 4HOURS/WEEK</b>
<b>Goal:</b> This module is intended to allow each Student work on an Independent Project and to inculcate in the Students the ability to integrate all the objectives learnt during his/her course of study and to Utilize the acquired skills on finding solutions to problems relating to problems relating to his/her profession and the Cement Industry as a whole						
<b>THEORETICAL CONTENTS</b>			<b>PRACTICAL CONTENTS</b>			
<b>WEEK/S</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>	<b>SPECIFIC LEARNING OUTCOMES</b>	<b>TEACHER'S ACTIVITIES</b>	<b>RESOURCES</b>
1-15	-	-	-	Suggested Project Topics 1.1 Condition monitoring as maintenance tool e.g. vibration measurements, temperature monitoring, pressure monitoring etc. 1.2 Repair/maintenance of : <ul style="list-style-type: none"> <li>- Diesel engines</li> <li>- Centrifugal pumps</li> <li>- Air compressor</li> <li>- Refrigeration and air conditioning plants</li> <li>- Sewage plants</li> <li>- Main switch board</li> <li>- Alternators/generators</li> <li>- Emergency lighting</li> <li>- Steering gear</li> <li>- Domestic hydrophor plant</li> <li>- Fresh water generator</li> </ul>	Guide in selection of project topic and supervise  Advise throughout the duration of project work	Materials/systems for projects.

# **MINIMUM PHYSICAL FACILITIES REQUIRED FOR ND CEMENT ENGINEERING TECHNOLOGY PROGRAMME**

## MINIMUM PHYSICAL FACILITIES REQUIRED FOR NATIONAL DIPLOMA CEMENT ENGINEERING TECHNOLOGY PROGRAMME

S/N	Laboratory	Workshop	Studio
1	Electrical machines	Machine/ fitting /Fabrication shop	Drawing
2	Electrical Pwer	Cement technology	ICT
3	Electronics		
4	Basic Electricity		
5	Instrumentation and Control		
6	Physics		
7	Chemistry		
8	Cement Quality control		
9	Strength of Materials		
10	Thermodynamics		
11	Fluid mechanics		
12	Soil		
13	Materials		
14	Unit operations		

### WORKSHOPS

**A. Machine/ fitting /Fabrication shop**

S/N	Description	Quantity
	Work benches	For 30 students
	Bench vices	30
	Lathe Machine	1
	Pillar drilling machine	1
	Marking out table	1
	Sensitive bench drilling machine	2
	Surface plate	2
	Radial drilling machine	1
	Pedestal grinder with drill grinding attachment	1
	Power hacksaw	1
	Machine reamers	1
	Hand reamers machine	5
	Flat rough file (300 mm)	30
	Round rough file (300 mm)	30
	Round smooth file (300 mm)	30
	Source rough file (300 mm)	30
	Flat smooth file (250 mm)	30
	Half round rough file (150 mm)	30
	Half round smooth file (250 mm)	30
	Triangular smooth file (150 mm)	30
	Try-square	30
	Dividers	30
	Steel Rules	30
	Scribers	16
	Vee block and clamp	2
	Scribing block	2
	Chisels	10
	Centre punches	30
	Cold chisels (set)	10 Sets
	Scrapers (set)	5
	Guillotine	2
	Vernier Caliper	10
	Hacksaw frames	30
	Stock and dies (set) metric	3 Sets
	Taps and wrenches (set) metric	3 Sets
	Hand drill	2
	Centre drills	Lot

Tap extractor (set)	2 Sets
Screw extractor (set)	4 Sets
Screw gauges (assorted)	2 Sets
Screw driver (set)	4 Sets
Hammers (assorted weight)	30
Wire brush	5
Micrometer (assorted)	5
Oil can	5
Fire extinguisher, water and sand buckets	4 each
Measuring tapes	10
Feeler gauges	10
Rivet gun	6 pairs
Goggles	30 pairs
Drill set	4 set
Electric Hand drill	2
Electric hand grinder/sander	5
Vernier height gauge	2
Dial indicators and stand	5
Mallets (rubber, wood and rawhide)	5 each
Number stamps	2 sets
Letter stamps	2 sets
Hydraulic press	1
Punches (cold)	4 sets
Pliers (assorted)	10
Hand shear	5
Oxygen gas cylinders	2
Acetylene gas cylinders	2
Cylinder regulator	2
Nozzles hose	2
Electric Arc Welding Machine	2
Welding chipping hammer	8
Wire brush (bench type)	8
Welding shield	8
Gloves	15
Gas bottle keys	4
Welding and cutting burner set	2
Gas cylinder truck	2
Brazing rods	6 tins
Flash gas lighter	4
Soldering flux	6 tins
Blow lamps	10

	Stools	6
	Try-square	6
	Leg vice	2 (optional)
	Electrode drying oven	1
	Swing beam folder	1
	Bending roller	1
	Double ended buffer and polisher	1
	Profile cutting machine	1
	Foot operated guillotine machine	1
	Assorted cutting snips	10
	Twist drill sets	4 sets

## B. Cement Technology

S/N	Description	Quantity
1	Rock drilling machine	3
2	Samples of rock	Assorted
3	Sand	Assorted
4	Coarse Aggregate	Assorted
5	Hydraulic binders	Assorted
6	Limestone	Assorted
7	Chalk	Assorted
8	Marble	Assorted
9	Shale	Assorted
10	Clay	Assorted
11	Marl	Assorted
12	Iron ore	Assorted
13	Laterite	Assorted
14	Mill Scale	2
15	Vicat apparatus	2
16	Glasswares	Assorted
17	Weighing Machine	2
18	Crushing Machine	2
19	Compressor	2
20	Pumps	2
21	Valves	2
22	Air receiver tank	1
23	Air dryers	2

24	Sedimentation tank	1
25	Filtration bed	1
26	Bearing extractor	2
27	Puller bearing	2
28	Small size impeller	2
29	Small gearbox	2
30	Sample of conveyor belt	2
31	Complete tool box	2
32	Cold patch	2
33	Diagnose and inspection equipment	2
34	Small size ball mill	2
35	Hand tools	Assorted
36	Chemicals	Assorted
37	Set of Sieves	2
38	Specific gravity bottles	2
39	Atterberg limit apparatus	2
40	Tray	Assorted
41	Oven	2
42	Tri-axial machine	1
43	Schmidt hammer	2
44	X-ray Crystallograph Machine	1
45	Universal Testing Machine (UTM)	1
46	Calorimeter	2
47	Fuel Sample	Assorted
48	Sample of Refractory Materials	Assorted
49	Pressure gauge	15
50	Thermometer	10
51	Kiln draft meter	5
52	Kiln speed meter	5
53	Oxygen concentration	5
54	CO <sub>2</sub> meter	5
55	H <sub>2</sub> O meter	5
56	Spanners	Different types
57	Screw drivers	Different types
58	Barometer	5
59	Pressure sensors	10
60	Pressure transmitter	5
61	Pressure gauges with output signal	5
62	Switches	25
63	Relay	20
64	Electronic pressure measuring instrument	5

65	Pyrometer	5
66	Handheld infrared thermocouples	5
67	Thermistor	5
68	Probes	5
69	Resistance temperature detectors (RTD)	Large Quantity
70	Thermopiles	5
71	Amplifier (cold junction compensation)	5
72	Camera field devices	5
73	Transmitters and readouts	2
74	Hotplate	5
75	Probe holder	25
76	Rheostat	5

## LABORATORIES

### A. MACHINES

S/N	DESCRIPTION	QUANTITY
1	Machine Test Bed	3
2	Shaded Pole Motor	3
3	Capacitor Start Motor	3
4	AC Series Motor	3
5	Synchronous Generator	3

6	Cage Induction Motor	3
7	Wound Rotor Induction Motor	3
8	Resistive Load Bank	3
9	Inductive Load Bank	3
10	Capacitive Load Bank	3
11	Cathode Ray Oscilloscope	3
12	Thyristor Drive	3
13	Ward Leonard Complete Set	3
14	Classic/Electronics ward-leonard machine set	3
15	Laptop Computer	2
16	Digital Clamp Meter	2
17	Power Protection Devices (Circuit Breakers, Isolators, Relays and Fuses e.t.c.)	2

## STUDIOS

### A. ICT STUDIO

S/N	Description	Quantity
1	Computers	30
2	Printers	2
3	Tables and Chairs	30
4	Different Types of Software	Assorted
5	Kiln Simulator/CECIL Sof ware	Assorted
6	Magi-board and Marker	1
7	Projector	1

### B. DRAWING STUDIO

S/NO	ITEM	QUANTITY
1	Drawing table complete with drafting machine/stood	30
2	Drawing set Complete with pen for ink work	2
3	45o set square	2
4	60o set Square	2
5	Bleu printing Machine	1
6	Adjustable set Square	5
7	Desk Sharpener	5
8	Triangular Scale Rule (300mm)	5
9	Flat Scale Rule (300mm)	5
10	Blackboard Ruler	4-1
11	Blackboard Tee Square	4-1
12	Blackboard set Square (450 60o)	4 each 2
13	Blackboard compasses	4-1
14	Belabored projector	4-1
15	French Curve set	4-1
16	Letter Stencil (3mm, 6mm, 7mm and 10mm)	5 each
17	Rubber stencil (3mm, 6mm, 7mm, 6mm and 10mm)	5 each
18	Erasing stencil	5 each
19	Drawing rack/shelve for 30 students	
20	Personal computers	2
21	Plotter	1
22	Printer to handle A3 Size	1

## GUIDELINES FOR ASSESSMENT OF STUDENT PROJECTS

**PART A: SUPERVOSOR'S ASSESSMENT**

<b>Title of Project:</b>	
<b>Name of Student:</b>	
<b>Registration Number:</b>	
<b>Course:</b>	

		<b>Maximum Score</b>	<b>Actual Score</b>
1	Presentation of Report (if conformity with standards)	<b>6</b>	
2	Understanding of the problem(s) and the pursuit of it to achieve the set objectives	<b>7</b>	
3	Report content (Data collection, Test procedures, Design/Construction, results and discussions)	<b>12</b>	
4	Does the report read as an integrated whole? (e.g. Details of work should be put in appendices)	<b>12</b>	
5	Quality of English (Sentence construction, grammar, spelling)	<b>6</b>	
6	Conclusion, Recommendations and summary	<b>7</b>	
	<b>Total</b>	<b>50</b>

## **GUIDELINES FOR TEXTBOOK WRITERS**

### **NATIONAL DIPLOMA**

The following guidelines are suggestions from the Engineering Committees to the writers of the textbooks for the new curricula. They are intended to supplement the detailed syllabuses which have been produced, and which define the content and level of the courses.

Authors should bear in mind that the curriculum has been designed to give the students a broad understanding of applications in industry and commerce, and this is reflected in the curriculum objectives.

- i. One book should be produced for each syllabus
- ii. Page size should be A4
- iii. The font size should be 12 point for normal text and 14 point where emphasis is needed
- iv. Line spacing should be set to 1.5 lines
- v. Headings and subheadings should be emboldened
- vi. Photographs, diagrams and charts should be used extensively throughout the book, and these items must be up-to-date
- vii. In all cases, the material must be related to industry and commerce, using real life examples wherever possible so that the book is not just a theory book. It must help the students to see the subject in the context of the 'real world'
- viii. The philosophy of the courses is one of an integrated approach to theory and practice, and as such, the books should reflect this by not making an artificial divide between theory and practice.
- ix. Illustrations should be labeled and numbered.
- x. Examples should be drawn from Nigeria wherever possible, so that the information is set in a country context.
- xi. Each chapter should end with student self-assessment questions (SAG) so that students can check their own master of the subject
- xii. Accurate instructions should be given for any practical work having first conducted the practical to check that the instructions do indeed work
- xiii. The books must have a proper index or table of contents, a list of references and an introduction based on the overall course philosophy and aims of the syllabus.
- xiv. Symbols and units must be listed and a unified approach used throughout the book
- xv. In case of queries regarding the contents of the books and the depth of information, the author must contact the relevant curriculum committee via the National Board for Technical Education
- xvi. The final draft version of the books should be submitted to Nigerian members of the curriculum working groups for their comments regarding the content in relation to the desired syllabus.

## **PROJECT FORMAT AND MARKING SCHEME TIME TABLE**

### **Format**

All Projects are to be written up and printed on A4 paper, double spaced and should normally not exceed 40 pages; appendices and tables outside the text may be incorporated as extra. The department or school shall give as much assistance as possible, for example, where funds permit in subsidising the binding cost.

Four bound copies should be submitted about a month to the ND II second semester examinations; one of these copies will be returned to the student.

### **Marking Scheme**

There are three categories of assessing and marking student's project, these being:

- Supervisor's Marks - 15%
- Project Report Assessment by Supervisor/External Examiner - 60%
- Oral Examination - 25%

### **Supervisor's Marks**

15% of the total marks will be allocated to the Supervisor exclusively who shall assess those aspects of practical work which are very difficult to quantify and are not necessarily apparent in the written, work. Such will include; the student's diligence, attitude and initiative in the face of non-controllable internal and external difficulties encountered.

### **Project Report**

60% of the total marks will dwell on the overall quality and content of the project. The supervisor marks the project initially and this is without disclosure of original score passed on the External Examiner who using the same guidelines as below, awards his own marks. The two marks are moderated by the Board of Examiners which shall consist of all academic staff of the department or school. A general marking guide would include.

### **General Presentation**

Considering: layout, quality of diagrams and photography, quality of English

- 20%

### **Approach**

Considers: Depth and Scope of Literature survey presentation of the aims of the project, design and construction work, operation of equipment, deficiencies in the techniques, precautions taken at experimental level and originality of thought or work

- 20%

### **Treatment of Results**

Considers: discussion, interpretation and critical assessment of results, linking up to previous and other work, conclusions and recommendation for further work

- 20%

### **Oral Examination**

The Board of Examiners of Moderating committee needs to familiarize themselves more fully with the work of the student as well as clarity of areas of misunderstanding that may arise from the report through an oral examination. This also aims at determining whether the report is a true and original account of work actually carried out.

The student shall be judged by his confidence, presentation including mode of appearance, technical accuracy and other attributes that individual committees may deem necessary

- 25%
